JAMES CARTER & CO.

SPECIAL ANNOUNCEMENT.

It is gratifying to be able to announce that our progressive business has again enabled us to extend our premises. Established in the year 1836 by the founder of the firm, the late James Carter, at 237, High Holborn, it became necessary in course of time to provide enlarged premises to keep pace with the then extending business, when a capacious warehouse was built on the South Side of High Holborn. Towards the close of the last century the commodious block at No. 97, High Holborn, on the North Side, was taken over by our Firm, the frontage of which will be familiar to many of our Customers. Now again the exigencies of an increasing business have rendered it necessary to make greater provision still, and the restriction of space in the centre of London has led us to erect specially designed buildings fitted with our own patent cleaning machinery at RAYNES PARK, in the South West of London. The specially designed buildings are surrounded by the necessary grounds to conduct our experimental work in selecting, standardising, and testing Seeds, which is such an essential part of our business.

We cannot issue this notice without adding an expression of our keen appreciation of the long-continued patronage of our customers and grateful thanks for their many recommendations, without which such an extension of our business could not have taken place.

JAMES CARTER & CO.

ON THE RAISING, GROWING, CLEANSING, AND TESTING OF SEEDS.

TESTING VARIOUS VARIETIES OF GRASS FOR LAWNS, PUTTING GREENS, &c.

The prominence we have given to our Trade Mark "Tested Seeds" over so long a period has repeatedly given rise to the question, "What do you mean by Tested Seeds?" Believing that the raising, growing, testing, &c., of Seeds will be a matter of interest to our Customers, we take this opportunity of giving an illustrated explanation of some of the methods that were employed leading up to the introduction to the gardening world of such well-known Peas as TELEPHONE, STRATAGEM, DAISY, MICHAELMAS, ANTICIPATION, MAYFLOWER, HARVESTMAN, INTERNATIONAL, QUITE CONTENT, &c., &c, a process which frequently involves seven to eight years of patient observation and labour before a new introduction can be placed with confidence before the attention of our Customers.

We have selected culinary Peas as our illustration because they are more easily identified in a photograph. but analogous methods have to be pursued in the improvement of all varieties of Vegetables and Flowers, a work which we have made—and still continue to make—a special feature of our business. Indeed, it is now a matter of history that our House has been responsible for some of the most important improvements in Vegetables and Flowers far too numerous to mention here.

Let us assume that one of our Experts has observed a promising seedling, produced from cross-fertilisation the previous year in our experimental grounds: its merits and characteristics are carefully noted in our Garden Registers. Possibly it may produce an extraordinarily large pod, like QUITE CONTENT, or it may be earlier, later, taller, more prolific and compact, &c., than any other variety shown in our comparative trials to be in commerce.

The produce of the plant is then carefully harvested and sown the following spring, when it again goes through the same routine, may be for six or seven years, to secure constancy and fixation of its special characteristics; the produce by this time may have increased to several bushels, when it is ready to be sown for a crop. Ground that is particularly suited to the variety is carefully selected, and the Seed is sown. In the early summer, when the plants are in maturity, our Experts, who have watched the character of the Pea ever since it was a seedling in our experimental grounds, examine every plant, eliminating any that show a weakness or lack of uniformity; the crop is then harvested, stacked, and threshed, and eventually comes to our warehouse to be cleaned, hand-picked, and finally tested for germination. The subsequent processes of testing we have pleasure in illustrating with notes on the next page.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

A view of some of our seventy-five Cleaning and Pea-picking Machines, all driven by electric motors.

Number ten is familiarly called in our warehouse the "Dreadnought," and stands sixteen feet in height.

No weed, however nimble, or light seed can possibly escape its vigilance; it is fed by an electric elevator, and its duties are exacting.

In the first instance the seed travels into a large drum at the top of the machine, and is brushed by rapidly revolving specially prepared lambs' skins, all small portions of husk and earth that may adhere to the seeds at the time of harvesting being removed. The Seed then descends by gravitation (when all dirt, dust, and light seeds are drawn away by forced draught) on to sieves which, by an eccentric movement, take out all the "smalls." The whole combination is driven by a powerful electric motor, which also gathers the dust from and around the machine by suction, ready to be carted away and destroyed.

The Peas are now cleaned and graded, but some are stained or injured by inclement weather or by the attacks of insects, which probably weakens their germination; these must be picked out by hand.

PICKING PEAS BY HAND.

Vaxters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

1ST TEST.—Peas germinating on warm moist felt.

2ND TEST.—Peas being germinated in mould.

Peas placed for testing germination on fibre.

THE LAST TEST.—Growing to maturity in our experimental gardens.

The founder of our Firm, JAMES CARTER, was, we believe, the first to guarantee the germination of his Garden Seeds seventy-five years ago; the practice as amplified in the following illustration is still conducted annually by our Firm.

Peas growing at the same time as our Customers grow them, to full maturity, so that we may assure ourselves of the quality and trueness of each variety. By examining our trials from time to time we know exactly how the produce of our Seeds should appear in the gardens of our Customers all over the World, making allowances for the various climates, and by the aid of our comparative tests (we try all British and Continental Seeds of repute) we assure ourselves that our Customers are growing "the best and only the best" and "Tested."

CARTERS CRIMSON BALL BEET.

A Round Summer Variety.

**We were awarded
the First Class
Certificate, R.H.S.,
for this fine Beet.**

The Roots are ready for use in the Summer Salads.

Carters Crimson Ball (*see Photograph*).—Round Beets are of the greatest value on account of earliness. The roots can be lifted during the height of the summer season when salads are in demand; and the fresh taste imparted by the highly-coloured slices are considered preferable to those from stored roots. The old-fashioned flat types were never in favour with cooks, because of their weak colour and stringy texture. In Carters *Crimson Ball* these defects have been remedied. 29 First Prizes reported last season.

Price **1s.** and **6d.** per packet; **1s. 6d.** per ounce.

Fine specimens of this variety were exhibited in several Gold Medal Collections during the past season.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

James Carter & Co.

Copyright

Carters Perfection (*see Photograph*).—We have again re-selected our *Perfection* Beet, which is now a perfect and refined root. The best long Beet in cultivation; medium size, rich crimson lake colour, and splendid flavour; foliage shining and dark. Pronounced by the Royal Horticultural Society to be “perfection,” and awarded First Prize at the Great Autumn Vegetable Exhibition, 1905.

27 First Prizes reported last season.

Price **1s.** and **6d.** per packet; **1s. 6d.** per ounce.

BEET.—*Continued.*

Carters Dainty.—This is a small growing variety of more than ordinary merit, having long slender roots of a splendid deep crimson colour, and of the finest flavour possible: in naming it *Dainty*, we wish to convey the extremely refined quality of this variety; it does not attain to the size of our *Perfection* (see page 7).

Price **1s. 6d.** per ounce; **6d.** and **1s.** per packet.

Ornamental Foliaged Beet.—An interesting species for decoration in the flower garden. The thick fleshy ribs are beautifully coloured either yellow, crimson, cream, or white, and the contrast with the shining green leafage is very effective.

Price **6d.** and **1s.** per packet.

Groton-leaved Beet.—A decided acquisition to the group of decorative Beets, the long, narrow, crimson-bronze leaves having an elegant appearance. For the ribbon border, or as a pot plant for table decoration, it is effective. The roots are edible.

Price **6d.** and **1s.** per packet.

Seakale Beet.—An improved type of a delicious vegetable, in reality a Beet in which cultivation has developed the leaves instead of the root. It is sown at the same season as Beetroot in April, in rows about 18 inches apart, and the plants thinned out to 15 inches apart. At the end of summer they may be lifted as required, the green portion of the leaves cut off and the fleshy stems boiled and served with sauce, like Seakale.

Price **6d.** and **1s.** per packet.

The Cultivation of Beet.—The round varieties required for early use should be sown under cover in February. The main crop should be sown the last week in April on ground that has been well trenched and manured. Let the rows be about 18 inches apart, thin them to allow about 9 inches between the plants, and keep the soil well-stirred with the hoe during summer.

CARTERS LEVIATHAN BROAD BEAN.

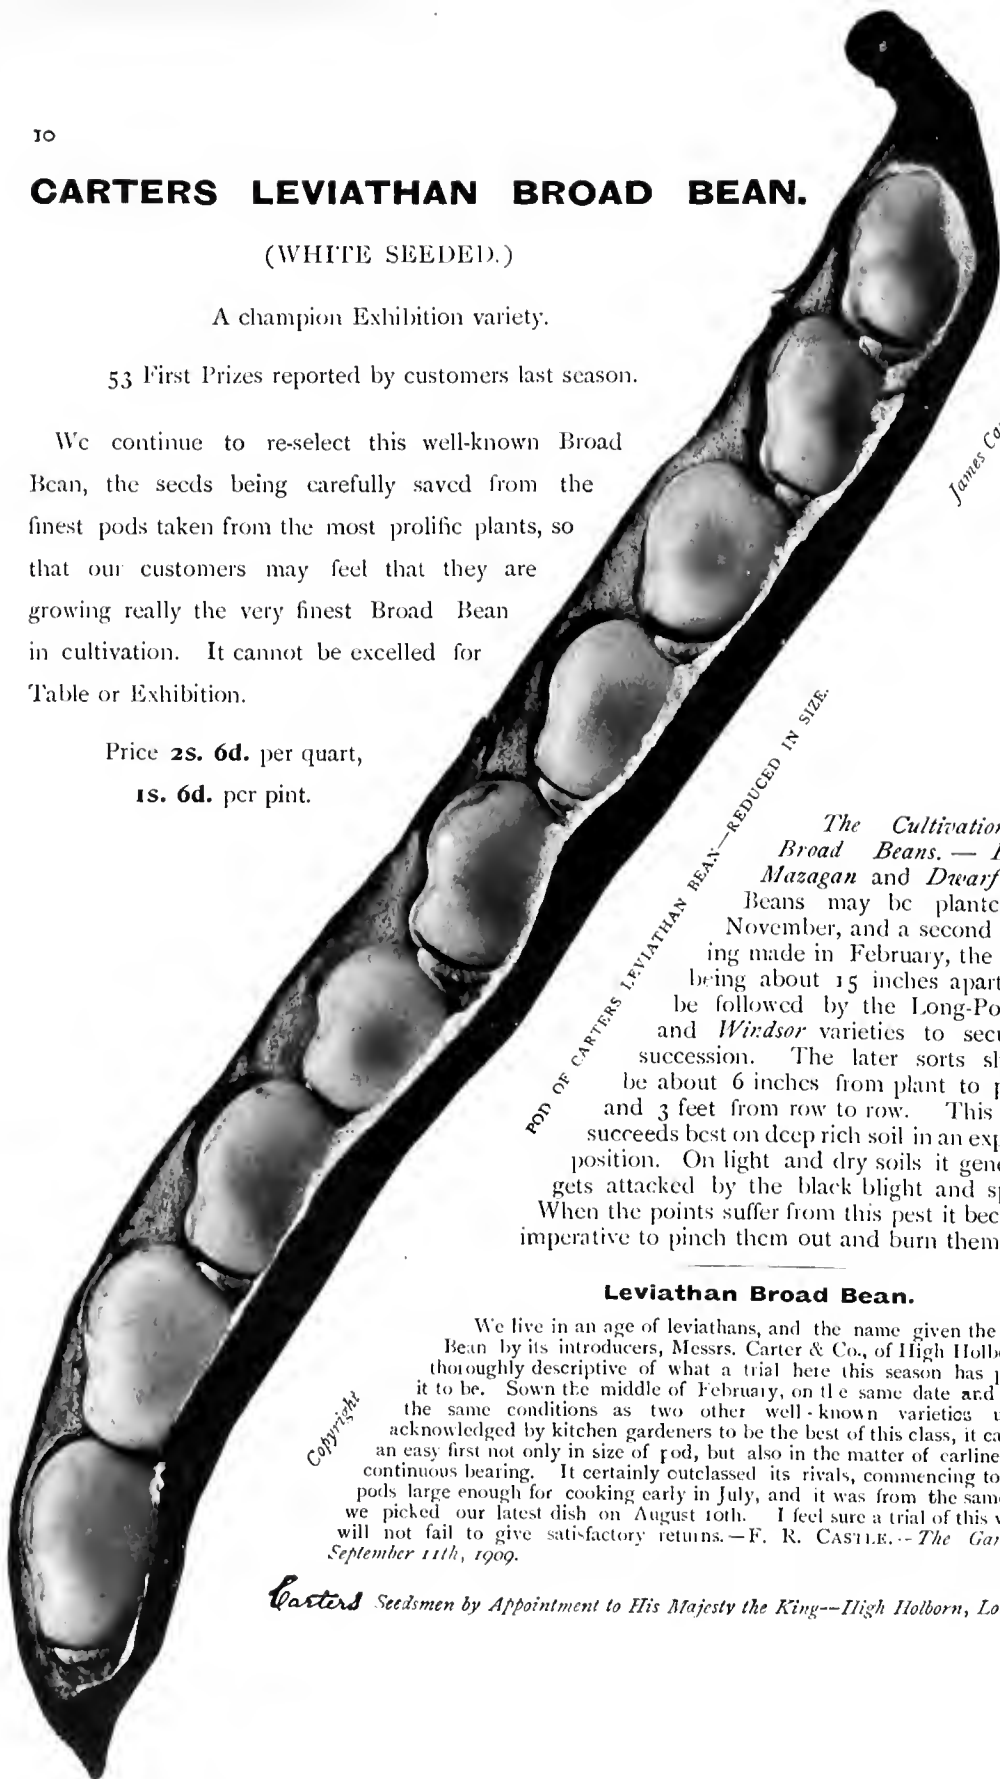

(WHITE SEEDED.)

A champion Exhibition variety.

53 First Prizes reported by customers last season.

We continue to re-select this well-known Broad Bean, the seeds being carefully saved from the finest pods taken from the most prolific plants, so that our customers may feel that they are growing really the very finest Broad Bean in cultivation. It cannot be excelled for Table or Exhibition.

Price **2s. 6d.** per quart,
1s. 6d. per pint.

James Carter & Co.

POD OF CARTERS LEVIATHAN BEAN—REDUCED IN SIZE.

The Cultivation of Broad Beans.—Early Mazagan and Dwarf Fan Beans may be planted in November, and a second sowing made in February, the rows being about 15 inches apart; to be followed by the Long-Podded and Windsor varieties to secure a succession. The later sorts should be about 6 inches from plant to plant, and 3 feet from row to row. This crop succeeds best on deep rich soil in an exposed position. On light and dry soils it generally gets attacked by the black blight and spoils. When the points suffer from this pest it becomes imperative to pinch them out and burn them.

Leviathan Broad Bean.

We live in an age of leviathans, and the name given the above Bean by its introducers, Messrs. Carter & Co., of High Holborn, is thoroughly descriptive of what a trial here this season has proved it to be. Sown the middle of February, on the same date and under the same conditions as two other well-known varieties usually acknowledged by kitchen gardeners to be the best of this class, it came in an easy first not only in size of pod, but also in the matter of earliness and continuous bearing. It certainly outclassed its rivals, commencing to yield pods large enough for cooking early in July, and it was from the same row we picked our latest dish on August 10th. I feel sure a trial of this variety will not fail to give satisfactory returns.—F. R. CASTLE.—*The Gardener*, September 11th, 1909.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

BROAD BEANS.—Continued.

Carters Green Leviathan (Green Seeded).

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley, says:—"Pods of great length, and one of the best of the long pod section; good crop."

We introduced this fine Bean as a fitting companion to its prototype, Carters *Leviathan* (White Seeded). When we state that the Bean we now offer carries pods of equally enormous proportions, and has the additional advantage of a beautiful green colour which is retained when cooked, its merits will be at once recognised. Its flavour is most mellow and delicious.

Price 2s. 6d. per quart, 1s. 6d. per pint.

GREEN-SEEDED VARIETIES.

CARTERS JULY CLIMBING FRENCH BEAN WITH STRINGLESS PODS.

We had the pleasure to bring to the notice of our customers a climbing stringless variety, which we strongly recommended, and we have no reason to alter the opinion expressed last year. It bears round pods so freely produced that we have counted as many as forty on a stalk. It holds well to the sticks and is the earliest Bean we know.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley, says:—"Carters *July Climbing French Bean*. Flower white, height 3 feet, foliage dark green; pods long, thin, straight, averaging 6 inches in length, usually in pairs; good crop; pods stringless."

"An early fruiting Climbing French Bean. The pods are thick, medium sized, and very like the excellent Butter Beans in form. Not in July alone, but it keeps on fruiting over quite a long season, and is as good now in September as it was at first. The actual bean is very small, and the pods keep tender longer than any variety I have tried."—Mr. J. C. TALLACK, Head Gardener to E. M. MUNDY, Esq., Shipley Hall.

Price 2s. 6d. per quart; 1s. 6d. per pint.

CARTERS CLIMBING FRENCH BEAN SUCCESSOR.

A large-podded Climbing French Bean, selected from our *Ten Weeks*. It is superior to that variety as the pods are almost half as long again, and very delicate eating. It comes in after our *July Climbing*, hence the name *Successor*.

Price 2s. 6d. per quart; 1s. 6d. per pint.

Ordinary Climbing French Beans, 2s. per quart.

Carters Re-selected Climbing French Beans. A highly selected stock; being more prolific, and of very robust habit. Price 2s. 6d. per quart; 1s. 6d. per pint.

Carters *Ten-weeks* Climbing French Beans. Price 2s. 6d. per quart; 1s. 6d. per pint.

Hints on Culture.—Sow in pots under glass wherever wanted, transplant in prepared beds for training, or grow on in larger pots. For outdoor culture they must not be sown until May is well in—very similar to Scarlet Runners, only that they do not grow quite so robust and do not need such tall stakes.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS NEW OFFICES—RAYNES PARK, LONDON, S.W.

Garden Registers, Stock Hooks, &c., on the way to the Fire-proof Strong Room

CARTERS PERPETUAL DWARF FRENCH BEAN.

AWARD OF MERIT R.H.S., 1908.

For the purpose of showing the extraordinary prolific habit of this new introduction we had the leaves removed from a plant before photographing.

This remarkable bean is strongly recommended as being in every way a great acquisition; it is of very compact growth, the foliage of an attractive dark green, and the pods are of medium size; the most important feature is the prolonged period this variety continues to bear. Pods were picked at our trial grounds earlier than other varieties, and young tender beans were gathered after most other sorts were quite finished.

We exhibited about 50 pots of French Beans at the early August meeting of the R.H.S., the most favourably discussed variety being Carters Perpetual shown under Seedling No. 249.

The Right Hon. Viscount Midleton's Head Gardener says: "New Seedling Dwarf Bean No. 249. This variety had extra strong haulm, very dark green, pods long, thin, very straight, and a very heavy cropper."—Mr. QUANTON, The Gardens, Peper Harrow Park, Godalming.

Price 2s. 6d. per pint; 1s. per packet.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

DWARF FRENCH BEANS.

Carters Stringless Dwarf French Bean, Holborn Wonder.—The great success which has attended our introduction of the first stringless Green-podded Bean, Carters *Canadian Glory*, has encouraged us to pursue our efforts in selecting stringless Beans for general use. Our *Holborn Wonder* will be found to be free from threads, is quite distinct and very prolific, and we confidently recommend it.

Price 3s. 6d. per quart, 2s. per pint, 1s. per packet.

Carters Stringless Dwarf French Bean, Canadian Glory.—An *Extra Early* Dwarf Green-podded French Bean, possessing the invaluable quality of bearing pods absolutely without strings or threads. It is equally valuable eaten as a *Flageolet* or *Haricot*, as on the Continent.

Price 3s. 6d. per quart, 2s. per pint, 1s. per packet.

Carters Canadian Wonder.—We were one of the first to make the merits of this fine dwarf Bean known, and its popularity to-day is probably unequalled. Our stock is the finest obtainable, and produces an abundance of very long fleshy pods, making it a great favourite both for table and exhibition.

27 First Prizes reported by Customers last year.

Price 2s. per quart, 1s. 3d. per pint.

Carters Longsword.—This is a variety which we can recommend either for forcing or for general use. It is very prolific and early, pods of good length, and of very delicate texture.

Price 2s. per quart, 1s. 3d. per pint.

SCARLET RUNNER,**

With Pods 15½ inches in length.

See pages 1 and 19.

Copyright James Carter & Co.

CARTERS ELEPHANT RUNNER.

Showing type of fruiting cluster. Reduced in size.

The Cultivation of Runner Beans.—Runner Beans should be planted out of doors during May, followed by successional sowings at intervals of a fortnight; by this means an abundant supply is provided until the plants are destroyed by the autumn frosts. Care should be taken when planting that sufficient space is allowed between the rows (say 3 feet), and 12 inches from plant to plant in the rows, and the plants should be well watered in dry weather or the flowers will drop off. If slugs are troublesome during the young stage of growth, dust over with soot and lime.

Carters Elephant Runner (*see Photograph*).

—A large handsome type with fleshy pods, very long, and borne in the greatest profusion; very popular.

Price **3s.** per quart; **1s. 9d.** per pint.

CARTERS SCARLET EMPEROR

THE LONG SMOOTH-

337 First Prizes reported by Customers throughout the country.

CARTERS *Scarlet Emperor* has fully maintained its great reputation; one enthusiastic gardener shows it to a neighbour and so its popularity increases each season, and our sales of this striking novelty have more than doubled each year. From our observations and the reports that we have received *Carters Scarlet Emperor* has been well represented and much discussed at exhibitions all over Great Britain.

Not only is this Bean of the utmost importance as a prize winner, but its smooth and tender texture places it far above all other scarlet runners. Its large, handsome pods, often measuring $15\frac{1}{2}$ inches, hang in great clusters, and it has been estimated that the produce from *Carters Scarlet Emperor* is twice as great in bulk as may be expected from the ordinary type of scarlet runner, and all of the most refined quality.

We respectfully thank our Customers for the many kind letters of appreciation and reports of prize exhibits sent to us last autumn. Our stock is again highly selected and grown under our personal supervision, and we would warn our customers against the many substitutions now on the market.

Price 4s. 6d. per quart; 2s. 6d. per pint; 1s. per packet.

His Grace The Duke of Portland's Head Gardener says:—"I have given an extended trial to *Carters Scarlet Emperor* this season, and I am pleased to say that it has more than ever borne out the good opinion I had of it last season. It is a splendid cropper, with long narrow pods, with a splendid dark green colour. It is so has much less of the coarse skin usual in Runner Beans."—MR. JAMES GIBSON, The Gardens, Welbeck.

His Grace The Duke of Buccleuch's Head Gardener says:—"Carters *Scarlet Emperor* Bean is a strong grower, flowers very freely, and is promising well."—MR. WHYTOCK, The Gardens, Dalkeith.

His Grace The Duke of Leeds' Head Gardener writes:—"Scarlet Emperor Runner Bean gave great satisfaction. It is a splendid Bean, and one of the first ready with us this year, and now (Oct. 19th), as I just looked through them, found a nice lot of good Beans fit for use."—MR. J. NICOL, Hornby Castle Gardens, Bedale.

The Right Hon. The Earl of Eldon's Head Gardener says:—"I am more than pleased with your *Scarlet Emperor* Bean. I never saw anything like it before, it is exactly as you describe it in your catalogue."—MR. J. KING, The Gardens, Shirley Park.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

RUNNER BEAN.

PODDED SCARLET RUNNER.

19

The Right Hon. The Earl of Jersey's Head Gardener says:—"Your *Scarlet Emperor* Runner Beans have done splendid. I have never seen any to equal them in height or size of pods; the best I know."—Mr. A. W. PERRY, The Gardens, Middleton Park, Bicest r.

The Right Hon. The Earl of Lathom's Head Gardener says:—"Carters *Scarlet Emperor* Runner Beans are the most refined Bean for exhibition with which I am acquainted."—Mr. BEN ASHTON, The Gardens, Lathom House.

The Right Hon. The Earl of Sandwich's Head Gardener says:—" *Scarlet Emperor* has been magnificent, I gathered beans 12 inches long under ordinary treatment."—Mr. HANSFORD, The Gardens, Hooke Court, Beaminster.

The Right Hon. Lord Middleton's Head Gardener writes:—" *Scarlet Emperor* Runner has done exceedingly well; a heavy crop of very fine pods."—Mr. J. ANDERSON, Birdsall House Gardens, Yorks.

The Right Hon. Lord Poltimore's Head Gardener says:—"As good as ever, one may safely say the very finest Bean in cultivation."—Mr. SLADE, The Gardens, Poltimore, Exeter.

The Right Hon. Viscount Midleton's Head Gardener says:—" *Scarlet Emperor* Runner Bean. This variety has done wonderfully well again this year, and although such an adverse season, it has set better than ever, having very fine large clusters, with long, straight, handsome pods, measuring over 12 inches. For the exhibition stand it cannot be excelled, and should rank in the estimation of those who have come in contact with it as the finest bean in cultivation."—Mr. QUAINTON, The Gardens, Peper Harrow Park, Godalming.

The Right Hon. Viscount Portman's Head Gardener says:—"Without doubt the finest Runner Bean ever introduced. It is a prodigious cropper, having straight pods from 12 to 15 inches in length, produced in abundance on each raceme."—Mr. PRINSEP, The Gardens, Buxted Park.

Sir Edmund Loder, Bart.'s Head Gardener says:—"A very fine variety which bears most profusely, and quite the finest Runner Bean. I have measured plenty 12 inches in length on stalks bearing a dozen beans. What would they be if thinned."—Mr. W. A. COOK, The Gardens, Leonardlee.

Sir Henry D. Ingleby, Bart.'s Head Gardener writes:—"Your *Scarlet Emperor* Runner Bean has done wonderfully well with me; it is very free setting and a good cropper. I have had a quantity of pods 14 and 15 inches long, and they have been quite tender right up to the last."—Mr. H. FOX, The Gardens Ripley Castle, Yorks.

Admiral Walker's Head Gardener writes:—"Your Runner Bean, *Scarlet Emperor*, is indeed an 'eye opener.' It was admired by all who saw it here, the attraction being the length of the pods, which were from 10 to 14 inches long, in bunches of six to eight pods, even in growth, good in colour, with a smoothness and an absence of curled-up pods not found in other sorts. Another recommendation is its long season in growth, I made my first gathering in July, and to-day (Oct. 19th) I gathered fine tender pods, when other sorts had finished a fortnight ago grown under the same conditions."—Mr. G. DAVISON, Beverley Hall Gardens, Yorks.

Carters Address for all Correspondence, KILYNES PARK, LONDON, S.W.—1911.

CARTERS "RED GIANT" RUNNER BEAN.

THE LARGEST AND LONGEST PODED RUNNER BEAN.

The largest giant podded Runner Bean ever introduced. This grand variety was offered by us two years ago as being even longer podded than our famous *Scarlet Emperor*; in consequence we had a great demand, and below we give a few of the opinions sent to us from various parts of the country. We are confident that, once grown, other varieties will speedily be displaced, as *Red Giant* is not only the largest podded but also the most prolific and early variety in commerce. We must, however, point out that it is not quite so smooth skinned as our *Scarlet Emperor*.

Price 3s. per pint, 1s. per packet.

The Right Hon. The Earl of Galloway's Head Gardener says:—"Runner Bean, Carters *Red Giant*. This undoubtedly will prove to be an advance upon existing varieties. Sown in the open the produce was gathered the middle of August. Without special culture many of the pods were 10 inches in length, were straight and slender and rough to the touch, so characteristic of quality and fine appearance."—Mr. JAMES DAY, The Gardens, Garlieston, Wigtonshire.

The Right Hon. The Earl of Jersey's Head Gardener says:—"Runner Bean *Red Giant*. A wonderful fine bean, fine long pods which grow in very large clusters. I think will make a good show bean, being a lovely colour and growing so quickly and so straight. It has been thought a lot of here by all who have seen it. I intend growing more of it next year than this, as I consider it the best bean out at the present time. I think it has a grand future in front of it."—Mr. A. W. PERRY, The Gardens, Middleton Park, Bicester, Oxon.

The Right Hon. The Earl of Mansfield's Head Gardener says:—"Red Giant Scarlet Runner Bean. This is a fine bean, has done exceedingly well here, of enormous size and free bearing, and first-class quality."—Mr. W. WARD, The Gardens, Ken Wood, Hampstead.

The Right Hon. The Earl of Onslow's Head Gardener says:—"Carters *Red Giant*. I consider this bean equal to anything on the market. It produces handsome pods fit for exhibition, is a very heavy cropper, and its table qualities are first class."—Mr. H. W. BLAKE, The Gardens, Clandon Park, Guildford.

The Right Hon. The Earl of Sandwich's Head Gardener says:—"A prodigious cropper, good dark green pods from 12 to 14 inches in length. I have never seen any to equal them; a good exhibition bean."—Mr. F. HANSFORD, The Gardens, Hooke Court, Beaminstor, Dorset.

The Right Hon. Viscount Midleton's Head Gardener says:—"Red Giant Runner Bean. This fine Runner Bean has again this season proved its worth and kept its already high standard as a very fine setter and heavy cropper. The clusters have been very large and pods handsome, being very straight, many measuring 14 inches long. It is much larger than *Scarlet Emperor* and the tenderness of the pods is most noticeable, and I have no hesitation in saying that it is a most remarkable bean of recent introduction."—Mr. QUAINTON, The Gardens, Peper Harrow Park, Godalming.

Lady Wantage's Head Gardener says:—"Red Giant Runner Bean is conspicuous under ordinary cultivation amongst the best known varieties, including *Scarlet Emperor*, with pods 13 and 14 inches long; to all appearance seedless and as brittle as ice."—Mr. Wm. FIFE, The Gardens, Lockinge Park, Wantage, Berks.

The Right Hon. W. H. Long's Head Gardener says:—"In Carters *Red Giant* there is an advance hitherto unattained in beans, both in regard to size of pod and attendant freedom. It is without doubt the exhibitor's 'stand by.'"—Mr. W. STRUGNELL, The Gardens, Rood Ashton, Trowbridge.

Sir Edmund Loder's Head Gardener says:—"Carters *Red Giant* Runner Bean has proved all I said of it last year, and this season it has been really better than last year, and it is becoming a popular favourite with all who grow for exhibition and require a good basket-filling bean at home."—Mr. W. A. COOK, The Gardens, Leonardslee, Horsham.

Sir Charles E. Hamilton's Head Gardener says:—"Carters *Red Giant* Runner Bean. This bean is most prolific and of strong constitution. The flavour and tenderness of the pods are unequalled. It is a most suitable variety to grow for exhibition work."—Mr. T. A. BIRKINSHAW, The Gardens, Hatley Park, Sandy, Beds.

Admiral Brand's Head Gardener says:—"Having grown your *Emperor* for several seasons, I considered I had the best on the market, but *Red Giant* goes one better. It is a strong grower, very free in bunching, and the crop averaging 1 foot in length with many individual pods 15 inches; this without in any way thinning the crop. It is truly a marvel, pods as straight as a rule, a fine bean for the exhibition table."—Mr. W. BACK, The Gardens, Glynde Place, Lewes, Sussex.

RUSSIAN KALE.

CARTERS RUSSIAN KALE (*Chou de Russie*).

By kind permission of "Gardeners' Chronicle."

Award of Merit and First Class Certificate after trial at Wisley, March 19th, 1907.

The only novel variety of Kale in the trial considered worthy of the award. No other Kale in the whole trial of 54 stocks received the First Class Certificate.

This distinct and extremely hardy variety stood the exceptionally severe winter better than any other variety grown; the leaves are very curious, in form somewhat resembling a deer's antler, of singularly thick substance, and of a peculiarly green colour.

When cooked this is the most delicious variety of Kale which we have ever tried, the young shoots especially being particularly delicate in flavour. Our opinion is endorsed by a well-known writer in the *Gardeners' Chronicle* who says: "I have had the pleasure of tasting its sprouts cooked, and can verify the opinion passed upon it. It is exceptionally good."

The Right Hon. Viscount Middleton's Head Gardener says:—"Foliage of a dark green nature, short and sturdy, producing large quantities of sprouts, when cooked are delicious. It stands the winter better than most of the better known kales, and should be grown everywhere."—Mr. QUANTON, The Gardens, Peper Harrow Park, Godalming.

Price 1s. and 1s. 6d per packet.

Monthly Operations in the Garden, with Hints on the Cultivation of the Principal Flowers and Vegetables. Post Free, 6d.

James Carter & Co.

CARTERS HALF TALL SCOTCH KALE.

Carters Dwarf Extra Curled Kale (*see Photograph*).—Award of Merit, R.H.S., 1907, after trial at Wisley. A re-selected and crested form of the Early Kale so popular in the North. It will resist the most intense frost, and makes a delicious winter dish.

Price 1s. and 6d. per packet;
1s. 6d. per ounce.

Carters Half Tall Scotch Kale (*see Photograph*).—A fitting companion to our well-known *Dwarf Extra Curled* type. The leaves are very dense and moss curled. Stands the coldest weather, and the greater the frost the more delicate the leaves eat. If the leaves at the top are cut during the early part of the winter, it will greatly encourage the growth of the young shoots upon the stem.

Price 1s. per ounce;
6d. per packet.

Carters Mammoth Tall Scotch Kale.—A very robust variety, suitable for large establishments where quantities of winter green-stuffs are needed.

Price 1s. per ounce;
6d. per packet.

Carters Welsh Kale.—A hardy variety of very handsome appearance; of medium height, the leaves are long and densely curled, but are more narrow than our *Half Tall Scotch* variety. The flavour is particularly good.

Price 1s. per packet.

Carters Improved Garnishing Kale.—This is not only a valuable winter vegetable, but also produces a variety of distinct and beautiful shades of colour in its variously tinted leaves that are useful for many decorative purposes.

Price 1s. and 6d. per packet;
1s. 6d. per ounce.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

BORECOLE or KALE. — *Continued.*

CARTERS DRUMHEAD KALE.

We received an Award of Merit from the Royal Horticultural Society for this Kale.

Carters Drumhead Kale.—A valuable winter vegetable with a solid cabbage-like head. Quite delicious when cooked. (*See Photograph.*)

"Quite distinct from any other Kale here. The leaves are broad and it is now hearing like a *Drumhead* Cabbage."—Mr. J. WHYROCK, Head Gardener to His Grace the Duke of Buccleuch.

"This is a delicious looking Kale which makes a good head, and is as delicious when cooked as it looks while growing."—Mr. W. A. COOK, Head Gardener to Sir Edmund Loder, Bart.

Price 1s. and 6d. per packet, 1s. 6d. per ounce.

Carters Purple Plume Kale.—Leaves of a rich purple, very tall and handsome; a useful vegetable as a winter dish or for garnishing.

Price 1s. and 6d. per packet; 1s. 6d. per ounce.

Asparagus Kale.—The long thin shoots produced on the plant in early spring make a delicious dish.

Price 6d. and 1s. per packet.

Cottager's Kale.—Very hardy, of tall robust growth, throws a great profusion of side shoots, of splendid quality. Award of Merit, R.H.S., March, 1907

	Per oz.—s. d.
...per packet	3d. & 6d. 0 10
CARTERS CURLED.—Dwarf; superbly curled	3d. & 6d. 0 9
CARTERS TALL GREEN CURLED. Densely curled	3d. & 6d. 0 8
DWARF GREEN CURLED.—For general use	3d. & 6d. 0 8
IMPERIAL HEARTING.—Hardy, with compact heads	3d. & 6d. 0 9
JERSEY TREE.—Tall and curious, with stems of such toughness that in Jersey they are often made into walking sticks	per packet 3d. 0 6
TALL PURPLE CURLED.—Prettily curled and of rich colour	3d. 0 6
THOUSAND HEADED.—Loose headed; great profusion of leaves	0 4

The Cultivation of Kale.—Sow the seed in March for early winter crop, and again in April for main winter crop. Transplant as soon as ready in summer, about 2 feet apart, into good soil, made firm and highly manured.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS NEW OFFICES.

110 FEET × 320 FEET.

RAYNES PARK, LONDON.

SOME PROPORTIONS OF EAST ELEVATION.

The Turret Clock Dial is 5 feet in diameter, strikes the hours on a bell that weighs 10 cwts., and is electrically illuminated at night.

The Royal Arms are of copper and are 7 feet in height, and stand out 6 feet from the building.

The Portland Stone Columns are 14 feet in height and 6 feet 4 inches in circumference

The white Marble Lions are carved out of solid blocks, are 7 feet high, and each weigh 25 cwts.

The Steps are 26 feet in width.

The Union Jack is 5 yards long.

The Buildings when complete will cover about $2\frac{1}{2}$ acres.

BROCCOLI.

James Carter & Co.

CARTERS AUTUMN.

FOR CUTTING FROM SEPTEMBER TO DECEMBER.

Carters Autumn (*see Photograph*).—The earliest white close-headed variety. Comes in after early Cauliflower and before winter Broccoli.

Price **1s. 6d.** and **2s. 6d.** per packet.

		Per oz.	
		<i>s.</i>	<i>d.</i>
GRANGE'S AUTUMN WHITE.—Good solid heads of fine appearance	per packet, 6d. & 1s.	1	6
VEITCH'S SELF-PROTECTING.—Early variety, with good hearting quality	,, 6d. & 1s.	1	9
WALCHEREN.—One of the earliest; fine heads	,, 6d. & 1s.	1	6

The Cultivation of Broccoli.—For the earliest crop a sowing is requisite the beginning of March, and a little protection may be necessary for the seed-beds. Successional sowings should follow up to June. Prick out into a prepared bed when strong enough, and when thoroughly established in summer transplant to permanent quarters, the earliest kinds first, to produce a constant supply of heads, according to the variety, until Cauliflowers are ready in July the following season. The soil should be deeply dug, well manured, and in good tilth and firm before transplanting.

“I am pleased to inform you that I took fourteen first prizes and six second prizes at Llanvaphy and District Horticultural Society Show with vegetables grown from your seed that you supplied me with last spring.”—
 Mr. W. F. WILLIAMS, Upper House, near Abergavenny.

“Mrs. Brown was very pleased with the seeds she had in the spring. Her gardener took a prize (first) for a collection of six vegetables and the Sweet Peas have been beautiful and are still plentiful (2/10/09).”—
 Mrs. BROWN, Mundham House, Chichester.

CARTERS SANDRINGHAM.

FOR CUTTING FROM JANUARY TO APRIL.

Carters Sandringham Winter White (*see Photograph*).—A choice re-selected stock of Snow's Broccoli, which we strongly recommend to our customers. The heads, which attain a good size, are of a very compact growth and beautifully white. Price **1s.**, **1s. 6d.**, and **2s. 6d.** per packet.

Carters Mammoth Spring White.—We have no hesitation in saying that this is one of the largest as well as the best varieties grown, and attains greater popularity each season. The heads are snow-white and of the finest texture. Price **1s.** and **1s. 6d.** per packet; **2s. 6d.** per ounce.

Carters Improved Early Purple Sprouting.—This variety is fit considerably earlier than the Purple Sprouting generally grown, and throws up a great profusion of Sprouts. Price **1s.** per packet; **1s. 6d.** per ounce.

Carters Pyramid.—So named on account of the pyramidal habit it assumes; the large heads of purple sprouting growth giving it a pleasing appearance. Very hardy and vigorous. Price **1s.** and **1s. 6d.** per pkt.

Snow's Winter White.—A valuable midwinter variety, very constant excepting when the season runs out of its usual character, when the head may be later in reaching maturity. Price **1s.** and **1s. 6d.** per packet; **2s. 6d.** per ounce.

Carters Winter.—This will be found one of the most reliable varieties; good solid heads. Price **1s.** and **1s. 6d.** per packet; **2s. 6d.** per ounce.

	Per oz.—s. d.
ADAMS' EARLY WHITE.—Produces fine heads, pure, compact and firm	per packet, 6d. 0 10

BRUSSELS SPROUTS.

CARTERS HOLBORN EXHIBITION BRUSSELS SPROUTS.

Carters

Holborn Exhibition Brussels Sprouts.

(See Photograph.)

A very fine strain, the result of many years' careful selection. Its points for size, colour, and productiveness are good all round. Besides being largely grown in private gardens, it is a special favourite with many of our best known market growers. It is of medium height with large solid sprouts.

Price 1s. and 6d. per packet;
1s. 9d. per ounce.

THE ROYAL HORTICULTURAL SOCIETY'S report of last season reads:—"Carters *New Exhibition*. Plants 2 feet high, sturdy, producing a mass of medium sized hard sprouts from base to crown."

"I find your *Beefheart* Cabbage excellent. I sowed some last August and I have been getting large firm Cabbage from it for the last three weeks."
—G. MALLOCK, Esq., Inch Kenneth, Gruline, Oban, N.B.—*June 23rd, 1909.*

"All the Flowers and Vegetables raised by me from your seeds were admired by everyone who saw them at our Annual Flower Show, held in Lord Lytton's Park, Knebworth. I swept the board and again won the Knebworth Flower Show Challenge Cup."—Mr. FRANK WELLARD, Rosyth, Milestone Road, Knebworth.—*August 10th, 1909.*

CARTERS PERFECTION BRUSSELS SPROUTS.

The Cultivation of Brussels Sprouts.—Sow the seed early in March for first crop, and again late in April for succession, transplant in summer into good ground made thoroughly firm, when the plants are large enough to handle, and keep stirred with the hoe through the dry weather. The Sprouts are fit for gathering after they have been under the influence of a hard frost, which makes them tender eating. Some growers make a sowing in August to get early sprouts.

Carters Address for all
Correspondence, RAYNES PARK, LONDON, S.W.—1911.

Carters Perfection Brussels Sprouts.

(See Photograph.)

A standard variety for general use, producing large and firm sprouts in great abundance. As a late Sprout it is much appreciated. It is a taller growing variety than our Exhibition strain.

Price 6d. and 1s. per packet;
1s. 9d. per ounce.

Aigburth.—Medium height; Sprouts of good size and colour.

1s. per ounce; 3d. and 6d. per packet.

Fresh Imported.—Small, close, compact Sprouts.

8d. per ounce; 3d. and 6d. per packet.

Rosebery.—Large Sprouts; tall growing, and of good quality.

10d. per ounce; 3d. and 6d. per packet.

Scrymger's Giant.—Tall growing variety, producing Sprouts of good quality and large size.

10d. per ounce; 3d. and 6d. per packet.

Carters Mammoth Beefheart.—The largest Garden Cabbage grown. It is some years since we introduced this variety, but each season it becomes more popular, and we confidently recommend this highly selected strain as being not only the largest, but one with the least tendency to bolt. Sown in spring it gives enormously heavy heads during summer and autumn, or when sown in August fine heads may be expected in the late spring. It is much more robust and hardy than many of the small varieties now recommended for early summer use.

Price 6d. & 1s. per packet; 1s. 6d. per ounce.

110 FIRST PRIZES REPORTED TO US BY OUR CUSTOMERS.

COLLECTIONS OF CABBAGE SEED.

		<i>s. d.</i>
8 packets of Cabbage, in 8 finest sorts, for succession—our selection		2 0
4 packets of Cabbage, in 4 finest sorts, for succession—our selection		1 0
16 ounces of Cabbage, in 8 finest sorts, for succession—our selection		10 0
8 ounces of Cabbage, in 8 finest sorts, for succession—our selection		5 6

The Cultivation of Cabbage.—By a little careful arrangement Cabbages can be had almost all the year round. An early variety sown in the spring will come into use in the summer; a main crop variety sown in the spring will come in during summer or autumn. Sowings made during July of a quick variety like the *Colewort* will come into use during autumn, whilst sowings made towards the end of August will be fit for cutting in the spring. July sowings of a Cabbage intended for spring cutting often bolt, whereas the same variety sown at end of August stands well. Cabbages require a rich, deeply dug, and well-drained soil; when planted out they should stand 15 to 20 inches apart, according to habit and growth of the variety.

CARTERS GOLDEN BALL.

CARTERS EARLY SCARLET HORN.

CARTERS EARLY MARKET.

CARTERS IMPROVED HORN.

CARTERS LONG FORCING.

Carters Golden Ball.—A most distinct and very early variety, specially adapted for forcing and frame work. The roots are almost as round as a turnip, flavour excellent and melting. Awarded First Prize as the best early Carrot, R.H.S. Great Autumn Exhibition, 1905.

Price 6d. per packet; 1s. per ounce.

Carters Early Scarlet Horn.—A highly selected stock, of bright scarlet colour, one of the most useful in this section.

Price 6d. per packet; 1s. per ounce.

Carters Early Market.—Fine early variety of good colour, quick in growth, valuable alike for Market Gardeners or private use.

Price 6d. per packet; 1s. per ounce.

Carters Improved Early Horn.—A perfect type of stump-rooted Carrot, of excellent flavour.

Price 6d. per packet; 1s. per ounce.

Carters Long Forcing.—A handsome long Carrot, with the same depth of colour and firmness of texture in its earliest stages as other Carrots possess in their later growths.

Price 6d. per packet; 1s. per ounce.

CARTERS LONG FORCING CARROT.—“This forcing Carrot is one of the most distinct and valuable that we possess, and when better known it is sure to be extensively grown. It is the quickest variety that I know of, and makes but very little top, and the quality is excellent. As a Carrot coming into use early in the year, and for exhibition, it is an acquisition.”—E. B. in *Gardeners' Chronicle*.

CARTERS SUMMER FAVOURITE CARROT.

Carters Summer Favourite (see Photograph above).—Awarded Royal Horticultural Society's Silver Medal. A splendid half-long, producing handsome, well-grown, bright cochineal-scarlet Carrots very early in the season. The quality is superb, and as an exhibition variety coming into use early it will be found invaluable for showing in the summer months. 117 First Prizes reported to us during the past few seasons.

Price 6d. and 1s. per packet; 1s. 3d. per ounce.

Carters Scarlet Perfection.—Awarded a Special Certificate of Merit at the Vegetable Conference of the Royal Horticultural Society, and awarded First Prize, R.H.S. Great Autumn Exhibition, 1905. A distinct and greatly improved form of Garden Carrot. It is midway in length between the *Long Surrey* and the well-known *Intermediate*, with the bright scarlet colour of the *Surrey*. The flesh is solid, crisp, and fine flavoured. Invaluable alike for table, exhibition, and market purposes. 258 First Prizes reported by customers.

Price 6d. per packet; 1s. per ounce.

Carters Blood Red.—This Carrot is quite distinct, and has many good and new qualities. It has a depth of colour not hitherto seen in Carrots, the texture of its flesh, while solid and crisp, is most tender, and entirely loses the pithy heart found in many large-growing varieties. It has handsome long roots.

Price 6d. and 1s. per packet.

	Per oz.—s. d.
CARTERS SELECTED ALTRINCHAM.—Green-topped; highly-selected stock ...	per packet, 3d. & 6d. 0 8
CARTERS SELECTED INTERMEDIATE.—The best type of <i>Intermediate</i> ...	per packet, 3d. & 6d. 1 0

CARTERS LONG SCARLET.—Splendid long stock of good colour ...	per packet, 3d. & 6d. 0 8
CARTERS INTERMEDIATE.—Good colour and fine for keeping... per packet, 3d. 0 6
CARTERS LONG RED SURREY.—Re-selected stock of the longest carrot grown; does not, however, possess the quality of newer introductions like Red Elephant or Scarlet Perfection	per packet, 3d. & 6d. 1 0
CARTERS ORANGE GIANT.—Yellow carrot of large size per packet, 3d. 0 6
JAMES' SCARLET INTERMEDIATE	per packet, 3d. & 6d. 0 8
LONG SURREY.—Original stock	per packet, 3d. 0 6
SCARLET ALTRINCHAM	per packet, 3d. 0 6

The Cultivation of Carrot.—For early forcing sow in January in frames, in February on warm border. Make successional and main crop sowings during March and April in deep well-conditioned soil to which manure has not been recently applied. Cover the seed very lightly in $\frac{1}{2}$ -inch drills, and as soon as the plants are strong enough to handle, thin out from 4 to 9 inches, according to sort. Further sowings may be made up to the end of June.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

A veritable giant both in length and rotundity. Specimens have been exhibited at our establishment measuring two feet and a half in length (30 inches). It has been brought to this high standard of perfection by one of the best professional gardeners, from whom we originally acquired the whole stock. A remarkable variety, and one which has already become prominent in first-class gardens and on the exhibition table. Price 6d. and 1s. 3d. per packet; 1s. 3d. per ounce. 177 FIRST PRIZES REPORTED BY CUSTOMERS.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

CAULIFLOWER.—FIRST EARLY VARIETIES.

GREATLY REDUCED IN SIZE.

James Carter & Co.

NOVELTY.

Carters Forerunner Cauliflower.—The quickest cauliflower ever grown. Ten days earlier than others. Large white head, solid, and good size. Sow in middle of February, transplant when first leaves drop, under glass, plant in open ground end of April or beginning of May, and the first heads will be ready by the middle of June. The leaves protect the head from the summer sun.

Price 1s. 6d. and 2s. 6d. per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley, says:—“*Carters Early Forerunner*. A very early variety of dwarf, compact habit; sturdy, with rather small, solid, handsome, pure white heads.”

WHAT EXPERTS SAY ABOUT IT.

“*Carters Forerunner* Cauliflower was sown on February 1st with *Snowball* and another well-known early variety. Planted in the open the third week in April, we commenced to cut compact heads on June 7th. None of the other varieties were nearly ready. I am much impressed with it, and can congratulate you on it as distinct and valuable.” EDWIN BECKETT, Head Gardener to the Hon. Vicary Gibbs.

“I grew your new Cauliflower in frames along with *Snowball*, and grown thus it was 8 to 10 days earlier, a closer head, and in all respects a better form. A most valuable introduction. I had it also on early borders in the open.”—G. WYTHES, late Head Gardener to His Grace the Duke of Northumberland.

“*Carters Forerunner* Cauliflower is a marvel. I cut fine heads on June 6th, almost like *Autumn Giant*.”—MR. W. HEMPHREY, The Gardens, Lorpitts.

Carters Early Emperor.—A superb strain for the early summer. A giant Cauliflower for outdoor work, coming in midway between *Carters Forerunner* and *Carters Autumn Giant*.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

THE ROYAL HORTICULTURAL SOCIETY'S report reads:—“*Carters Early Emperor*. Plants dwarf, sturdy, with semi-protecting foliage; heads medium to large in size, firm, and of excellent shape.”

Carters Defiance Forcing.—For frame or pot culture. In perfection during early summer.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CELERY SEED FOR FLAVOURING SOUPS, per lb., 2s.

The Cultivation of Celery.—Sow in February on a mild hot-bed for earliest crop, to be pricked out on bottom heat when ready, and transferred to trenches in June. Sow in March in seed pans for main, and in April for late crop. The trenches should be bottomed with rich soil, and the plants liberally watered in August; earth up gradually during August and September, and commence lifting in November.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

FORCED HEADS OF CHICORY.

Copyright

J. C. & Co.

It is only on the Continent one can appreciate the delicate piquancy attached to salads, as they seem to understand them better than we do here. Chicory is a leading ingredient in French salads, and the plant is so easily cultivated that it should be more popular here. The seed is sown in late spring, in a sheltered position on a nice soil, very similar to Carrots, the plants thinned out to about 9 inches apart, and left to grow on until the end of the summer, when the growth will die down, leaving a root somewhat like a Parsnip. These are taken into a shed and kept in a heap of soil away from frost, and transferred to a hothouse when needed to produce their blanched heads during winter. They may also be grown in boxes

For Hints on Cultivation, see page 110.

Price of seed, 6d. and 1s. per packet.

Price of roots for forcing, 5s. per dozen (only available in winter).

For other Salad Plants, see page 110. For Herbs, see page 51.

CULTURAL DIRECTIONS.

Mustard and Cress.—Two of the most popular salad plants in cultivation, being in season all the year round. They are both cultivated in a similar manner.

Cultivation.—Use boxes of good fine soil, make the surface flat, and sow the seed rather thickly over the top, just pressing it in to the surface, but without using any covering material. After sowing, water it well. Place the box in moist heat, and cover with boards or thick paper until the seed germinates. Use shallow boxes half filled with soil. Frequent successional sowings should be made all the year round. Good results may be obtained out of doors in the summer by preparing beds of fine soil in the same way as recommended for boxes, and covering the seed when sown with boards or mats until it germinates.

Use.—Cut as soon as ready with a sharp knife. (*See Illustration above.*)

Watercress may be successfully grown if sown in rows in a shady border and well watered. *See page 110.*

James Carter & Co.

CARTERS MODEL CUCUMBER, growing at our Nurseries for Seed.

Some fine specimens of this variety have been exhibited in Gold Medal Collections in various parts of the country.

Carters Model (*see Photograph*) is one of the handsomest Cucumbers grown, embodying the fine form and general characteristics of *Tender and True* with the prolific habit and strong constitution of the *Telegraph*. Perfect in outline, with scarcely any neck, and of fine flavour, this variety has become popular, both for exhibition and table purposes.

Price 1s. 6d., 2s. 6d., and 3s. 6d. per packet.

ONE HUNDRED AND FIFTY-SEVEN FIRST PRIZES REPORTED BY CUSTOMERS DURING THE PAST FEW SEASONS.

MR. JAMES LAWSON, The Gardens, Horticultural College, Swanley, says: "I cannot speak too highly of Carters *Model* Cucumber. It is still the best for all purposes."

CARTERS IDEAL CUCUMBER GROWING AT OUR NURSERIES FOR SEED.

Carters Ideal (see Photograph).—Raised by that champion cultivator, Mr. E. Beckett, head gardener to the Hon. Vicary Gibbs. It is quite an aristocratic variety, both in colour, shape, and flavour. It gained a Cultural Commendation after growth at Wisley, 1905. Price 1s. 6d., 2s. 6d., and 3s. 6d. per packet.

"Your *Ideal* Cucumber is now bearing beautiful fruit, and I am sure there is no better seed on earth than yours."—Mr. G. DUNFORD, Harlow.

Carters Cardiff Castle.—Awarded a Cultural Commendation by the Royal Horticultural Society. The fruit is of a rich emerald colour, perfect in form, growing to a length of about 18 inches. It is remarkably free-bearing and very early. Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters Earliest of All.—Has produced perfect fruit in a trial, nine days in advance of all others. It is of good colour, and handsome form. Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters Improved Telegraph.—Our highly selected stock is the finest obtainable of this popular variety. Unquestionably one of the best winter Cucumbers; indispensable for forcing, and a great cropper. Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters Royal Osborne.—This grand introduction of ours has now become thoroughly established and as an all-the-year-round variety the professional gardener will find it one of the best. It is very prolific and of a rich deep green colour. Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS MINIATURE CLUSTER.—The best for pickling or salad	0 6
CARTERS PRICKLY RIDGE	0 6
CARTERS STOCKWOOD	0 6
GHERKIN.—For pickling	0 6
SHORT PRICKLY	0 6

The Cultivation of Frame Cucumber.—Sow in a pot or pan during February or March in heat for summer use, keeping the seed-pan shaded from strong light until the seedlings appear, then transplant to well-prepared hot-bed, or other position, when the plants are sufficiently established. If intended for cold-frame culture the plants must not be put out until all danger of frost is past. Sow again in September for winter use on a hot bed.

The Cultivation of Ridge Cucumber.—Sow on gentle heat in April, and plant out in June into a raised mound in a sunny spot, or sow where intended to grow in early June or sooner if weather is warm.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

ENDIVE.

CARTERS OVAL OR PLAIN-LEAVED ENDIVE.

Carters Oval-leaved. —The plain-leaved Endives are by some preferred to the Curled varieties; this variety is the highest type and we strongly recommend it; it is very hardy, of compact habit, and blanches easily 6d. & 1 0	1 6
Carters Round-leaved Batavian. —Very compact and hardy, forms good heart 3d. & 0 6	0 10
Green Batavian. —Tender broad leaves, crisp, of good flavour 3d. & 0 6	0 10

We have been awarded Two First Class Certificates by the Royal Horticultural Society for our stocks of Endive.

Our Endives were included in the First Prize Collection of Vegetables exhibited at the Vegetable Conference of the Royal Horticultural Society.

The Cultivation of Endive.—Sow for early crops in middle of May, and for succession to beginning of August; transplant from the seed-bed into warm situations, and give protection to the late crops required for spring use. A simple method of blanching is to put an inverted pot over each plant and cover it with leaves or straw.

“With the productions from an Exhibitor’s Collection of Seeds I made twelve entries at our show, and secured eleven First Prizes and one Special.”—Mr. T. RANDALL, Cotgrave.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

HERBS AND SUNDRY PLANTS.

- The following, price **6d.** and **1s.** per packet Our assortment of 12 varieties, **5s.**; 6 varieties, **3s.**
- ARTICHOKE, GLOBE.**—Sow on a gentle hot-bed early in March, plant out during May, or may be sown outdoors in April.
- BALM.**—Used for making balm tea for medicinal purposes, and in some districts for making wine.
- BASIL, SWEET** } For seasoning, and flavouring soups.
 ,, **BUSH** }
- BORAGE.**—Grown for salads, and also used for claret cup.
- CARDOON.**—Sow in April or May on a sunny border; transplant into well-manured trenches in August or September, earth up and blanch in the same way as for Celery. The midrib of the leaf used in salads and soups.
- CELERIAC OR TURNIP-ROOTED CELERY,**
 see pages 44 and 110.
- CAPSICUM, LONG RED** } Sow in heat end of February or beginning of March, prick out into small pots for growing on in greenhouse or frame, or they may be transplanted to a warm border.
 ,, **MIXED** ... }
- CHILL, SMALL RED** ... }
- CHERVIL.**—Sow in March or April for summer, and again in July for winter use; thin out to about 6 inches apart. Excellent for garnishing and valuable for soups and salads.
- CORN SALAD OR LAMB'S LETTUCE.**—Sow in March and April for summer use, and during August for winter salads, in drills 8 inches apart and thin plants to 4 or 5 inches apart.
- CHICORY, CARTERS IMPROVED.**—Sow in April and May in good soil; thin out to about 6 inches apart. A splendid acquisition for salads.
- DANDELION.**—Very useful for winter salads. Sow in May, and thin to from 9 to 12 inches apart.
- EGG PLANT, PURPLE** } Sow during March in heat, pot off when 3 or 4 inches high, and when established harden off and place in greenhouse for fruit to colour.
 ,, " **WHITE** }
- FENNEL.**—Used for fish sauce and for garnishing.
- LAVENDER.**—Grown for its aromatic flowers.
- MARJORAM, POT** ... } Used for stuffings and
 ,, **SWEET KNOTTED** } for flavouring soups.
- POTATO SEED.**—Will produce some seedlings of great merit.
- PURSILAIN, GOLDEN** } The young shoots and leaves
 ,, **GREEN** } are used in salads.
- RAMPION.**—Sow on very fine soil in April or May. The leaves are used for salads and by some cooked as Spinach, and the roots used as Radishes.
- ROSEMARY.**—Used for garnishing, and in some districts an infusion of the leaves is held to be very beneficial for relieving headache.
- SAGE.**—One of the best known of savoury herbs for sauces and stuffings.
- SAVORY, SUMMER** } (Used for flavouring soups, and
 ,, **WINTER** } a sprig will be found to impart a piquancy if boiled with Peas and Beans.
- SEAKALE.**—Sow in drills during March and April from 12 to 15 inches apart, and thin out to 8 inches apart. Transplant in the following spring to well-manured ground. Per oz., **9d.**
- SORREL, BROAD LEAVED** } Leaves used in soups,
 ,, **COMMON** ... } salads, and sauces.
- THYME.**—For sauces, stuffings, and soups.
- WHITLØEF.**—Throws off great profusion of tender leaves, very useful for salads.
- WORMWOOD.**—Used as a tonic when infused as tea, very bitter.

See also page 110.

STRAWBERRY SEEDS.

Per packet—*s. d.*

- Alpine and Perpetual Strawberries.**—Best grown from Seeds. Sown very early in heat and planted out in May they fruit the same Autumn, sown in April they fruit profusely the following year.

CARTERS IMPROVED SWEET CORN.

Copyright

James Carter & Co.

Several fine cobs were exhibited in Two Gold Medal and Two Grand Prix Collections of Vegetables at the Franco-British Exhibition, 1908.

This Maize is a favourite vegetable dish in Canada, and we are now able to offer an improved type, acclimatized and saved in this country. The demand is increasing as it is more widely known. The cobs are cooked and served whole, and the peculiar sweet nutty flavour is so appreciated that after a trial it will, no doubt, find a permanent place in the Kitchen Garden.

Price **1s.** per packet.

KOHL RABI, or KNOL KHOL.

Carters Earliest White. Carters Earliest Purple.

Price **6d.** and **1s.** per packet.

CULTURAL DIRECTIONS.

DESCRIPTION.—A useful vegetable, not nearly so much cultivated in this country in gardens as it would be were its merits known.

USE.—As a substitute for Turnips, especially in hot dry seasons. The bulb grows entirely out of the ground.

VARIETIES.—There are two varieties in general cultivation, the white and the purple.

CULTIVATION.—Prepare a breadth of good well-manured soil. Drill the seeds in rows about 15 inches apart in May, and thin out to about 9 inches apart. They are ready for use when they attain the size of a small Turnip.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CASH PRIZES FOR 1911.

JAMES CARTER & Co., Seedsmen to His Majesty the King, High Holborn, and Raynes Park, London, S.W., undertake, upon being furnished with certified evidence, to duplicate First, Second, or Third Money Awards made to the exhibitors who show the products of Seeds and Potatoes from purchases made by the exhibitor from this Catalogue above 10s. in value, and obtained direct from Messrs. Carters establishment during the twelve months ending June 30th, 1911. The said duplication will be limited to the value of the purchase, but exhibits of exceptional merit will be treated with liberality at the option of Messrs. Carter

The products to be of the exhibitor's own growth, and in case of any dispute as to purchase, &c., an invoice of the seeds purchased must be produced if required, and the specimens are to be staged in accordance with the regulations of the Society. This offer does not apply to special prizes offered by Firms and other Patrons.

EXAMPLE.—If 10s. or 20s. are offered by the Society as Prizes for, say, the best dish of Peas, James Carter & Co. will award an equal amount if their customer gains one or other of them, providing his purchase extends to 10s. or 20s., and that he has carried out the above conditions

Customers intending to claim the advantages of these Special Prizes must notify the fact to us a week before the day of the Show, stating the names of the Vegetables, Potatoes, or Flowers they intend to stage, when we will send neatly named cards, *which must be exposed to view on the exhibits during the whole time of the Show, or if not we may withhold the prizes.* We shall also send the applicant a sheet on which to record his prizes to save the Secretary unnecessary work.

IMPORTANT.—If this announcement does not appear in the Prize Schedule of the Horticultural Show in the intending Competitor's district, the offer must be considered cancelled. We are always pleased to hear from our Customers of their intention to compete, and in the event of their winning open prizes, we may decide to give them an honorarium for the trouble

These Prizes are open to Messrs. Carters Customers, but not available to Market Growers, Seedsmen, Nurserymen, or Horticultural Traders.

PRIZES IN OPEN COMPETITIONS.

We have received the following records of Prize-winnings from our customers gained in open competition with the produce of our Vegetable and Flower Seeds at Horticultural Exhibitions in various parts of the Country, enabling us to compile an extraordinary list of successes. We regret that space will not permit extended reports, but we are always pleased to hear of our customers successes.

25,320 Prizes reported by Customers.

Southern Counties	8,120 Prizes in Open Competition against all Comers.
Eastern Counties	2,121 Prizes in Open Competition against all Comers.
Western Counties	4,630 Prizes in Open Competition against all Comers.
Midland Counties	6,491 Prizes in Open Competition against all Comers.
Northern Counties	1,782 Prizes in Open Competition against all Comers.
Wales, Ireland, Scotland, &c.	2,176 Prizes in Open Competition against all Comers.

CARTERS HOLBORN MODEL LEEK.

Carters Holborn Model Leek was a very prominent feature in the vegetable collections, which were awarded Three Gold Medals and Two Grand Prix at the Franco-British Exhibition, 1908.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

LEEK.

237 FIRST PRIZES
reported to us by
customers.

Carters Holborn Model

(see Photograph).

The best both for exhibition and table. The stems are remarkably solid, not quite so long as Carters *Selected Musselburgh*, of the clearest white colour, whilst the flavour is exceedingly delicate.

Price 1s. and 1s. 6d.
per packet;
2s. 6d. per ounce.

HOLBORN MODEL LEEK IN IRELAND.

BELFAST GARDENER'S ACHIEVEMENT.—In a recent issue of the *Evening Telegraph* we referred to a Leek measuring 3 ft. 6 in. in length which had been dug up at Bangor (Wales), and which was regarded as quite a monstrosity of its kind. We have just had delivered to us, however, two specimens of this indispensable domestic vegetable grown by Mr. A. M'Clure, gardener to J. J. Kirkpatrick, Esq., J.P., Kincraig, Belfast, which give the Welsh giant an easy beating in point of all-round measurement. One of the Leeks is exactly 4 ft., and the other 3 ft. 7 in. long, and the larger one measures 7 inches in circumference at the base. While we question if anyone could be found gifted with a digestive apparatus sufficiently strong to properly assimilate the specimens referred to, we cannot but congratulate Mr. M'Clure on having achieved such a notable record in the department of agriculture.

LEEK.—*Continued.*

THE LYON LEEK.—A very popular large variety; widely grown in the North, where it takes many of the leading prizes each year.

Price **1s.** and **6d.** per packet;
1s. 9d. per ounce.

Per pkt.	Per oz.
s. d.	s. d.

Carters Selected Musselburgh (*see Photograph*).—A splendid selection of this well-known and popular variety; grows to large size, and is recommended for exhibition 6d. & 1 0 1 9

AYTON CASTLE.—Good long useful variety; for general cultivation 0 6 1 0

CARTERS LONDON, or BROAD FLAG.
—Quick growing; for early use 3d. & 0 6 0 9

CARTERS WELSH.—Fine large variety; great advance upon Welsh ordinary 3d. & 0 6 0 9

HENRY'S PRIZE.—Late variety; of large size; very hardy 0 6 1 0

The Cultivation of Leek.—Sow February to April, and transplant into trenches of well-manured soil, say 1 foot in depth, and 20 inches between the plants. In warm weather liberal dressings of liquid manure will be of service, and the plants should be afterwards carefully earthed up to blanch the stems. For exhibition, sow in January in boxes under glass, and transplant early into rich soil.

"Your seeds gave great satisfaction last year."—MR. D. INGLIS, Gardener to His Grace the Duke of Buccleuch, *January 13th, 1908.*

"I am pleased to tell you, last year I took eleven firsts, nine seconds, and two third prizes from your seeds with numerous congratulations."—MR. G. ALLAWAY, Harrow, *January 21st, 1908.*

COS LETTUCE.

Copyright

MUCH REDUCED IN SIZE.

James Carter & Co.

THIS GRAND LETTUCE IS SELF-FOLDING, AND REQUIRES NO TYING.

Carters Giant White Cos.—This remarkably fine lettuce becomes more popular every season, and is without doubt the best and finest flavoured Cos Lettuce in cultivation. Owing to the self-folding habit it possesses, no tying is required. The heads are very solid and crisp eating. It does not run to seed as quickly as other Cos varieties.

ONE HUNDRED AND TWENTY-SIX FIRST PRIZES REPORTED BY CUSTOMERS DURING THE PAST FEW SEASONS.

Price 6d., 1s., and 1s. 6d. per packet ; 2s. 6d. per ounce.

James Carter & Co.

Carters Jumbo Cos (see Photograph).—A distinct summer Lettuce of enormous size.

During the hottest period of the year we have seen this Lettuce standing as firm as a rock, and many of the heads when fit to eat weighed from 5 to 6 lbs. each.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at the Experimental Grounds, says:—"Foliage deep green; hearts immense, solid. Excellent flavour. Stood the drought well. Ready July 1st. The largest Lettuce in the collection (39 varieties)."

Our Lettuces were included in the First Prize Collection of Vegetables exhibited at the Vegetable Conference of the Royal Horticultural Society, and also in the Gold Medal Exhibit in 1904.

Price 6d., 1s., and 1s. 6d. per packet; 2s. 6d. per ounce.

REDUCED IN SIZE.

James Carter & Co.

CARTERS HOLBORN STANDARD.

Carters Holborn Standard (*see Photograph above*).—A Lettuce of extraordinary size and duration. It forms well-developed heads in its early stages and is one of the very last to start for seed. Its leaves are crumpled and crisp, while it is very tender and of excellent flavour, and will provide an abundance of salad during the hottest of English summers. Fifty-six First Prizes reported during the past few seasons.

Price **1s.** and **1s. 6d.** per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley last season, says: "**Carters Holborn Standard**; hearts large, solid, crisp, good flavour, with crumpled outer leaves tinged with brown. This variety stood the drought well without running to seed."

Carters Perpetual.—Award of Merit, Royal Horticultural Society. This is a large handsome Cabbage Lettuce, equally suitable for forcing and for open ground. Its great attraction to us is its resistance to drought. It produces very fine heads of a lively green colour and retains its crisp and tender flavour to the last, its deeply crumpled leaves giving it great substance. Seventeen First Prizes reported by customers last season.

Price **6d.**, **1s.**, and **1s. 6d.** per packet; **2s. 6d.** per ounce.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at the Experimental Grounds, says:—"Carters *Perpetual*.—Foliage beautifully curled; a fine stock."

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

REDUCED IN SIZE,
CARTERS HARBINGER.

James Carter & Co.

Carters Harbinger Forcing (*see Photograph*).—Valuable on account of its extreme earliness. It is not a hearting variety, but being of quick growth produces a quantity of tender leaves which are so much in request for early salads.

Price 6d. and 1s. per packet ; 2s. 6d. per ounce.

Carters Longstander.—A distinct and valuable variety of great size. From its peculiar habit of growth it is less liable to decay and damage than any other cabbage variety. The colour of the leaf is pale green, and of the most delicious flavour and tenderness.

Price 6d. and 1s. per packet ; 1s. 9d. per ounce.

Carters Endive-Leaved.—This Lettuce is quite distinct. Its leaves are deeply serrated and lacinated, which gives it the appearance of Endive—indeed, a prominent gardener suggested that it might be used in early summer salads, and few could tell but that it was Endive.

Price 6d. and 1s. per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at the Experimental Grounds, says :—“ Leaves beautifully cut and divided ; a very handsome variety.”

The Cultivation of the Lettuce.—Sow in pans on a gentle heat in February, and prick out into a well-manured and warm border. Sow again during March in a protected situation out of doors for early use, and in succession to the end of August for late crops. Young and tender plants may be grown in boxes or frames, and pulled and eaten when small ; in this form they make a delicate salad. Water liberally in dry and warm weather.

Carters Address for all
Correspondence, RAYNES PARK, LONDON, S.W.—1911.

CABBAGE LETTUCE.—*Continued.*

CARTERS ROUND-LEAVED CABBAGE LETTUCE.

Carters Round-Leaved (*see Photograph*).—A hardy flat-shaped variety that can be sown at almost any season; the heads are very compact and firm, solid and white; slow to run to seed. At our trial grounds we have repeatedly seen this variety standing firm, when others have bolted.

Price **6d.** and **1s.** per packet; **2s. 6d.** per ounce.

Carters Green-Fringed.—Of a very delicate and peculiar shade of green, inner parts of the leaves being white; the edges are prettily fringed and serrated, the appearance being very striking and pleasing; useful summer variety.

Price **6d.** and **1s.** per packet.

	Per oz.—s.	d.		Per oz.—s.	d.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

A SUPERB NEW WHITE-FLESHED MELON.

NEW

CARTERS BARNETT HILL FAVOURITE MELON.

We have pleasure in bringing this grand new Melon to our customers' notice, as we are confident that there will be a large demand for it. It is superbly netted, orange-yellow in colour, with white flesh and a splendid flavour; it is free setting and a perfect exhibition variety.

The raiser, Mr. A. Michelson, states that the Melon has a strong constitution, is a free setter, juicy and splendid flavour, above the average size, with a rich orange colour, handsomely netted, and is a grand exhibition variety.

Price 2s. 6d. and 3s. 6d. per packet.

Extract from *Gardeners' Chronicle*, August 7th, 1909:—**MELON BARNETT HILL FAVOURITE.**—The fruit of this variety much resembles *Blenheim Orange*. It has a rich yellow and handsomely netted rind, but white flesh. When the variety was first sent to the Committee last year for opinion, it was decided to try it at Wisley. Plants have been cultivated there this year, and a fruit was tasted at Wisley by a deputation from the Committee on the 27th ult. The fruit then proved to be so good it was unanimously recommended for an Award of Merit. This was granted at the full meeting of the Committee.

James Carter & Co.

CARTERS EARL'S FAVOURITE MELON.
THE BEST GREEN-FLESH MELON
IS CARTERS EARL'S FAVOURITE.

AWARDED A FIRST CLASS CERTIFICATE, ROYAL HORTICULTURAL SOCIETY.
 TWENTY-SIX FIRST PRIZES REPORTED LAST SEASON.

This is without doubt the finest green-fleshed Melon grown; it is a strong grower, free setter, and the fruit is large and beautifully netted, whilst the flavour has been pronounced by many lovers of this luscious fruit to be the very best possible. Price **1s. 6d.**, **2s. 6d.**, and **3s. 6d.** per packet.

"I thought you would like to see a sample of your Earl's Favourite Melon. They were grown in a cool frame by myself, an amateur, I cut 42 Melons off six plants. There is little doubt this is the best green-flesh Melon grown."—R. P. HUGHES, The Old House.

The Cultivation of Melon.—Sow for first crop in January, and plant when ready into pits or on slabs filled with good maiden loam and well rotted manure, adding a dressing of fine soil to the surface and bringing the plants as near the light and glass as possible. It is essential that a regular temperature be secured rather than a high degree of heat. Keep a moist buoyant atmosphere during growth and give air freely when fruit is ripening, checking the supply of water to develop flavour. The frame varieties are sown later, and kept under glass until the season is sufficiently advanced for them to be put out on a warm heap of soil in the frame.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

THE BEST SCARLET-FLESH MELON.

Copyright

REDUCED IN SIZE.

James Carter & Co.

CARTERS BLENHEIM ORANGE MELON.

The finest flavoured and most popular scarlet-flesh Melon in cultivation.

FIRST CLASS CERTIFICATE, ROYAL HORTICULTURAL SOCIETY.

Carters Blenheim Orange.—This Melon is remarkably prolific, has a grand constitution, is a very fine setter, and may be described as a perpetual bearer, ripening in a short space of time. The fruit is superbly netted, the flesh deep and solid, and a special and distinctive feature is the evenly-defined and thin rind. Sixty-three First Prizes reported by customers during the past few seasons.

Price 1s. 6d., 2s. 6d., and 3s. 6d. per packet.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

MELONS.—*Continued.***CARTERS HARDY FRAME MELON.**

It is many years since the Royal Horticultural Society awarded us their First Class Certificate for a Melon that could be easily grown without heat. In **Carters Hardy Frame** we now offer a variety specially suitable for amateurs who do not possess the convenience necessary for cultivating the more tender Melons. The fruits are large, ribbed, and the flesh a rich scarlet colour.

"I should like to recommend your *Hardy Frame* Melon. This has been a great success; it bears profusely, sets well, and is very little trouble, and the fruits are of good size and satisfactory flavour. It should become a boon to all those growers who only have frame room at their disposal."—Mr. W. A. Cook, Head Gardener to Sir Edmund G. Loder, Bart.

Everyone who has a frame is recommended to give it a trial.

Price 1s. and 1s. 6d. per packet.

Carters Holborn Favourite.—Fruit of the largest size, roundish ovate; rind lemon colour, heavily netted; flesh, greenish-white; flavour, sweet, melting, and juicy; habit of plant, strong and vigorous; a free setter and a great bearer. Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters British Queen.—Best white-flesh Melon. This grand cream-flesh Melon is a cross between *Hero of Lockinge* and *Royal Ascot*, and was awarded the First Class Certificate of the Royal Horticultural Society. Pronounced by the Committee to be the very best flavoured white-flesh Melon ever submitted. Also awarded a Gold Medal, Royal Caledonian Horticultural Society, in association with other fruit exhibited from the Royal Gardens, Windsor. Price 1s., 1s. 6d., 2s. 6d., and 3s. 6d. per packet.

Carters Green Gage.—A "perfect" green-flesh Melon; flavour delicious.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters Amberwood Beauty.—A very handsome green-flesh Melon, the result of a cross between *Hero of Lockinge* and *Read's Scarlet Flesh*.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters Emerald Gem.—Very prolific. Price 1s., 1s. 6d., and 2s. 6d. per packet.

The following sorts can also be supplied:—

CARTERS HOLBORN ONION.

NEW AND STANDARD VARIETIES FOR SPRING SOWING.

CARTERS HOLBORN (*see Photograph*).—Equally valuable for exhibition and for table purposes. Perfect in shape, it grows to a large size, and is distinct in colour of skin from other Globe varieties. It is a capital keeper, and the delicate flavour nearly approaches that of the imported Spanish Onions sold by grocers and fruiterers. May also be sown in the autumn.

Price **1s.** and **6d.** per packet ; **2s.** per ounce.

NEW

Carters Early Wonder.—A small globe Onion, maturing with great rapidity, thus leaving the ground vacant very early for the next crop ; its keeping qualities are also remarkable.

Price **1s.** per packet.

Carters Tennis Ball.—This magnificent Onion is specially adapted for early sowing ; the flavour is mild and delicate, and as an exhibition variety in summer it is invaluable.

Price **1s.** and **6d.** per packet ; **2s.** per ounce.

Carters Long Keeper.—Will remain sound the year round if properly kept.

"I am sending some examples of your Long-keeping Onion, grown in 1900, and it is now October 5th, 1901. Gardeners about here hardly believe it."—J. L., Blackheath.

Price **1s.** and **6d.** per packet ; **2s.** per ounce.

Carters Silver Ball.—A pretty, medium-sized white globe Onion of fine texture and mild flavour. It makes a nice contrast on the exhibition table.

Price **1s.** and **6d.** per packet ; **2s.** per ounce.

Monthly Operations in the Garden, with Hints on the Cultivation of the Principal Flowers and Vegetables. Post Free, 6d.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S. W.—1911.

ONION.—*Continued.**Copyright**James Carter & Co.*

CARTERS SELECTED AILSA CRAIG (*see Photograph above*).—We offer a very fine strain of this popular Onion, which, on account of its enormous size, is in great demand amongst exhibitors of vegetables. It is a good keeper, and is much liked and recommended on account of its acceptable, delicate, and pungent flavour. Suitable for autumn or spring sowing. TWO HUNDRED AND THIRTY-SEVEN FIRST PRIZES REPORTED DURING THE PAST FEW SEASONS.

Price 6d., 1s., 1s. 6d., and 2s. 6d. per packet: 3s. 6d. per ounce.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

James Carter & Co.

CARTERS RECORD ONION.

Carters Record Onion increases in favour each season, and is already exceedingly popular. It can be sown either in the autumn or spring; but if large bulbs are desired, autumn sowing is recommended. It will be remembered that a specimen, illustrated in the *Gardening World*, turned the scale at 4½ lbs.; this was probably the heaviest Onion ever grown.

We regret we cannot find room in this Catalogue for the large number of letters which reach us every season regarding successes with this grand Onion. Here are two that have come to hand:—

"I grew *Record* Onions last year up to 2½ lbs. in weight."—Mr. O. CLARIDGE, Oundle, *January 24th*, 1903.

"I grew over 1½ tons of *Record* Onions from the ounce of seed I had from you last year."—Mr. HENRY SMICE, Market Garden, Boston, *February 3rd*, 1903.

Price 6d., 1s., 1s. 6d., and 2s. 6d. per packet; 3s. 6d. per ounce.

We hold records of 396 First Prizes having been gained by Customers.

GIANT LEMON ROCCA, 6d. and 1s. per packet; 1s. 6d. per ounce.

The Cultivation of Onion.—The ground cannot well be too rich for this crop, nor the soil in too fine a condition. February and March are the chief seasons for sowing. The soil must be made firm before the operation is undertaken in either beds or drills. The seed should be sown thinly and covered lightly, the drills 12 inches apart, and the young Onions thinned out to about 6 inches apart, according to the variety. In very dry weather a good watering is very beneficial. Growers of Onions for exhibition generally transplant, and this is also a sure means of checking the onion grub, so troublesome in some districts. Some of the larger growing varieties are generally sown in autumn and transplanted in spring, when under fair conditions enormous exhibition specimens are obtained.

CARTERS CRESTED BOUQUET PARSLEY.

A DISTINCT SUPERB PARSLEY.

Carters Crested Bouquet (*see Photograph*).—A Parsley of very attractive appearance, both in the garden and on the table; of very dwarf compact growth, all its strength being thrown into the exquisite curls of its leaves, giving it a pretty crested appearance; without doubt the most perfect variety in cultivation.

Price **1s.** and **1s. 6d.** per packet; **2s. 6d.** per ounce.

THE ROYAL HORTICULTURAL SOCIETY'S report of last season's trial at Wisley reads:—"Carters Crested Bouquet Parsley. A beautifully deep curled variety of sturdy, compact habit."

Carters Fern-Leaved Parsley.—Exquisitely perfect in form and colour; quite fern-like, and highly ornamental; for garnishing purposes it is ideal.

Price **6d.** and **1s.** per packet; **1s. 6d.** per ounce.

Carters Parsleys gained Three Awards of Merit, R.H.S., 1908.

The Cultivation of Parsley.—Sow the seeds thinly in beds any time from February until the end of June. In dry seasons it is an advantage to water the beds, as the seeds will sometimes lie a long while dormant.

CARTERS PERPETUAL PARSLEY.

Carters Perpetual (*see Photograph*).—A distinct and valuable curled variety that does not annually run to seed. It has stood with us upon the same land *for four years before seeding*.

Price **6d.** and **1s.** per packet; **1s. 6d.** per ounce.

Carters Emerald Green.—Award of Merit R.H.S., 1908. This excellent stock of Parsley will soon become popular, and was picked out by the Committee of the R.H.S., 1908, as being worthy of an Award of Merit. The colour is of a very rich deep green; habit taller and more branching than our celebrated *Champion Moss Curled*; it is also very quick in developing and should prove of great value to market growers.

Price **6d.** and **1s.** per packet; **1s. 6d.** per ounce.

Carters Champion Moss Curled.—A very close, handsome Parsley; both useful and ornamental.

Price **6d.** per packet; **1s.** per ounce.

	Per oz.—s. d.

CARTERS MALTESE PARSNIP.

A SUPERB GIANT PARSNIP FOR EXHIBITION OR TABLE USE.

Carters Maltese (*see Photograph*). — WE HOLD RECORDS OF 316 FIRST PRIZES HAVING BEEN TAKEN DURING THE PAST FEW SEASONS.

We are confident in stating that this highly selected strain cannot be surpassed, either for size or flavour; the roots, which attain to a very large size, being quite as tender and sweet flavoured as most varieties which do not reach one-half the size.

Price **3d.** and **6d.** per packet; **9d.** per ounce.

"Your seeds turned out splendidly last year; I had wonderful crops, some of the *Maltese* Parsnips weighed 4 lbs. 2 ozs. each and were quite sweet and succulent, not a bit strong in consequence of the size."—Mrs. PHILLIPS, Rathfarnham.

"I am pleased to tell you that I have been very successful with your seeds. On Thursday last I took 25 First and 12 Second prizes. I think your *Maltese* Parsnips can't be matched for Exhibition. I grew them 5 feet long, beautifully clean. Your *Model* Leek is also a splendid one for Exhibition."—Mr. A. E. BURGE, The Gardens, Manor House, Wootton-Fitzpaine, Charmouth, August 27th, 1909.

	Per packet—s.	d.
CARTERS LONG PARSNIP.—Fine variety, of splendid flavour	3d.	0 6
HOLLOW CROWN.—An old favourite	3d.	0 6
IMPROVED JERSEY MARROW.—Selected stock, good medium size	3d.	0 6
THE STUDENT.—Extremely delicate flavour.	3d.	0 6

The 6d. packets of above are about 1 ounce each.

The Cultivation of Parsnips.—Sow the seed early in March as soon as the season will permit. The ground should be well manured and deeply trenched; the drills about 15 inches apart, and the plants thinned out the same distance apart.

Copyright J. C. & Co.
MUCH REDUCED IN SIZE.
CARTERS MALTESE PARSNIP.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS HOLBORN MARROW PARSNIP.

A SWEET DELICATE-FLESHED VARIETY.

Carters Holborn Marrow (*see Photograph*).--A truly refined Parsnip. When lifted it leaves the ground clean, smooth, and well shaped. It is not so large in growth as our *Maltese*, but its flavour is unusually marrow-like and delicate. Our picture very inadequately depicts its merits.

Price 3d. & 6d. per pkt. and 1s. per oz.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at the Experimental Grounds, says:—"Roots thick, handsome, and not too large, but just the size and shape a Parsnip should be."

"The *Holborn Marrow* Parsnip is the most delicious I ever tasted, and it deserves all you say about it."--J. FREEMAN, Esq., Chard, *February 26th, 1907.*

"I must tell you that I have pulled your *Elephant* Carrot this year from 2 ft. 6 in. to 3 ft. long. The longest I have drawn was just 3 ft.--splendid specimens. I have had several come to see them, and they say they have never seen anything like them. I have never known defeat since I have grown them. They have taken four Firsts up to now, and six Firsts last year out of my beds. You may make use of this if you think fit."--G. E. BRINDLEY, Esq., Hollington, Tean, Stoke-on-Trent.

Messrs. James Carter & Co. have much pleasure in announcing that they have had the honour of receiving the Royal Warrant of Appointment to

HIS MAJESTY THE KING OF SIAM.

They feel sure that their patrons will be pleased to know that their seeds have done so well in His Siamese Majesty's gardens.

As is their custom when despatching seeds through the tropics, great care was taken in exhausting the dampness, not only from the seeds themselves, but also from the packing paper before being finally placed in hermetically sealed tins.

By this special patent process of their own the heat and moisture of the tropics is negated, and the germ lies dormant until the tin is unpacked and the seed sown.

CARTERS EIGHT WEEKS.

The earliest
Border Pea in
the World.

FOR FORCING
or
Border Work.

Copyright

James Carter & Co.

Carters Eight Weeks proved again to be the earliest Pea of all, in our Trial Grounds last year.

CARTERS EIGHT WEEKS.—The Earliest Pea we have ever grown. A very hardy Marrowfat, growing 15 inches high, and possessing all the good points of the best type of *American Wonder*, which was one of its parents. As both a forcing and early border variety it must become a boon to gardeners whose demands are heavy early in the season. The seed is slightly dented, and of the same colour as its other parent, *William the First*. The pods are freely produced, and well filled with sweet-tasting peas. It is a splendid forcer.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters Forcing Pea.—A valuable Marrowfat Pea for under-glass culture. Its stocky growth is rarely more than 1 foot in height. It commends itself not only to professional gardeners who are required to produce Peas nearly the year round, but also to amateurs having a greenhouse or vinery doing practically nothing through the winter months, and who can, with this sturdy Pea, raise supplies for their table very early in the year.

Price 1s. 6d. per pint, 2s. 6d. per quart.

Carters Seedsmen by Appointment to His Majesty the King—111, High Holborn, London.

NEW

CARTERS "GIANT" LIGHTNING and CARTERS "GIANT" BLUE EXPRESS PEAS.

It is now many years since our House first introduced Carters *Lightning* (white round) and Carters *Express* (blue round), two Peas which soon became popular as the earliest of the white and blue round section.

We now have much pleasure in introducing (after several years' patient labour) the above magnificent Peas, "*Giant Lightning*" and "*Giant Express*". There is no doubt that these types will speedily displace the smaller podded varieties, as in addition to the increased size of pod the haulm is stronger, the cropping properties are much heavier, and the flavour is superior to the older varieties.

In large establishments where Peas are required very early these grand "*Giant*" introductions will be much appreciated, as it is well known that the round Peas are hardier and generally can be sown earlier than the wrinkled marrowfat varieties.

Carters "Giant" Lightning (*see Photograph*).—The new large-podded early white round Pea. Height, 3 to 4 feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters "Giant" Express (identical in size with "*Giant Lightning*". *See Photograph above*).—The new large-podded early blue round Pea. Height, 3 to 4 feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

CARTERS EARLY MORN PEA.

A superb First Early Giant Marrowfat. *For full particulars, see opposite page.*

Carters *Sedsmen by Appointment to His Majesty the King—High Holborn, London.*

Carters Early Morn Pea (*see Photograph opposite*).—This grand introduction maintains its position as one of the best early Marrowfat Peas ever raised. Although so early the seed should not be sown until the soil is in a fit state to receive it in April, as it is a rapid grower. The pods are very large and well filled, and are often ready to pick during June. Height, about 3 feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters Blue Express.—A re-selected stock of an early round-seeded variety and a very productive bearer, the pods well filled with fine flavoured Peas, of a distinct colour when boiled. Height, 2½ feet.

Price 1s. 9d. per pint, 3s. per quart.

Carters Daylight.—A fine Marrowfat, as early as *Lightning*, with exhibition pods. Height, 2½ feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters Lightning.—A re-selected stock of the earliest white round-seeded Pea. Height, about 2½ feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters Diamond.—An extra early *White Wrinkled Gem*, as early as *William Hurst*, with larger pods, and very prolific. A grand Pea for border work. Height, 1 foot.

Price 1s. 9d. per pint, 3s. per quart.

Carters Dwarf Favourite.—For gardens where space is an object this is the Pea to grow. It has rich deep-green pods well filled with delicious Marrowfat Peas. Very prolific. Height, 1½ feet.

Price 1s. 9d. per pint, 3s. per quart.

Carters Superior.—A highly-selected early blue-seeded Pea, with large pods. Closely follows *Blue Express*. An excellent Pea for market work. Height, 4 feet.

Price 1s. 6d. per pint, 2s. 6d. per quart.

Carters Springtide.—A first early Marrow, as early as *Lightning*, with dark green well-filled pods. Height, 2½ to 3 feet.

Price 1s. 6d. per pint, 2s. 6d. per quart.

The Pilot.—Carters re-selected.—This well-known variety has been carefully selected by us, and is without question the most perfect stock on the market; it produces large, well filled, deep coloured pods, about the size of *Gradus*. Height, 3 feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters Advancement (*Daisy* × *American Wonder*).—For many years past we have been crossing and selecting peas at our experimental grounds with the idea of producing a variety with pods as large as our well known *Daisy* and as early as *American Wonder* or *William Hurst*, and we have now great pleasure in bringing to our customers' notice this really grand introduction, marking as it undoubtedly does the most notable advance of recent years in the early dwarf section, having a robust habit and prolific growth, and bearing pods almost the size of our *Daisy* pea.

Visitors to our Trial Grounds for the past three or four seasons have been much struck with this pea, which has been under Seedling No. 201. The Haulm is about 18 inches.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters Address for all
Correspondence, RAYNES PARK, LONDON, S.W.—1911.

James Carter & Co.

CARTERS MAYFLOWER.—A superb Dwarf first early Marrowfat Pea.

A cross between *Daisy* and *William Hurst*. This is a grand thing, with long pointed pods twice the size of *William Hurst* and much more freely produced; being one of the most prolific dwarf peas grown. The bine is robust, possessing the same healthy character as its most famous parent the *Daisy*, with pods of similar colour to that variety. Seed wrinkled. Height, 18 inches. Everyone should try this fine introduction, which is but very inadequately shown in the photograph

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

CARTERS SNOWDROP PEA.

James Carter & Co.

See next page for description and reports.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

NOVELTY.

Carters Snowdrop. Award of Merit, R.H.S., 1908. A cross between *Early Morn* and *Express* (Seedling No 203).—This first early Pea can best be described as an early *Ne Plus Ultra*, having pods similar in shape and colour to that variety; it is a few days later than our *Early Morn*, growing rather taller, but possessing the robust constitution of its other parent (*Express*); for early sowing we can strongly recommend. First early. Height, 4 feet. Price 1s. per packet (about 250 seeds). Stock limited.

The Right Hon. Earl of Mansfield's Head Gardener says:—"Carters *Snowdrop* Pea. A most excellent early pea, height about 4 feet, strong grower, very free bearer, pods medium size, well filled with good peas of excellent quality; can strongly recommend it."—Mr. W. WARD, Ken Wood, Hampstead.

The Right Hon. The Earl of Kimberley's Head Gardener says:—"A good early heavy cropper, as early as *Early Morn*, pods well filled, robust constitution."—Mr. W. N. THURSTON, Wotton Park, North Walsham, Norfolk.

The Right Hon. Viscount Middleton's Head Gardener says:—"Snowdrop Pea. Height 4 feet. This is a very strong, robust variety for early work; the pods are rather blunt, but are very closely packed, and is a good succession to *Early Morn*. The flavour is quite distinct, and is excellent quality for the general use of a large garden."—Mr. QUANTON, The Gardens, Peper Harrow Park, Godalming.

The Right Hon. W. H. Long's Head Gardener says:—"Pea Carters *Snowdrop* is a promising new first early, producing freely large *Ne Plus Ultra* like pods, which are filled with large seed of superior colour and flavour. It grows with us about 4 feet in height."—Mr. W. STRUGNELL, Rood Ashton, Trowbridge.

The Hon. Vicary Gibbs' Head Gardener says:—"Snowdrop, one of the best, good shape pods, splendid variety for small gardens."—Mr. EDWIN BECKETT, Aldenham House, Elstree, Herts.

Admiral Brand's Head Gardener says:—"Snowdrop, a very fine early pea with abundance of fine dark square pods, containing 9 peas in most pods; this, I consider, fills a want in giving the true marrow flavour of the old *Magnum Bonum*. It has a splendid constitution, and will certainly rank as one of the best early peas."—Mr. W. BACK, Glynde Place, Lewes, Sussex.

Carters Edward VII. In the trials of the Royal Horticultural Society we were granted an Award of Merit for this superb early Marrow Pea. It is a first-class representative of the forward section of Marrowfats, but has *Ne Plus Ultra* shaped pods of a beautiful lustrous green, filled with fine, large, sweet-eating peas. Height, 3 feet.

Price 1s. 6d. per pint, 2s. 6d. per quart.

Carters King of the Earlies. This early Pea is a cross between our well-known *Daisy* and another first early sweet Marrowfat, and was raised at the Royal Gardens, Windsor. It produces a robust haulm from 15 to 18 inches in length, covered with giant pods.

Price 1s. 9d. per pint, 3s. per quart.

Carters Daffodil. A dwarf and very prolific Marrowfat Pea with the highest possible commendations, being of the rich deep colour of the *Stratagem* type, and a decided improvement upon *British Wonder* and the new types of *English Wonder*. It is a first early of bushy habit, and about 18 inches, obviating the necessity for stieks, and rendering it serviceable for borders. Its pods are larger than any of the well-known Peas of the early dwarf class referred to above, while the quality and flavour of the pea is delicious.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

the World.*

and Testimonials, see page 88.

CARTERS "QUITE CONTENT" MARROWFAT PEA. A GIANT-PODDED MAIN CROP.

Awarded the FIRST CLASS CERTIFICATE of the ROYAL HORTICULTURAL SOCIETY, 1906.

Pods longer and larger than any other Pea in cultivation.

This grand Pea, which has caused such a stir in the Horticultural world, is the outcome of a cross between *Alderman* and *Edwin Beckett*. In general character it resembles the former, but the pods are considerably larger than either parent. In our own trials it has amply demonstrated its wonderful superiority, and when exhibited in the open class at Shrewsbury, 1906, it easily secured the **FIRST PRIZE**, and was pronounced by leading experts to be without doubt the finest Pea ever seen. It is exceedingly prolific, and the pods hang mostly in pairs. Height, 5 to 6 feet.

SOME HONOURS, FIRST PRIZES, AND REPORTS.

FIRST CLASS CERTIFICATE, ROYAL HORTICULTURAL SOCIETY.

GOLD MEDAL, SHREWSBURY.

GOLD MEDAL, WOLVERHAMPTON.

*During the past few seasons this grand Exhibition Pea has taken 257 First Prizes
at all the important shows throughout the country.*

His Grace The Duke of Portland's Head Gardener says:—"I have tried Carters *Quite Content* Pea, which is without doubt the largest podded Pea I know of."—Mr. JAMES GIBSON, The Gardens, Welbeck.

His Grace The Duke of Buccleuch's Head Gardener says:—" *Quite Content* is all you claim for it, and was the most popular Exhibition Pea this last season."—Mr. WHYTOCK, The Gardens, Dalkeith Palace.

The Right Hon. The Earl of Onslow's Head Gardener says:—"The Pea *Quite Content* is excellent in every way."—Mr. H. W. BLAKE, The Gardens, Clandon Park, Guildford.

The Right Hon. The Earl of Lathom's Head Gardener says:—"Carters *Quite Content* Pea is truly a magnificent Pea for exhibition and of excellent table quality."—Mr. B. ASHTON, The Gardens, Lathom House.

The Right Hon. The Earl of Lytton's Head Gardener says:—"In all ways a splendid pea, very large pods, well filled, excellent flavour, quite indispensable for all exhibitors."—Mr. A. E. CRESSWELL, Knebworth House, Knebworth, Herts.

The Right Hon. Lord Poltimore's Head Gardener says:—"Fully maintains its high position, during the past dry season it was much in evidence on the show boards."—Mr. T. H. SLADE, The Gardens, Poltimore Park.

The Right Hon. Viscount Portman's Head Gardener says:—"A tall-growing variety. Pods large and straight, containing from 10 to 12 seeds in each."—Mr. H. C. PRINSEP, The Gardens, Buxted Park.

The Right Hon. Viscount Midleton's Head Gardener says:—" *Quite Content* Pea. I have never seen this fine exhibition Pea do better than it has done this year. It has been my heaviest cropper, pods of enormous size, many containing 11 Peas, chiefly in pairs. It is a Pea that requires plenty of room as its growth is so strong, and if planted on trenched ground will pay for the extra amount of labour by the crop it will produce."—Mr. QUAINTON, The Gardens, Peper Harrow Park, Godalming.

The Right Hon. W. H. Long's Head Gardener says:—"The exhibitor can ill afford to be without this pea among peas (*Quite Content*). We have seen some enviously fine dishes exhibited on many occasions this year."—Mr. W. STRUGNELL, Rood Ashton, Trowbridge.

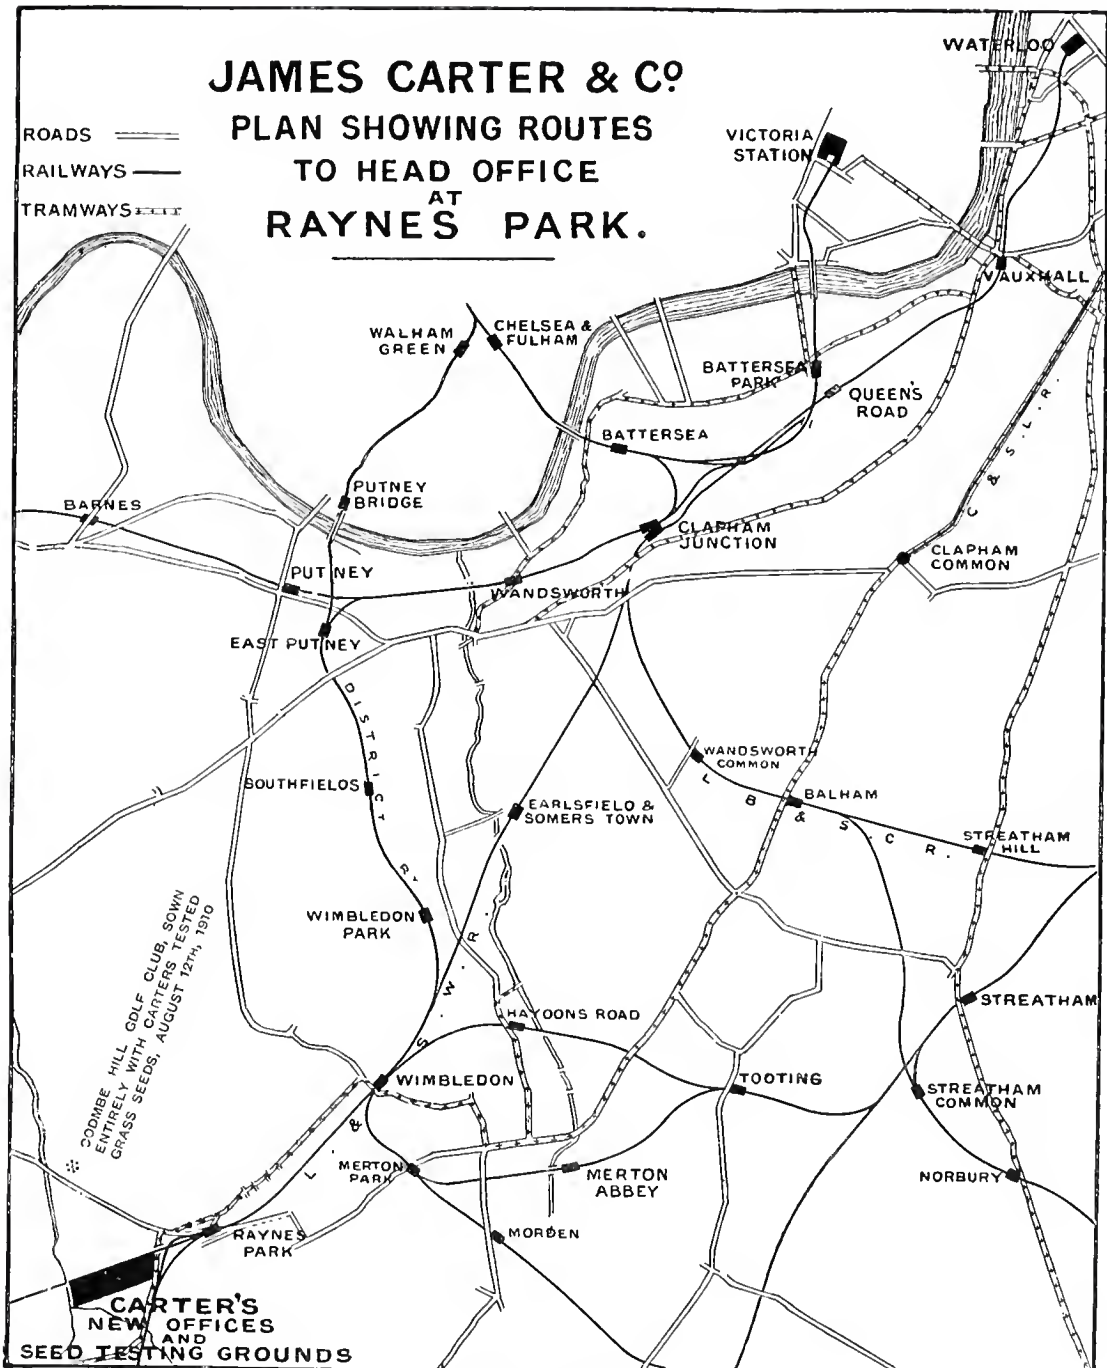

Sir Edmund Loder's Head Gardener says:—" *Quite Content* has been better than ever, wonderfully large pods causing every person who sees it to exclaim 'What a marvellous pea!' I have seen it at several first-class shows, and it has always been to the front."—Mr. W. A. COOK, The Gardens, Leonardlee.

Price 3s. 6d. per pint, 2s. per $\frac{1}{2}$ -pint, 1s. per packet.

We would respectfully draw our customers attention to the following, which appeared in "The Garden," September, 1908:—

Pea *Quite Content*.—"The true and original Pea *Quite Content*, as sent out by Messrs. James Carter and Co., is a maincrop variety, height 6 feet, foliage and pod deep green, pod 7 inches to $7\frac{1}{2}$ inches long, hanging mostly in pairs, and is quite distinct from all other Peas. We are requested to make this statement, as we are given to understand that a Pea, which has not all the claims of Carters *Quite Content*, has been widely distributed this season by others, either by accident or design, thereby causing much correspondence and annoyance to the growers and Messrs. Carter alike. Messrs. Carters *Quite Content* was distributed this season in their sealed packets, and has each year been carefully re-selected."

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

WELCOME.

All Flowers and Vegetables are tested, and are on view in our experimental grounds. June, July, and August is one gorgeous blaze of colour. Sweet Peas (1,200 rows), in fact, everything that comes under the survey of a Seed House can be seen growing side by side for comparative purposes, and lovers of gardening can always find some object of interest to arrest their attention.

We respectfully invite inspection. Trained experts are in attendance to give all information that may be required.

CARTERS INTERNATIONAL PEA.

(For description see opposite page.)

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

NOVELTY.

Carters International (*see Photograph on opposite page*).

Award of Merit R.H.S., 1908.—This magnificent Pea is the result of a cross between our well-known *Early Morn* and *Duke of Albany*.

It is quite distinct both in shape of pod and habit; the pods are of a rich deep green, containing 11 Peas of excellent size and flavour; this is undoubtedly the largest curved podded Marrowfat Pea at present offered to the public, and we are anticipating a large demand. Second early. Height, 5 to 6 feet.

Pods of this variety (under Seedling No. 211) were exhibited at the Royal Agricultural Society's Show at Newcastle, and at the Royal Horticultural Society's Show at Holland House during the past summer, and attracted much favourable attention.

Price 2s. per half-pint. Stock limited.

We give a few reports on Carters *International* Pea (Seedling No. 211):—

His Grace The Duke of Buccleuch's Head Gardener says:—" *International* Pea is a good exhibition Pea, pods 6 inches long, containing 10 Peas, equal sized, good colour, fine flavour. This Pea has cropped better than some other good Peas this adverse season."—Mr. JAMES WHYTOCK, Dalkeith, N.B.

The Right Hon. The Earl of Sandwich's Head Gardener says:—" I consider the *International* Pea a grand second early, very heavy cropper; pods large, averaging nine and ten Peas in a pod of first-class quality."—Mr. HANSFORD, The Gardens, Ilooke Court, Beamister.

The Right Hon. The Earl of Kimberley's Head Gardener says:—" *International* Pea. Very good quality, growing 5 feet high; the pods a dark green and well filled; heavy cropper. A Pea worth growing."—Mr. W. N. THURSTON, Witton Park, North Walsham, Norfolk.

The Right Hon. The Earl of Mansfield's Head Gardener says:—" Carters *International*. This is a first-class Pea for second early, of fine strong haulm, very free cropper, large pods of fine large Peas, about nine to the pod; excellent in quality, is well worth a place in any garden; tall grower."—Mr. W. WARD, Ken Wood, Hampstead.

The Right Hon. The Earl of Abingdon's Head Gardener says:—" *International* Pea is one of the best Peas I know of; good cropper and splendid quality, running *Quite Content* very close."—Mr. W. BROWN, Wytham Abbey, Oxford.

The Right Hon. The Earl of Galloway's Head Gardener says:—" *International* Pea. A very promising variety, which arrives at maturity early, has large well-filled pods; quality all that can be desired."—Mr. JAMES DAY, The Gardens, Garliestown, Wigtownshire.

The Right Hon. Viscount Midleton's Head Gardener says:—" *International* Pea. Height, 6 feet. This variety has done remarkably well with me this season, having extra strong growth, the pods being very dark green, long and curved, chiefly in pairs, average 10, of excellent flavour. This is a very heavy cropper for a second early, and for exhibition purposes cannot be excelled, coming next to *Quite Content* in my estimation. Can speak very highly of it as one of the best in cultivation."—Mr. QUAINTON, The Gardens, Peper Harrow Park, Godalming.

The Right Hon. Viscount Portman's Head Gardener says:—" This is an excellent second early variety growing about 6 feet high; the haulm is robust, and plant a good constitution; foliage large, light green mottled; pods large, after the *Duke of Albany* type, but earlier. A tall Pea of first-rate quality."—Mr. PRINSEP, The Gardens, Buxted Park, Uckfield.

Sir Edmund Loder's Head Gardener says:—" This Pea has done extraordinarily well this season. It is quite distinct, and has gained a good name hereabouts. I have given a few seeds to small growers, who were charmed with it. It had 10 and 11 Peas in a pod, of a beautiful green, had a true Marrowfat flavour; bears in pairs, and most prolific. It has certainly come to stay."—Mr. W. A. COOK, The Gardens, Leonardslee, Horsham.

Admiral Brand's Head Gardener says:—" *International*, surely the last word as far as size and quality are concerned, free cropping hanging mostly in pairs, with fine dark-marbled foliage, withstanding mildew well. Height, 5 feet. This is a Pea that must push its way to front rank; indispensable to exhibitors, many of the pods over 6 inches in length."—Mr. W. BACK, Glynde Place, Lewes, Sussex.

"A fine bearer and a strong grower; the flavour of the Peas should attract particular notice as the best of that class."—Mr. JAMES LAWSON, The Gardens, Horticultural College, Swanley.

The most famous
Early Maincrop Marrowfat
in cultivation.

CARTERS DAISY PEA.

For full particulars, see opposite page.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS DAISY (*see Photograph on opposite page*).—**First Class Certificate, Royal Horticultural Society.**—This grand dwarf Marrowfat Pea has been before the public for some years, and still stands at the head, as confirmed by the great independent trial of Peas conducted by the Royal Horticultural Society of England in 1902. Their experiment comprised over 80 varieties, and CARTERS DAISY gained the First Class Certificate given by the Society. CARTERS DAISY PEA is an early main crop, growing about 15 inches high. The haulm is very robust, and the crop of giant, well-filled pods of good colour is enormous.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Mr. J. MAYNE, of Bieton Gardens, Devonshire, in the *Gardeners' Chronicle* writes:—"CARTERS DAISY PEA.—So many satisfactory accounts have been given in these pages of this variety of Pea that it may seem superfluous again to write its praise, but having grown it for several seasons I can confidently recommend it as one of the best second early dwarf varieties at the present time. It is of robust growth, reaching nearly 3 feet in height last year, but in ordinary summers the plants do not get much above 2 feet, and are literally crowded with fine pods nearly 6 inches long, each containing from 8 to 10 fine Peas of excellent flavour. I have been much impressed by the length of time the pods will hang without getting dry, having saved the crop for seed. The pods are usually borne in pairs, and the raisers are certainly to be congratulated upon giving us such a good Pea. I advise those who have not yet grown this Pea to procure a quart of seeds from the raisers and sow as soon as the state of the soil will allow, and I will vouch for it they will not be disappointed."

Carters Torpedo.—This grand Marrow Pea supplies the long-felt want of a first-class table Pea that will come into bearing between Carters *Early Morn* and the original *Duke of Albany*, which it imitates in all its best characteristics, but is 12 inches shorter in the haulm and seven days earlier in maturing. The pods, which are dark green, are borne upon strong branching foliage, and contain from 8 to 10 enormous Peas, very sweet when cooked. Height, 3½ to 4 feet.

Price 1s. 9d. per pint, 3s. per quart.

Carters Dwarf Telephone.—The result of several years' work in the effort to get a Pea with all the excellent qualities of Carters *Telephone*, without its tall growth. Its height is 1½ to 2 feet; habit stocky, healthy, and vigorous, and remarkably uniform.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

NOVELTY.

Carters Evergreen Delicatesse. Award of Merit, R.H.S., 1908.—A larger and deep green podded selection of our well-known *Delicatesse (Petit Pois)*, which we introduce to our customers' notice as being selected for its regular and heavy cropping properties.

Second early wrinkled. Height, 2½ feet.

Price 2s. 6d. per pint.

				Per quart—s.	d.

CHARLES I.—Very prolific, long curved pods, good flavour	3 feet	...	2 0
DUKE OF YORK.—Good useful variety, few days earlier than <i>Duke of Albany</i>	4½ feet	...	2 0
FAVOURITE MARROWFAT.—Improved type of <i>Yorkshire Hero</i>	2 feet	...	1 6
HERALD — Long curved pods	1½ feet	...	2 6
SUNRISE — Hardy and prolific	3 feet	...	1 6

FRENCH PEAS.

Carters Delicatesse (*Petit Pois*).—This Pea has gained a great renown among the continental connoisseurs, who regard it as a delicacy. It is a second early wrinkled, with haulm about 3 feet; very prolific; long curved pods hanging in pairs.

Price 1s. 3d. per pint, 2s. per quart.

Carters Giant Edible Podded.—Our friends on the Continent have assiduously developed the Edible Podded Pea section, and have thus obtained a delicious vegetable not sufficiently well known in this country. The variety we now offer grows about 5 feet high, with very broad fleshy pods.

Price 1s. 9d. per pint, 3s. per quart.

CARTERS HARVESTMAN PEA.

For description see opposite page.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

NOVELTY.

Carters Harvestman. Award of Merit, R.H.S., 1908—

This grand Pea, which is a cross between *Express* and *Duke of Albany* (Seedling No. 214), possesses all the qualities of *Duke of Albany*, but the pod is distinct in shape, more regular in growth, not quite so tall, and altogether superior. Its appearance and cropping qualities are far ahead of either *Duke of Albany* and *Duchess*, or any of a similar class, and we are confident that there is a great future before it. For market or garden it is a most profitable Pea. Main crop Height, 5 feet.

Price 2s. 6d. per pint. Stock limited.

His Grace The Duke of Buccleuch's Head Gardener says:—" *Harvestman*. Good main crop Pea, splendid cropper, with large well-filled pods of good colour, and fine flavoured Peas. Height, 5 feet."—Mr. JAMES WHYTOCK, The Gardens, Dalkeith, N.B.

The Right Hon. The Earl of Mansfield's Head Gardener says:—" *Carters Harvestman* Pea. This Pea I have found to be an excellent one. Both as a free cropper and for quality, I think it difficult to beat. Pods are of good size and well filled with large Peas. Height, about 5 feet; strong grower."—Mr. W. WARD, The Gardens, Ken Wood, Hampstead.

The Right Hon. The Earl of Abingdon's Head Gardener says:—" *Harvestman* is a real good cropper and fills out well. Anyone requiring a Pea for crop and quality combined, this is the one to grow."—Mr. W. BROWN, The Gardens, Wytham Abbey, Oxford.

The Right Hon. The Earl of Sandwich's Head Gardener says:—" *Pea Harvestman*. A fine bearer and strong grower, with excellent flavour, a good all-round Pea."—Mr. F. HANSFORD, The Gardens, Hooke Court, Beaminster, Dorset.

The Right Hon. Viscount Midleton's Head Gardener says:—" *Harvestman* Pea. Height, 5 feet. This season the haulm has been strong, and for a main crop is superior to the *Duke of Albany* both in productiveness and succession of bearing. The pods are generally in pairs, and average nine, which are of delicious flavour. This is a very fine main crop variety, and I can speak highly of it."—Mr. QUAINTON, The Gardens, Peper Harrow Park, Godalming.

Sir Edmund Loder's Head Gardener says:—"This is a variety of much merit and of compact growth, superior to either of its parents; bears profusely, and the pods are packed with fine large Peas of delicious flavour."—Mr. W. A. COOK, The Gardens, Leonardslee, Horsham.

Admiral Brand's Head Gardener says:—" *Harvestman*. A fine main crop Pea of the *Duke of Albany* type, but a great advance in the length of time it stands up, giving a good succession of pods. Height, 4½ feet. This should surely find its way where crop and quality are the main points. The pods are larger than the *Duke*, not quite so curved, hanging in pairs, from 18 inches to the top of haulm; constitution excellent."—Mr. W. BACK, The Gardens, Glynde Place, Lewes, Sussex.

We were awarded the Silver-Gilt Knightian Medal for a Large Collection (150 varieties) of Culinary Peas exhibited at Royal Horticultural Society's Hall, Vincent Square, Westminster, July 20th, 1909.

Extract from the *Gardeners' Chronicle*, of July 24th, 1909:—"Messrs. James Carter & Co., High Holborn had a very representative collection of edible Peas in dishes, there being some 150 kinds. They were all sown on the same date in the open. The earliest were getting ripe whilst very late ones, such as *Kearguard*, required yet some three weeks to fill the pods. Fine samples of *Quite Content*, *Harvestman*, *Duke of Albany*, *International*, *Superlative*, *Leviathan*, *Stratagem*, *Early Morn*, *Centenary*, *Telegraph*, *Daffodil*, and others were plentiful. There were many seedlings in the exhibit."

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

James Carter & Co.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

Carters Exhibition.—

Main crop. Height, 5 feet. Seed large, green, and wrinkled. A magnificent Pea, the result of a selection from Carters *Model Telephone*, the selection having been made for the purpose of obtaining an Exhibition Pea possessing all the good points of that celebrated variety, but bearing even a larger and richer coloured pod.

We claim that in every respect we have been successful, this superb variety bearing immense rich deep-green pods, perfect in shape, and well filled with large green Peas of excellent flavour, being unequalled for Exhibition purposes, as also for general garden work.

Price—

2s. per pint, 3s. 6d. per quart,
1s. per packet.

Thirty-six First Prizes
reported last Season.

For our Collection of Green
Peas, June to November,
see page 103.

Monthly Operations

with hints on the cultivation
of the principal
Flowers and Vegetables.

Post free 6d.

Carters Danby Stratagem.—RE-SELECTED STOCK—Award of Merit, Royal Horticultural Society.—A distinct improvement on the original *Stratagem*, having longer, straighter, and broader pods, very freely produced. The haulm is very robust, and extends to a height of $2\frac{1}{2}$ feet, bearing a profusion of immense pods, many 6 inches in length, and frequently containing ten large full-flavoured Marrow Peas.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters Dwarf Monarch.—A deep green wrinkled Marrow, with a square ended pod of the *Autocrat* type, but earlier; producing pods in pairs which contain eight and nine peas of a splendid deep green colour, and of finest flavour; wonderfully prolific. Height, 2 feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters G. F. Wilson.—An old and popular late Marrow, with a robust and healthy growth. Standing all sorts of weather changes better than some others. Height, 3 ft.

Price 1s. 6d. per pint, 2s. 6d. per quart.

Carters Improved Omega.—A highly selected long-podded type of this popular Pea. Height, 2 to $2\frac{1}{2}$ feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters Re-selected Duke of Albany.—A great advance on the original stock, the pods being straighter and longer, and should be grown by all who know the original variety. Height, 5 feet.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley, says:—‘Carters *Duke of Albany* Re-selected. *Duke of Albany* received an A.M., July 5th, 1901. This is a fine true stock of this now well known excellent variety.’

Price 1s. 9d. per pint, 3s. per quart.

Glory of Devon.—Award of Merit, Royal Horticultural Society. A Marrowfat Pea of remarkable growth and enormous pods. Height, about 3 feet.

Price 1s. 9d. per pint, 3s. per quart.

Carters Pride of the Market.—A fine main crop blue Marrowfat Pea, belonging to the same family from which our *Stratagem* was selected. Being a strong grower it requires to be thinly sown. Height, $1\frac{1}{2}$ to 2 feet.

Price 1s. 3d. per pint, 2s. per quart.

Carters Seedling.—A superior main crop Marrow Pea, the result of two distinct crossings, its parents being the well-known and valuable Peas, *Stratagem*, *Queen*, and *Autocrat*. Height, 3 feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters Majestic.—A splendid mid-season Marrowfat Pea; this highly selected strain possesses splendid cropping properties and is valuable alike for the table and exhibition. Height, 2 to $2\frac{1}{2}$ feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Hints on Cultivation.—Early round Peas may be sown out of doors any time from November onwards, but the spring is generally the season when the largest quantities of both Early and Main Crop Marrow Peas are put in, extending to June for the latest crops. They thrive best in ground that has been deeply trenched and manured for a previous crop; the seeds should be planted from $1\frac{1}{2}$ to 3 inches deep, in either single or double rows, and the taller varieties must be staked when they are from 4 to 6 inches high; the tallest kinds should not be less than 6 feet apart in rows, and the dwarf varieties half this distance. Peas will stand a good deal of drought if the roots find their way into some nice rich material.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

POPULAR MAIN CROP MARROWFAT PEAS.

Carters Model Telephone.

A re-selection for robustness and delicacy of flavour from *Telephone*, a main crop wrinkled marrow, which bears to-day a world-wide reputation. It is remarkably prolific, bearing large pods of very attractive appearance; for soils of a light nature Peas we strongly recommend this variety. Peas wrinkled, 9 to 11 in a pod, delicious when cooked. Height, 5 feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Carters Battleship.

The blunt-ended pod of this robust Marrowfat Pea is one of its peculiarities. The fine dark green pods, which hang in pairs, are filled with large Peas of a rich flavour and a bright green colour when served at table; the haulm is exceedingly strong, and stands both drought and mildew better than most others. Height, 5 feet.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting its trials at Wisley, says:—"Carters *Battleship* Height, 5 feet. Haulm and pods pale green; pods in pairs; heavy crop."

Carters Model Telegraph.

A selection from our original *Telegraph*, which is well known. Very valuable as a table Pea, on account of the size and fine dark colour of the pods. The seed is round and of a deep green colour, which is retained when cooked. The flavour is also of the sweetest. Height, 5 feet.

Price 1s. 6d. per pint, 2s. 6d. per quart.

Carters Anticipation.

Anticipation grows to a height of about 2½ feet, and sown at the usual season it comes into bearing early in July. The foliage is of a medium shade of colour, the habit robust, with immense straight pods containing Peas of an exquisite flavour when cooked. A grand dry-weather Pea and resister of mildew.

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

NOVELTY

Carters Latest Giant.

This splendid late Marrowfat Pea is the outcome of a cross between *Gladstone* and *Exhibition* in 1903, and has been exhibited in our Trial Grounds and at various Royal Horticultural Society Shows under Seedling No 241. It is an all-round grand selection, possessing the free podding and strong habit of *Gladstone*, but bearing handsome well-filled pods very much larger than that excellent variety. The pods invariably contain eleven large deep-coloured Peas. It is fit for exhibition and unequalled for market. Height, 4 feet. It is well described by the name *Latest Giant*.

Price 2s. per half-pint. Stock limited.

The Right Hon. Viscount Midleton's Head Gardener says:—"Latest *Giant* Pea. Height, 4 feet. This is a Pea of a very strong and robust constitution, haulm very dark green, the pods are long and handsome, each containing nine, chiefly in pairs. It is more desirable than the parents, as it comes in so much later, though it has the cropping proportions of *Gladstone* Pea. It really means that fine Marrowfat Peas can be obtained in October, which should prove a boon to many large establishments."—Mr. QUAINTON, the Gardens, Peper Harrow Park, Godalming.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS LATEST GIANT. *For description see opposite page.*

Carters Address for all
Correspondence, RAYNES PARK, LONDON, S.W.—1911.

NEW LATE MARROWFAT PEA.

CARTERS DREADNOUGHT.

This remarkable Pea has been selected by us as a grand addition to the late Main Crop Section. It is the practice of our house to make comparative tests of all the new Peas introduced by growers both at home and abroad. After careful comparison we have failed to find a pea that pleases us more as a variety to come in between the Main Crops and the very late peas than *Dreadnought*. It has large bold pods well filled with Peas of delicious flavour.

We have been instrumental in introducing many Peas which have become standard varieties, such as *Telephone*, *Telegraph*, *Stratagem*, *Pride of the Market*, and *Daisy*, known all over the world, and we undertake to prophesy that this novelty is destined to take an equally permanent place, not only among amateurs, exhibitors, and connoisseurs at the table, but also as a profitable market Pea. Its large deep green well-filled pods, and its resistance to mildew and drought, are its distinguishing characteristics.

We have given it the name of *Dreadnought* at the suggestion of an esteemed horticulturist. Height, 3 feet.

Price—

4s. per quart, 2s. 3d. per pint,
and 1s. per packet.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

GREEN PEAS—JUNE TO NOVEMBER.

103

We have offered a selection of choice Garden Peas with so much success during the past few seasons that we again quote the group as improved and representing the best collection calculated to produce Peas for five months, if sown at varying periods, during the spring and summer. It would be difficult to give precise dates for putting the seed into the ground, as so much depends upon soil and situation.

Successional sowings of these Peas should be made at any time between the dates named.

Name.	Description.	Height.	When to Sow.	Expect Ready to Pick.	PRICE, Carriage Free.		
					Per packet.	Per pint.	Per quart.
<p>CARTERS EARLY MORN. The best Early Marrowfat Pea; it has large pods, and is as early as the small white round varieties; the demand increases each year; of splendid flavour. (See Catalogue, page 79.)</p>	First Early Marrowfat.	3 ft.	End of March.	During June.	1s.	2s.	3s. 6d.

For full particulars, see opposite page.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS MICHAELMAS (*see Photograph on opposite page*).—This grand Pea quite oversteps the boundary hitherto set by the times and seasons, and is absolutely distinct. Late varieties of Peas of past fame have been late mainly by reason of their strawy character. The constitution of Carters *Michaelmas* Pea is not run through in straw, but we have fixed a dwarf bushy growth of 2½ feet, which holds back its natural force and throws it into the pods; consequently, while being very prolific, its colour in pod is of the deepest green, and its pods are large and well filled. We have proved this Pea to possess a reserve of strength which will enable it to resist the drought and the mildew to a degree hitherto unknown in a Pea.

THE ROYAL HORTICULTURAL SOCIETY, in their report of trials at Wisley, say:—"Carters *Michaelmas*. Height, 3½ feet; haulm and pods very dark green; very sturdy; pods in pairs; heavy crop."

Price 2s. per pint, 3s. 6d. per quart, 1s. per packet.

Sir Edmund Loder's Head Gardener says:—"Carters *Michaelmas* is still to gather—September 21st—and what I said last year I maintain now, we shall have peas till after *Michaelmas*, and this variety produces peas of the very best quality."—Mr. W. A. Cook, The Gardens, Leonardslee, Horsham.

The Gladstone. Carters re-selected stock. A fine late variety, bearing long sickle-shaped pods, dark in colour, very prolific. Fine for exhibition. Height, 3½ feet.

Price 2s. per pint, 3s. 6d. per quart, and 1s. per packet.

Ne Plus Ultra.—Carters re-selected. This is a highly selected stock of an old and favourite variety, it is exceedingly prolific, bearing blunt ended pods with peas of very fine flavour. A splendid Pea for late crops. Height, 6 feet.

Price 1s. 6d. per pint, 2s. 6d. per quart.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

SIX NEW AND DISTINCT RADISHES.

All invaluable for early frame work.

(See Photographs on opposite page.)

No. 1.—Carters Forcing Olive.

Splendid rich colour, very quick growing, having small top; flavour sweet and delicate.

Price 8d. per ounce, 3s. 6d. per pint, 3d. and 6d. per packet.

No. 2.—Carters Early Round White Tipped.

A decided acquisition, the flavour of the small tender roots being as fine as one could possibly wish.

Price 8d. per ounce, 3s. 6d. per pint, 3d. and 6d. per packet.

No. 3.—Carters Extra Early Scarlet.

An exceedingly quick-growing globe-shaped Radish, with a showy appearance in the dish, and a peculiar nutty flavour.

Price 8d. per ounce, 3s. 6d. per pint, 3d. and 6d. per packet.

No. 4.—Carters Extra Early White Olive.

This radish has been specially selected for its crisp texture and fine flavour. It produces very little top and matures with remarkable rapidity.

Price 8d. per ounce, 3s. 6d. per pint, 3d. and 6d. per packet.

No. 5.—Carters Delicatesse.

An attractive breakfast dish. Its peculiar shape, crisp flesh, and nutty flavour give this fine selection a distinct advantage. Suitable for forcing.

Price 8d. per ounce, 3s. 6d. per pint, 3d. and 6d. per packet.

No. 6.—Carters Icicle.

So named because of its unique transparent whiteness, attractive appearance, and freshness early in the season. The earliest long white Radish, of extraordinary crispness and tenderness. We offer this as a companion to our *Long Forcing Scarlet* Radish.

Price 8d. per ounce, 3s. 6d. per pint, 3d. and 6d. per packet.

Attractive bunches of the above varieties of Radishes formed part of Two Grand Prix and Gold Medal Exhibits at the Franco-British Exhibition, 1908.

Monthly Operations in the Garden, with Hints on the cultivation of the Principal Flowers and Vegetables. Post Free, 6d.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

RADISH.—*Continued.*

Carters Long Forcing Scarlet (*see Photograph*).—A great advance on the old varieties. The very best long scarlet Radish for early work. Fresh, crisp, and tender.

Price **3s. 6d.** per pint, **8d.** per ounce, **3d.** and **6d.** per packet.

Carters Early Round White.—A small very quick growing variety, having a very sweet and delicate flavour.

Price **3s. 6d.** per pint, **8d.** per ounce, **3d.** and **6d.** per packet.

Carters French Breakfast.—There are so many inferior strains of this very popular Radish (introduced by our house from Paris years ago) that we recommend all connoisseurs of a fine appetising breakfast dish to grow only the real original type.

Price **2s. 6d.** per pint, **6d.** per ounce, **3d.** per packet.

Carters Triumph.—A new turnip-shaped Radish, mottled and striped. This is an altogether novel feature in Radishes; they are prettily mottled and splashed with carmine on delicate white flesh, which makes them, when on table, as attractive to the eye as they are to the palate.

Price **1s.** per ounce, **3d.** and **6d.** per packet.

			Per quart. <i>s. d.</i>	Per pint. <i>s. d.</i>	Per 2 oz. <i>s. d.</i>	Per pkt. <i>s. d.</i>

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

RADISH.—Continued.

SUMMER AND WINTER VARIETIES.

For particulars of new early Radishes, with Photographs, see pages 106 and 107.

Carters Crimson Marble.—A choice selection, symmetrical in form; flesh white, crisp, and solid; colour rich vermilion-erimson; fine mouse-tail root.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

Carters "Knickerbocker."—A veritable giant, frequently growing to a length of 8 inches, and several inches in thickness. For exhibition purposes it is invaluable.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

Carters London Long Red.—The particular fancy of the London Markets.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

Red Turnip. —Rich scarlet	3 6	2 0	0 6	0 3
White Turnip. —Fine-flavoured	3 6	2 0	0 6	0 3

WINTER VARIETIES.

Turnip-Shaped China.—A scarlet variety of the *China Rose* Winter Radish. It may be sown at intervals from spring until autumn, and the roots obtained from late sowings can be kept in store for winter consumption. The root is round, of a fine scarlet colour, $2\frac{1}{2}$ to 3 inches in diameter; flesh pure white, of an agreeable and mild flavour.

Price 6d. per ounce, 3d. per packet.

Long Black Spanish.—For autumn sowing; large and distinct.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

China Rose, Oval Shaped.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

The Cultivation of Radish.—Sow on a moderate hot-bed in January, February, and March; also every month during summer in well-prepared places in the open. The Radish thrives best when quickly grown in a rich deep moist soil. A sowing in frame, or on a warm border in October, is desirable for winter use. Water thoroughly during hot weather.

	Per oz.—s. d.
Carters Mammoth Salsafy (or Vegetable Oyster) ...6d. per packet	1 3
Carters Improved Scorzonera6d. ,,	1 0

These vegetables are much liked by some who interest themselves in the culture of things not found in every garden.

Cultivation.—The ground should be well trenched and manured during Autumn. Sow during March and April in drills about 15 inches apart. Thin out the plants to from six to eight inches apart for Salsafy but allow rather more room for Scorzonera. The roots should be taken up in November and stored in the same manner as Carrots.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

SALAD PLANTS.

Everyone should enjoy the pleasure of a salad several days a week, at all events during the summer season, with but trifling expense. It is a wholesome addition to more substantial diet, rendering it grateful to the palate, and it is a pity that it is so rarely brought to table in an average household. We will enumerate a few of the almost unknown salad plants, with some notes on their cultivation.

American Land Cress may be sown at any time during spring and summer out of doors. It is a useful variety tasting something like water cress.

Price 6d. per packet.

Beet.—See pages 6 to 8.

Celeriac, Carters Improved (or turnip-rooted Celery).—Pure white root, refined flavour. It is becoming popular in this country, owing to the more frequent contact nowadays of the English people with continental dishes. Seeds should be sown in pans in March, and the plants set out in shallow trenches to mature.

Price 6d. and 1s. per packet.

Chervil is used for seasoning soups and mixing in salads. It is grown from seed sown in spring and in summer for successional crops. The soil should be rich and light, and the bed 4½ feet wide, with an alley on each side. Sow seed in shallow drills across the bed, 9 inches apart, and rake over the surface. When the leaves have grown an inch or two, cut off for use as required. Price 6d. per packet.

Chicory.—The majority of people know Chicory as an adulterant of Coffee, but few are aware of the part it plays in the salad bowl, to which it adds a pleasing flavour. Chicory is so easily grown and so useful, that it should receive more attention from amateurs who desire to grow salads. This plant is sown in late spring in the open ground, and thinned out to about a foot apart to grow through the summer, well watered in dry weather. With the change to a colder season, the leaves decay and nearly all drop off. The roots are then lifted, and a few at a time placed in boxes of rich sandy soil, leaving crown well above the surface. After a good watering these boxes are stood in a perfectly dark place, and in a few weeks, according to the heat, some nicely blanched leaves will be fit to gather. More roots, kept in a cool place until wanted for bringing along in heat, may be similarly treated.

Price 6d. per packet.

Whitloef is a distinct variety of Chicory, largely grown in the suburbs of Brussels, and chiefly noted for the quality of its leaves.

Price 6d. per packet.

Chives is a hardy perennial found in rocky pastures. It is grown in gardens for its leaves, as a substitute for early onions. Propagate by dividing the roots into clumps in spring and autumn and plant from 8 to 12 inches apart. In order that the leaves be tender and succulent they should be often cut.

Plants price 6d. each.

Clary, used for flavouring soups.

Price 6d. per packet.

Corn Salad or Lambs' Lettuce.—

This is a hardy annual, and in great demand as a salad plant on the Continent. In France it is preferred, admired, and relished in winter and spring instead of Lettuce, but it is not nearly so highly appreciated in

Britain as it deserves. But when Endive is scarce Corn Salad is of great service, and for early use should be sown in frames or in boxes and placed in slight heat. For summer use it may go on the border or in lines in a sunny spot, amongst the ordinary low-growing vegetables.

Price 6d. per packet.

Cress.—See page 46.

Cucumber.—See pages 47 to 49.

Dandelion.—The common Dandelion is a useful salad plant, especially when Endive and Lettuce are scarce in winter. The roots are grown in a similar manner to Chicory, and large quantities of the blanched leaves are sold in the markets for this esculent. Price 6d. per packet.

Endive.—See page 50.

Lettuce.—See pages 56 to 60.

Mustard.—See page 46.

Nasturtium, of which the green seeds make a delightful salad. This plant is both a dwarf and a climber, and very ornamental as well as useful. The flowers are often used in salads, occasionally for decorating, and the leaves and young green plants are frequently pickled.

Price 3d. and 6d. per packet.

Purslain is a succulent plant and raised from seed, which may be sown in light garden soil in March on a warm sheltered border in a bed, and attended to in the same way as for Chervil.

Price 6d. per packet.

Radish.—See pages 106 to 109.

Rampion.—A plant producing a spindle-shaped root of light colour and of agreeable flavour. It may be raised from seed if sown in a bed in an open warm aspect, and in soil of a rich compost, of a light open texture. Water well in dry weather. Should the season prove mild, the plants will be ready for use in November.

Price 6d. per packet.

Shallots.—The Shallot is much in favour as a relish for soups and for pickling. Offsets are often planted in the autumn, but the main crop is usually got in early in the year. The bulbs may be planted at any suitable time during this period, 12 inches between each row, and 6 inches from set to set. The bulbs should be firmly pressed in just beneath the surface of the soil, and here they remain. As the growth matures in spring, gently draw away the soil round the bulbs when they have become established, and if they look sickly, apply soot to the surface soil for maggots, and use the hoe for weeds. Lift, dry, and store crop as soon as ready, probably the end of June. For exhibition, twenty-five cloves or bulbs should be placed on a large plate, and see that they are firm, of medium size, ripe, of good colour, and nice small necks. There are two types, the Mammoth and the ordinary Shallot.

Shallot Seed. Jersey Red Skinned.

Price 6d. and 1s. per packet.

For price of bulbs, see page 269.

Tomato.—See pages 112 to 115.

Watercress.—Watercress may be successfully grown from seed if sown in a shaded border and kept well watered when started.

Price 6d. per packet.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

SPINACH.

The Cultivation of Spinach.—Sow Round Spinach in succession from January to June, and Prickly or Winter Spinach the first week in August to stand the winter. Sow New Zealand Spinach in March in heat and transplant about the end of May, setting the plants about 3 feet apart.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

Carters Seedmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS "SUNRISE" TOMATO.

FIRST CLASS CERTIFICATE, R. H. S.

Confirmed as Outdoor Variety, after growth at Wisley, Oct. 10th, 1907.

During 1905 an extensive trial of Tomatoes was made by the Royal Horticultural Society, 71 varieties being sent in from all the leading houses.

The only First Class Certificate was given to CARTERS "SUNRISE," and the following note is attached to the report:—

"Tomatoes have reached such perfection that it is now very difficult to raise a variety superior to those already in commerce. In this trial only one stood out as being of exceptional value, viz., 'Sunrise.'"

"F.C.C confirmed as Outdoor variety, after growth at Wisley, Oct. 10th, 1907."

It is some time since such a high honour has been granted to a Tomato.

The chief points in *Sunrise* are—

Its Earliness.—It ripens several days earlier than most varieties.

Its Prolific Character.—*See Photograph.*

Its Cropping Properties.—*See Photograph and Testimonials.*

Its Healthy and Robust Constitution.—No trace of disease.

Its Solid but Delicate Flesh.—Contains very few seeds and practically no eye.

Its Evenness of Size as a Dessert Fruit.

Its bright Scarlet Colour and rich Acid Flavour.

Its equal value for Indoor or Outdoor Cultivation.

His Grace The Duke of Northumberland's late Head Gardener says:—"The fruits of *Sunrise* Tomato I exhibited at the Royal Horticultural Society's meeting on March 6th were sown in September and commenced fruiting in December—grown in 6-in. pots. It is a splendid winter fruiting variety."

His Grace The Duke of Buccleuch's Head Gardener says:—"We grew fifty plants of *Sunrise* Tomato in pots here. It is a good cropper, sets very freely, and bears fine medium-sized fruits of splendid quality and flavour."—Mr. J. WHYTOCK, The Gardens, Dalkeith.

The Right Hon. The Earl of Carlisle's Head Gardener says:—"I may say I gave *Sunrise* Tomato a trial last season and was highly pleased with it. It sets very freely and produces enormous trusses of highly-coloured medium-sized fruits of good quality."—Mr. A. E. SUTTON, Castle Howard, *January 9th, 1907.*

The Right Hon. The Earl of Jersey's Head Gardener says:—"Sunrise Tomato has cropped grandly outside this season. It has been quite the best one here."—Mr. J. HAWKES, The Gardens, Osterley Park, *October 5th, 1906.*

The Right Hon. The Earl of Lathom's Head Gardener says:—"A marvellous cropping variety, and destined to become the Tomato for market growers especially. I never saw its equal for cropping, and the fruits are just the size the market growers require—medium, with good appearance and no waste."—Mr. B. ASHTON, The Gardens, Lathom House.

The Right Hon. The Earl of Onslow's Head Gardener says:—"I have grown your *Sunrise* Tomato since first it came out, and I consider it the best Tomato ever sent out. It is earlier than most, no trouble to set, nice even size, and very heavy cropper, above all, the quality is unsurpassed."—Mr. H. W. BLAKE, The Gardens, Clendon Park, Guildford.

The Right Hon. The Earl of Sandwich's Head Gardener says:—"I have grown your *Sunrise* Tomato out of doors as well as in this season with marvellous success, and consider it a perfect Tomato either for in or out door culture."—Mr. F. HANSFORD, The Gardens, Hooke Court, Beamister.

The Hon. Vicary Gibbs' Head Gardener says:—"We have just finished *Sunrise*. It is a capital Tomato, a wonderful setter, fine quality and flavour. They are the finest lot I have ever seen."—Mr. E. BECKETT, The Gardens, Aldenham House, Elstree.

The Right Hon. Viscount Portman's Head Gardener says:—"There is no doubt but that this is an excellent variety. The fruits are produced in abundance when the plants are quite small. When ripe they are of even size, good colour, and with smooth skins. Either for market or private gardens this will prove to be one of the best."—Mr. H. PRINSEP, The Gardens, Buxted Park.

The Right Hon. Viscount Middleton's Head Gardener says:—"Sunrise Tomato. I have never had such a heavy crop as I have had this season, especially outside on a wall facing south. I have counted as many as five large trusses, many carrying a dozen good-sized fruit and all finished to a splendid colour, considering what wretched conditions prevailed for successful culture. They have also carried large crops inside, fruiting all up the plants from six inches from the border to the top of the house."—Mr. QUANTON, The Gardens, Peper Harrow Park, Godalming.

The Right Hon. Lord Poltimore's Head Gardener says:—"This variety maintains all its good points of the first trial, and is probably unrivalled as a cropper."—Mr. T. H. SLADE, The Gardens, Poltimore Park.

The Right Hon. Walter Long's Head Gardener says:—"Carters *Sunrise* has proved a splendid acquisition, so easy to set and free in cropping. I predict a large inquiry for it among all classes of growers. Gardeners visiting here have been much impressed with it."—Mr. W. STRUGNALL, The Gardens, Rood, Ashton.

Carters *Sunrise*.—The finest Tomato for Indoor and Outdoor culture.

Price 2s. 6d. and 3s. 6d. per packet.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

TOMATO. CARTERS DUKE OF YORK.

Awarded the First Class Certificate of the Royal Horticultural Society and Four Silver Medals, and included in the Gold Medal Collection, Shrewsbury, 1909.

238 FIRST PRIZES REPORTED
to us by Customers.

CARTERS DUKE OF YORK.—This grand variety still holds a very high position in public favour. Colour rich scarlet, splendid cropper, almost globular in shape; flesh very firm, fine flavour. A leading feature of this superb variety is that it ripens its fruit with the most pronounced uniformity, whilst the profusion of clusters, averaging six and ten evenly formed fruit each, makes it conspicuously handsome. These clusters contain variously sized fruits, large and medium, both for the table and exhibition. It can be grown in the open, but does not ripen so quickly as our Outdoor variety. Invaluable as an exhibition variety as for private growers and market purposes.

Copyright James Carter & Co.

PHOTOGRAPH SHOWING SIZE OF FRUIT.

Price 2s. 6d. and 3s. 6d. per packet.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

TOMATO.—*Continued.*

Carters Outdoor.—This variety readily fruits under the warmth of a south wall, or along the front of a greenhouse, in any situation where the full influence of the sun is felt and away from cold winds. In shape the fruit is not so round as our *Duke of York* or *Sunrise*.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters Perfection.—Quite distinct from any other variety named *Perfection*. It is very handsome in form, distinct in colour, exceedingly prolific, and of exquisite flavour. **Ninety-six First Prizes reported.**

Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters Blenheim Orange.—We raised and introduced this extraordinary Tomato, a curious cross between the red and yellow. Gathered when quite ripe they are luscious and juicy, and the nearest approach to the flavour of a plum. It contains but very few seeds.

Price 1s., 1s. 6d., and 2s. 6d. per packet.

Carters Dedham Favourite.—Well known and deservedly popular.

Price 6d., 1s., and 1s. 6d. per packet.

Carters Greengage.—Introduced by us, and the first of the golden section of any value. Awarded a First Class Certificate by the Royal Horticultural Society.

Price 6d., 1s., and 1s. 6d. per packet.

Carters Market Favourite.—Price 6d., 1s., and 1s. 6d. per packet.

Carters Sandwich Island.—Price 6d. and 1s. per packet.

Carters Red Cherry.—A very prolific variety, about the size of a cherry. Price 6d. and 1s. per packet.

Carters Yellow Cherry.—Companion variety to our *Red Cherry*. Colour, bright yellow. Price 6d. and 1s. per packet.

Carters Plum.—Plum-shaped, of prolific habit and good flavour. Price 6d. and 1s. per packet.

Carters Peach.—A curious variety, quite distinct from any other sort grown, quite peach-like in appearance. Price 6d. and 1s. per packet.

Carters Red Currant.—Smallest growing variety, hanging in long trusses, very pretty for decorative purposes. Price 6d. and 1s. per packet.

The following can also be supplied, price 6d. and 1s. per packet:—

CHALLENGER.	HAM GREEN FAVOURITE.	LARGE YELLOW.
CHERMIN ROUGE.	HAREFIELD GOLDEN GEM.	STIRLING CASTLE.
COMET.	HATHAWAY'S EXCELSIOR.	TROPHY.
HACKWOOD PARK.	LARGE RED.	

Cultivation.—Sow seed in February and March, and transplant into pots to harden off; afterwards plant out against a south wall in good soil; or they may be planted in a warm border, and carefully staked to keep the plant and fruit from straggling on the earth. If cultivated in pots the treatment should be the same, with the addition that liberal waterings of manure and rain-water will be found necessary, especially during the hottest part of the summer.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS EARLY LONG FORCING TURNIP.

Copyright

James Carter & Co.

Carters Early Long Forcing (see *Photograph*).—A new and distinct Turnip for frame or outdoor work. It matures very rapidly and is fit for table as soon as any other variety we know of. In shape it is distinct, whilst the flesh is close, firm, and crisp.

Award of Merit, R. H. S., for Roots sown in cold frame March 6th and exhibited May 8th.

Price 3s. 6d. per pint, 8d. per ounce, 6d. and 3d. per packet.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

TURNIPS FOR FRAMEWORK AND EARLY USE.

Copyright

James Carter & Co.

A NEW EARLY WHITE TURNIP.

Carters Little Marvel.—A cross between *Early White Milan* and *Jersey Lily*. This is a highly re-selected stock, the tendency to flatness in some of the roots having been entirely eradicated, the tops are small and compact. It is undoubtedly the quickest white globe-shaped Turnip in cultivation. Flesh crisp and solid and, as aptly described by one of our customers, "is a Little Marvel." Very distinct in both habit and foliage, and is a splendid Table Turnip. Nineteen First Prizes reported last season.

This remarkable cross-bred Turnip closely follows the *Milan* and is considerably forwarder than *Jersey Lily*. It must become popular with gardeners for early work as it is as good as it looks.

Price 3s. 6d. per pint, 8d. per ounce, 6d. and 3d. per packet.

THE ROYAL HORTICULTURAL SOCIETY, reporting last season's trials at Wisley, says:—"Carters *Little Marvel* Turnip. White, round, handsome; foliage short and sturdy. A very early variety that should be valuable for forcing."

"A NEW TURNIP—LITTLE MARVEL.—This new introduction from Messrs. Carter & Co., High Holborn, is a great gain in earliness and quality, and will be a most valuable root for first crop in the open. So far I have only had roots grown in frames, and when forced they were superior to the *Early Milan* variety. I grew the *Milan* by the side of the new *Little Marvel* to test its earliness, and in this respect it is equal to the older variety. It should be a useful root for first crop in the open, or for a quick crop required in a short time, and it can be grown for a summer crop."—G. WYTHES, in *The Garden*, May 20th, 1906.

The Right Hon. Viscount Midleton's Head Gardener says:—"Little Marvel Turnip. Foliage dwarf; white, round, handsome shaped roots; very solid, very quick maturing its growth, and should stand forcing well."—Mr. QUANTON, The Gardens, Peper Harrow Park, Godalming.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

TURNIPS FOR THE GARDEN.

Copyright

James Carter & Co.

134 FIRST PRIZES REPORTED BY CUSTOMERS DURING THE PAST TWO SEASONS.

Carters Jersey Lily (*see Photograph*).—The most perfect in outline, and the best White Garden Turnip grown. In shape as round as an orange, of exquisite flavour, with single tap root, and very distinct small top.

Price 3s. 6d. per pint, 8d. per ounce, 6d. and 3d. per packet.

Carters White Milan.—This is an exceptionally fine selected stock, strongly recommended for early garden work. It is as quick as a Radish, clean in growth, and of very fine flavour.

Price 2s. 6d. per pint, 6d. per ounce, 3d. per packet.

The Cultivation of Turnip.—Sow Carters *Little Marvel* or Carters *Jersey Lily* for early use the first week in March on a gentle hot-bed under glass, and later in a warm situation in the open border. For main succession crops, sow every three weeks in the open ground until the beginning of July. For winter use, sow early in August and again in September.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

TURNIPS.—*Continued.*

Carters Purple-Top Strapleaf.—A variety with plain strap-like leaves and flesh of fine texture ; colour of top of root a rich reddish purple. A perfect model in form, and highly valuable for exhibition.

Price **2s. 6d.** per pint, **6d.** per ounce, **3d.** per packet.

Carters Golden Rose.—One of the hardiest and best Winter Turnips ; flesh of a rich golden-yellow colour, with single tap root ; flavour most delicate and melting. Awarded a Special First Class Certificate at the Vegetable Conference of the Royal Horticultural Society.

Price **2s. 6d.** per pint, **6d.** per ounce, **3d.** per packet.

Carters Crimson-Top Table Swede.—A choice stock of Swede Turnip with orange flesh, and specially adapted for growing as a winter table vegetable.

Price **1s. 6d.** per pint, **3d.** per ounce.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

SEED POTATOES.

THE ADVANTAGES OF PLANTING A RELIABLE CHANGE.

It is generally admitted that one of the most fruitful elements of the potato disease is supplied by a repeated growth year after year of the same stock of potatoes on the same land.

Another danger frequently recurring is the gradual undermining of the constitution of the potato by injudicious selection, alternately resulting in a weakly impoverished stock that too readily succumbs to the earliest attacks of the potato murrain.

Too much importance cannot be attached to this subject, and a change of seed is positively essential if a thoroughly reliable and superior crop is expected.

Our stocks have been grown and selected with the utmost vigilance, and under normal conditions of soil and situation will produce first-class crops.

Our crops are especially grown for seed purposes, that is to say, they are not over-fed for the sake of producing enormous tubers. They are kept true to name and description, and are not lifted until thoroughly ripe.

We go to this trouble and expense with a view to make our potatoes as disease-resisting as the season will permit.

We grow potatoes in England and Scotland, on the chalk in Kent, on the sand in Bedfordshire, on the rich warp-lands in Lincolnshire, so that we possess the advantages of supplying a distinct change of seed to every customer.

We do not list several of the rank-growing new varieties which need too much space in ordinary gardens, neither do we catalogue others in which we can find no merits.

One of the constantly recurring questions put to us by our customers each year, is, "**which may be considered the best varieties** of potatoes for First Early, Mid-Season, and Main Crop, respectively?" To answer this, it would be necessary to be acquainted with the characteristics of the soil in every garden and the tastes of every grower. Some potatoes take more kindly to a particular soil than others, but those who have tried several of our well-known varieties have proved which potato suits their soil and culinary requirements, and acting on the axiom of "find a friend to keep a friend," continue to grow the same variety year after year.

This practice is a good one providing that a constant change of seed tubers is maintained, though it tends to increase the list of popular varieties from the number of which it is difficult to make a selection of the best.

Many years of close observation, however, of potato culture under varying soil and climatic conditions, together with the results of our own trials at Raynes Park and Forest Hill (which this year amount to no less than 261 plots, also 60 seedlings), have enabled us to mention the three undermentioned varieties as the best and most suitable for general purposes.

THREE BEST POTATOES.

First Early.—"Carters Early Favourite." Award of Merit, R.H.S. (*See page 124.*)

Mid-Season.—"Carters Royalty." Awarded Silver Medal for best white potato at the National Show. (*See page 126.*)

Main Crop.—"Carters Longkeeper." Award of Merit, R.H.S. (*See page 127.*)

(Particulars and prices will be found on the following pages.)

During March and April our season's supplies become much reduced, and we are often quite sold out of particular varieties. It is always our endeavour to send something likely to give satisfaction in place of any we may not have available.

LATEST AWARDS.

First and only Award of Merit granted by the Royal Agricultural Society of England, 1910, for a collection of over 100 distinct varieties of Potatoes exhibited 10½ months after lifting.

ROYAL HORTICULTURAL SOCIETY.

First Prize, Silver Gilt Knightian Medal, Open Competition to Trade growers.

Two Silver Gilt Knightian, Silver Gilt Banksian, Silver Knightian, and two First Prizes Open Competition awarded to the produce of Carters Seed Potatoes, 1909 and 1910.

FRANCO-BRITISH EXHIBITION.

First Prize, the highest possible award in the competitive class (12 different varieties), open to all French and English growers at the Franco-British Exhibition, was won with a magnificent exhibit from The Rt. Hon. Earl of Lathom (Mr. Ben Ashton, gardener), grown from the produce of Carters Seed Potatoes, Class 35

NATIONAL POTATO SOCIETY.

The 50-Guinea Challenge Cup won three years in succession. Exhibitor, The Rt. Hon. Earl of Lathom (Mr. Ben Ashton, gardener).

The Llewelyn Cup two years in succession with the produce of seed obtained from Carters.

COLLECTIONS OF SEED POTATOES.

For the use of Exhibitors and others we offer the following Collections :—

6 varieties, 3 lbs. each, our selection ...	} When ordered alone the cost of carriage will be charged.	} <i>s. d.</i> 5 0 9 0 11 0
12 varieties, 3 lbs. each, our selection ...		
6 varieties, 7 lbs. each, our selection ...

CARTERS HAND-PICKED SEED POTATOES.—*Continued.*
SELECTED EARLY VARIETIES FOR FRAME AND EARLY BORDER USE.

CARTERS EARLY FAVOURITE.

The best first early for general use, see page 122.

Award of Merit, R.H.S.

An oval-shaped, pale-fleshed, smooth-skinned Potato, with a medium haulm.

Price, per peck of 14 lbs., 5s. Trial Box, 1s. 6d.

Carters First Crop.—A perfect type of forcing or frame Kidney Potato for a gentleman's garden. The haulm is compact, and the tubers come in remarkably quick when grown in frames or pots. They are beautifully shaped, and the flesh is of a pale canary colour.

Price, per peck of 14 lbs., 4s. 6d. Trial Box, 1s. 6d.

Carters Advancer.—Pebble shaped, smooth skin, white flesh, medium haulm. In the trials of the Royal Horticultural Society a few years since this variety was one of the very few that were selected for fine appearance and good cropping qualities. A heavy producer on all good garden soils, and particularly valuable on light soils.

Price, per peck of 14 lbs., 4s. 6d. Trial Box, 1s. 6d.

Sir John Llewelyn.—An early White Kidney Potato, raised in Wales, many days earlier than some stocks of *Early Ashleaf Kidney*. Haulm fairly tall, eyes shallow. Award of Merit, R.H.S. It has proved a good cropper on various soils.

Price, per peck of 14 lbs., 3s. 6d. Trial Box, 1s. 6d.

Carters Excelsior.—One of the best earliest round varieties with which we are acquainted. Compact in growth, and a good table Potato on all kinds of soils.

Price, per peck of 14 lbs., 4s. 6d. Trial Box, 1s. 6d.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

BEAUTY OF HEBRON POTATO.

STANDARD EARLY AND MID-SEASON VARIETIES.

Carters Improved Early Ashleaf.—A fine yellow-fleshed Kidney with a small top, ready for lifting in summer; very popular

Early Ashleaf

Myatt's Early Kidney

Ringleader.—White Kidney

Express.—Very early

May Queen

Early Rose.—Pink skinned

Carters Invicta.—A perfect purple round, good cropper, and useful as an Exhibition variety

Early Puritan.—Fine early Kidney

Victor.—Popular

Duke of York.—Very prolific

Snowdrop.—White Kidney. Of sterling merit. Awarded a First Class Certificate by the Royal Horticultural Society. Seems to do well on all soils

Early Regent.—White Round. A fine Potato, possessing the sterling qualities of the *Old Regent*, with the advantage of being considerably earlier. Useful where space is limited

The Canon.—A remarkably fine Kidney. Succeeds on all soils

British Queen.—A fine second early pebble-shaped variety, very popular

Carters Cosmopolitan.—An excellent white oval

Carters Surprise.—The result of a cross between *Magnum Bonum* and *Myatt's Ashleaf Kidney*. Succeeds on all soils

Beauty of Hebron.—Pink oval. One of the best on light and medium soils in a dry summer

White Beauty of Hebron.—A white-skinned variety of the last named

Carters Emperor.—A fine purple kidney, good cropper, and useful as an Exhibition variety

Carters Monarch —Honoured with the highest credentials from the Royal Horticultural Society after critical trials both for cropping, shape, and cooking properties. It succeeds on all classes of soil, and is particularly valuable on heavy retentive soils where others fail	14 0	4 0	1 6
Carters King of the Russets .—A pink-skinned keeping Potato with a white and floury flesh. Strongly recommended as a heavy cropper on medium soils	—	5 0	1 6
Carters Goldfinder .—White oval. A grand Potato on all soils. Handsome in shape, very shallow eyes, absolutely no waste, flesh fine in texture, floury white, and quality superb	12 0	3 6	1 6
King Edward VII. —Mid-season. White skin splashed with red. Very robust, prolific, and succeeds on almost all soils	12 0	3 6	1 6
White Elephant .—Mid-season elongated. Pale pink skin, almost white flesh. Succeeds best on light to medium soils	8 6	2 6	1 0
Windsor Castle .—White oval. A great cropper of fine quality on medium soils ; a good exhibition variety	12 0	3 6	1 6
Main Crop .—A useful potato on all soils	8 6	2 6	1 0
Schoolmaster .—White round. Combining excellent quality, great productiveness, and general immunity from disease. Thrives well on all soils... ..	12 0	3 6	1 6
Scottish Triumph .—Flat oval. A good all-round Potato	8 6	2 6	1 0

We have a very limited stock of the true **Scotch Regents**, which has been re-selected by us for the past four years.

We offer so long as stock lasts at 7 lbs. for **5s.**

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS HAND-PICKED SEED POTATOES.—Continued.
 MAIN CROP AND KEEPING VARIETIES.

CARTERS LONG KEEPER.
The best Main Crop Potato for general use (see page 122).
 Award of Merit, R.H.S.

Price 5s. per peck (14 lbs.); 1s. 6d. per trial box.

The Winner of the 50-Guinea Challenge Cup and the Llewelyn Cup says:—"A splendid cropper, cooking qualities excellent, quite free from disease."

Mr. W. A. COOK, F.R.H.S., says:—"Long Keeper is the best we have tried from anyone; a good cropper and free from disease, first-class cooking quality; a potato come to stay."

As an Exhibition Variety.

At the Royal Horticultural Society's Show, the *Morning Post*, *Journal of Horticulture*, *Gardeners' Magazine*, and the *Gentlewoman*, says:—"Long Keeper was especially good amongst the 160 varieties exhibited."

CARTERS SNOWBALL. The Great Prize-taker.

This fine Mid-season Potato has now become established as an exhibition variety; it is almost round in shape, rough skin, pale flesh, with a medium haulm and a splendid cooking variety.

SILVER CUP AND FIRST PRIZE, NATIONAL POTATO SOCIETY.

22 FIRST PRIZES REPORTED BY CUSTOMERS LAST SEASON.

We export large quantities of Seed Potatoes, for which special quotations are given.

Our customer writes from "Riversmead Farm," P. O. Norvals Point, South Africa:—

"It may please you to learn the consignment of Seed Potatoes reached us in really magnificent condition, due to the exceptionally careful packing."—ALFRED HARMSWORTH.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911

CARTERS GRASS SEEDS.

As used on the estates of
HIS MAJESTY THE KING at WINDSOR and SANDRINGHAM,
 and also supplied to
**Lord's, The Oval, All-England Tennis Grounds, Ascot and
 Newmarket Race Courses, and all the leading Golf Clubs
 at Home and Abroad.**

Grass Seeds prescribed for all Soils and Purposes.

For Lawns.	For Tennis Courts.	For Putting Greens.
Cricket Grounds.	Bowling Greens.	Golf Courses.
Croquet Lawns.	Football Fields.	Archery Grounds.
Shaded Lawns.	Polo Grounds.	Cricket Pitches.
Town Lawns.	Racecourses.	Recreation Grounds.

CARTERS FINEST GRASS SEEDS.

As supplied to His Majesty's Golf Grounds, Lawns, and other parts of the Royal Estates. A mixture of the very fine bladed species, which, if sown according to our recommendations, should produce a close thick turf on all good soils, and is especially suitable for all games in which the ball is required to run true.

Price **35s.** per bushel of 25 lbs. ; **19s.** per half-bushel ; **1s. 9d.** per lb.

Carters Fine Grass Seeds.

A prescription adapted for cold and ungenerous soils, or in any confined situation. A very useful mixture, but of coarser texture than above.

Price **30s.** per bushel of 25 lbs. ; **16s.** per half-bushel ; **1s. 6d.** per lb.

Hints when Ordering Grass Seeds. See page 129.

Carters Grass Seeds for Golf Links.

Our experience in sowing down golf links, through the green, and putting greens is probably unique. **During the last four years forty-two new or enlarged Golf Courses have been sown entirely with Carters Tested Grass Seeds.** Our price for Grass Seeds for "through the green" ranges from **21s. 6d.** per bushel to **35s.** per bushel, according to the texture of grass desired and the time the links are required for play.

Carters Grass Seeds for Recreation Grounds, Race Courses, and other open spaces.—We prepare mixtures of hard-wearing grass suitable for this purpose at prices varying from **21s. 6d.** to **30s.** per bushel.

Carters Complete Grass Manures.

Their action and how to use them. See pages 130 and 286.

Carters Worm Killer.

See pages 132, 133, and 286.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

HINTS WHEN ORDERING GRASS SEEDS.

We would respectfully ask our customers, when ordering grass seeds, to give as much information as possible on the following questions; this will assist us in supplying the most suitable mixture for the particular purpose for which the seed is required.

What is the nature of the soil: heavy, medium, or light? Purpose for which the lawn is required:

Pleasure lawn.	Bowling greens.	Football fields.
Croquet. Tennis.	Cricket pitches or outfield.	Shaded lawns or under trees.
Putting greens.	Polo ground.	Town lawns.
Golf courses 'thro' the green.	Recreation grounds.	Archery grounds.
		Race courses, etc.

Is the seed required for a new lawn? If so, send a sample of soil.

Is the seed required for renovating an old lawn? If so, send a sample of existing turf.

Is the ground in good heart?

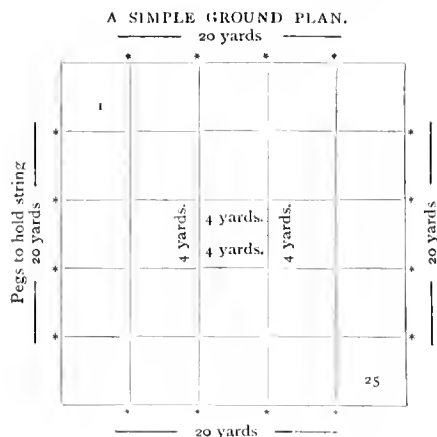

Do you intend to manure the ground? If so, can you procure any well rotted farm or stable manure?

Is the ground well drained? Is water laid on? Quality of seed required.

NOTES.—The finest mixture (at 35s. per bushel) is a term used to describe the texture of the turf when grown, and is the very best for pleasure lawns, and lawns devoted to games of skill where the ball is required to run accurately, and for every purpose when best results are required.

The fine mixture (at 30s. per bushel) will also produce a first class turf of coarser texture than the finest; it is most reliable but is intended for ground which may not be worth the heavier expenditure.

To ascertain the nature of the soil, take a handful of damp soil and compress it in the hand, if it binds tightly it can be called a heavy soil, if it binds but not tightly it is a medium soil, if it does not bind at all it is a light soil.

SOWING GRASS SEEDS.

A PLOT 20 YARDS EACH WAY, OR 400 SQUARE YARDS, READY FOR SOWING, MARKED OUT WITH STRING INTO 25 SQUARES OF 4 YARDS EACH WAY, OR 16 SQUARE YARDS.

QUANTITY OF SEED REQUIRED.

One bushel of seeds weighs 25 pounds. The ground should be divided into squares of 4 yards each way, or 16 square yards (*see Diagram*), and the seed required for that area should not be less than 1 pound, which is at the rate of 1 bushel of 25 pounds to an area of 20 yards each way, or 400 square yards.

For renovating purposes, from 4 to 12 lbs. would be required, according to the state of the existing turf for the above area 20 yards square or 400 square yards.

DO YOU KNOW THE CARTER SYSTEM?

Of making Golf Courses, Lawns, &c. Write for **Carters Practical Green Keeper**, which deals with the making and renovation of grassy lands, post free.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

CARTERS COMPLETE GRASS MANURES.

For use in Spring and Autumn.

THEIR ACTION AND HOW TO USE THEM.

Carters Complete Grass Manure (No. 1) is, as its name implies, a complete grass food, that is to say, it contains all that is necessary for the growth of fine grasses, but it does not force or burn them.

DIRECTIONS FOR USE.

When making a new lawn or green, spread the manure evenly over the surface at the rate of 2 ozs. per square yard, and rake it in. The seed can be sown immediately afterwards, but it is better to allow a few days to elapse between the two operations.

For renovating a lawn, spread the manure evenly over the ground at the rate of 2 ozs. per square yard, and rake it in whilst preparing the surface for the seed.

When used to improve existing turf, sow at the rate of 2 ozs. per square yard, mixing the manure with two or three times its own bulk of sifted soil when treating light sandy soils, or sharp sand—sea sand preferred—when treating heavy soils. Prices:—

Tin.	7 lb.	14 lb.	28 lb.	56 lb.	1 cwt.	5 cwts.	10 cwts.	15 cwts.	1 ton.
1/-	2/6	4/6	7/6	12/6	20/-	£4 15s.	£9	£12 15s.	£16.

Carters Anticlover Manure (No. 2) is also a complete grass food; it is slightly quicker in action than the above, and its constituents are so balanced that it effectively checks the growth of clover, and for this reason it is very valuable for dressing putting greens, tennis courts, croquet lawns, and other lawns in which the growth of clover is objectionable.

DIRECTIONS FOR USE.

Sow at the rate of 2 ozs. per square yard, mixing the manure with two or three times its own bulk of sifted soil when treating light sandy soils, or sharp sand—sea sand preferred—when treating heavy soils. Prices:—

Tin.	7 lb.	14 lb.	28 lb.	56 lb.	1 cwt.	5 cwts.	10 cwts.	15 cwts.	1 ton.
1/-	3/-	5/-	8/-	13/6	21/-	£5	£9 10s.	£13 10s.	£17.

Carters General Purposes Manure (No. 3), for rejuvenating large areas of turf for field games, where a strong, tough, hard-wearing turf is required, rather than one of the finest texture.

Very useful for dressing golf courses, "through the green," football, hockey, cricket fields, &c., &c.

DIRECTIONS FOR USE.

Mix the manure with two or three times its own bulk of sifted soil or sand, so as to facilitate its even distribution, and apply it broadcast at the rate of 5 cwts. per acre, either in early autumn or spring, and bush harrow it in. Prices:—

1 cwt.	5 cwts.	10 cwts.	15 cwts.	1 ton.
16/=	£3 15s.	£7	£9 15s.	£12.

Other Manures, see page 286.

Carterite, for exterminating daisies and shallow rooted weeds in lawns, &c. For prices see page 286.

The above prices are carriage paid for England, Scotland, and Wales, nearest port for Ireland and F.O.B. London for export orders.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

ROYAL HORTICULTURAL SOCIETY, 1906, 1907, 1908, and 1909 SILVER MEDALS.

"PATENT AUTOMATON"

(With CHAIN or WHEEL GEARING, as preferred).

The best General Purpose Machines made. Will leave a fine velvety surface.

"AUTOMATON MINOR,"

Similar to the above, but lighter and cheaper.

"EMPIRE," "EMPIRE MAJOR," "ANGLO-PARIS," AND "LION."

"EMPIRE" (as Illustrated).

The highest class Side-wheel Machine. Can be recommended with every confidence.

"EMPIRE MAJOR."

Similar to the "Empire" but larger and more powerful. A very useful Machine for Golf Courses.

"ANGLO-PARIS."

For small gardens and ladies' use.

"LION."

The best cheap Machines.

"HORSE AND PONY" MOWERS.

The best large Machines. Used on all the principal Cricket Grounds, Golf Courses, and Public Parks.

MOTOR LAWN MOWERS.

The first Petrol Motor Mowers brought out.

Reputation Established.

Hundreds in successful use.

All Machines sent Carriage Paid.

Illustrated Catalogues from High Holborn, by return of post, or from

RANSOMES, SIMS & JEFFERIES, Ltd., IPSWICH.

From our practical experience of these Machines, we can recommend them with every confidence to our customers.

MUDDY LAWNS.

A typical piece of worm infested, soft, muddy turf. Requires brushing and rolling daily from September to June, which means damaged turf, roots bruised and exposed, fine grasses smothered, and ultimate bare patches.

The soft, sticky, muddy, and wet condition of tennis courts and lawns during the Autumn and early Spring is entirely due to the movement of millions of worms which loosen the soil and throw to the surface tons of slimy, sticky, wet mud.

If any attempt is made to make the grass firm by rolling, the casts either stick to the roller and soil is actually taken away from the lawn, or else they roll down hard and smother out the fine grasses. If they are swept off with a broom, the lawn is not only impoverished by loss of soil, but the grass, being smeared over with the slimy mud, becomes unhealthy, and the action of the broom bruises the surface roots of the grass and exposes them to the air, with the result that many of the finest grasses die; **and, in both cases, the lawn remains soft, dirty, wet, and cannot be used.**

When the worms are exterminated a soft, wet, sticky lawn **improves immediately**, and becomes firm, **clean under foot** and healthy, and games can be played both early in the Spring and quite late in the Autumn, when wormy lawns are absolutely unplayable.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CLEAN LAWNS.

The result of using CARTERS WORM KILLER. Turf clean, firm, and healthy; an occasional light rolling alone necessary to keep it in perfect playing condition.

To put the matter in as few words as possible, the movement of multitudes of worms keeps the soil continually on the move, and kneads it up into a pasty, sticky, soft mass, which is unsuitable for the growth of fine grasses, and puts the lawn out of use from September to May.

When the worms are exterminated the lawns keep **green, clean, firm**, comparatively dry, and games—such as lawn tennis, croquet, bowls, lawn golf, &c.—can be played on many a fine day both in the Spring and Autumn, when under the old conditions play would be impossible on account of the soft and muddy condition of the lawn, brought about by the movement of the worms in the soil throwing their slippery casts on the surface.

The ingredients of Carters Worm Killer are so carefully balanced that not only does it destroy the worms, but its manurial properties **immediately improve** the growth and texture of the turf.

Carters Worm Killer. See also pages 132 and 286.

Spread $\frac{1}{2}$ -lb. over one square yard during mild weather, and water in.

Price **3s.** per 14 lbs.; **5s.** per 28 lbs.; **7s. 6d.** per half-cwt.; **12s. 6d.** per cwt.; 5 cwt., **£3** ;
10 cwt., **£5 10s.**; **£10 10s.** per ton.

Carters Address for all
Correspondence, **RAYNES PARK, LONDON, S.W.**—1911.

A Carter Japanese Garden designed and constructed at Ascot, Berks.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS JAPANESE LANTERNS AND GARDEN-WARE SPECIALLY IMPORTED FROM JAPAN FOR JAPANESE LANDSCAPE GARDENING.

Prices from 8 guineas. Inspection invited at High Holborn.

LANDSCAPE GARDENING DEPARTMENT.

We keep an efficient staff of experts for examining sites and preparing Designs and Estimates for

GARDENS, PARKS, LAWNS, ROCK GARDENS,

and all kinds of

ORNAMENTAL GROUNDS,

and to give advice for

RE-MODELLING AND IMPROVING EXISTING GROUNDS.

The works in this department are necessarily of such a character that only men capable of exercising correct judgment, skill, and good taste should be employed in their execution.

We keep on our permanent staff draughtsmen for preparing plans and drawings of Gardens, Greenhouses, Palm-houses, Conservatories, Winter Gardens, and all kinds of Rustic Work.

JAPANESE LANDSCAPE GARDENING

A SPECIALITY.

We have been awarded **TWO GOLD MEDALS** and **TWO SILVER CUPS** by the Royal Horticultural Society for our **Japanese Gardens** at the **Great Temple** and **Holland Park Shows** during 1909 and 1910.

JAPANESE DWARF TREES.

Our collection contains historic and ancient specimens of dwarf oaks, thujas, larix, cherry, &c., ranging in price from 21s., and we are always pleased to have examples brought up for inspection at our London establishment, 237 & 238, High Holborn, or at Raynes Park, S.W.

For Photograph of our Japanese Garden, please see opposite page.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

CARTERS POPULAR BOXES OF SEEDS.

The Seeds offered in our Collections are of the best re-selected stocks only, taken from the same sacks as when general orders are given from our Catalogue. We can supply more Seeds for the money when purchased in this form, because we put up these Collections by the hundred, which effects a great saving in labour. They are ready for immediate dispatch, packed in wooden boxes and sent carriage free to any Railway Station in the United Kingdom on receipt of remittance. It is inconvenient to make alterations in these Collections.

AGERATUM IMPERIAL DWARF BLUE (*see below*).

Per packet—s. d.

Ageratum.—Half-hardy annual, neat habit, with effective flowers, mostly lavender blue; very useful in beds or along borders. Sow early in spring in pans, in heat, and prick off when the seedlings are sufficiently advanced in growth.

No. 143.	Imperial Dwarf Blue. The finest bedding variety in cultivation, AS SHOWN IN THE PHOTOGRAPH ABOVE. 9 inches	1	0
„ 140.	Blue Star. The most compact Ageratum yet introduced. Light blue. 6 inches 6d. &	1	0
„ 141.	Little Dorrit. Lavender. 6 inches 6d. &	1	0
„ 142.	Victoria Louise. Dwarf; light blue with white centre; very showy... .. 6d. &	1	0
„ 144.	Imperial Dwarf White. 9 inches 6d. &	1	0
„ 145.	Carters Lavender Band (NEW). Extremely dwarf, about 4 inches, of soft lavender hue ...	1	0
„ 146.	Mexicanum. 18 inches	0	3

Abronia (SAND VERBENA).—Half-hardy annual of elegant trailing habit for rockeries and dry places. Sow in early spring in pots and plant out.

No. 133.	Umbellata. Rosy pink	0	3
----------	-----------------------------	---	---

Abutilon (INDIAN MALLOW).—Elegant form. Useful for conservatory decoration and for sub-tropical bedding. Sow in heat early in spring, and pot off as soon as large enough to handle. For bedding out they should be hardened off well before planting out. Height, 6 feet.

No. 134.	Thompsonianum. Variegated foliage 1s. &	2	6
„ 135.	Carters choicest mixed 6d., 1s., &	2	6

MUCH REDUCED.

James Carter & Co.

CARTERS LONG-SPURRED AQUILEGIA.

Hardy perennials of great beauty and utility in borders, where they will bloom freely when established, early in the summer. The long-spurred type, of which we make a speciality, gives elegant cut flowers. We have now included some new and effective colours. Sow seeds under cover in February for transplanting in spring to a border, when, if the summer is favourable, they may bloom in autumn. If sown in summer sturdy plants will be ready by autumn for transplanting to the border to flower next May and June.

No. 191.	Carters Long-Spurred Blue (CERULEA). This beautiful large flowered free-blooming variety is most valuable for cutting. 2 feet	Per packet ... 6d. &	s. d.
" 192	Carters Long-Spurred Single Golden (CHRYSANTHA). 2 feet	... 6d. &	1 0
" 193.	Carters Long-Spurred Double Golden (CHRYSANTHA DOUBLE). 2 feet	... 6d. &	1 0
" 196.	Carters Long-Spurred White. In some cases the spurs are slightly shaded with blue. 2 feet	... 6d. &	1 0

CARTERS LARGE-FLOWERED ANTIRRHINUM.

ANTIRRHINUM or SNAPDRAGON.

(See Photograph opposite.)

Sow the seed in pans or boxes from February to March, and transplant to bed or border when large enough. If the withering flowers and seed pods are kept picked off, the plants will last in bloom for a long time, and continue again the following year. Can easily be grown as Annuals if sown in the open ground in April. Thin out about 12 inches apart.

Carters Intermediate Large-flowered.—This is undoubtedly the finest form, both for bedding and ribbon borders, the dense, well-formed trusses contrasting beautifully with the deep green foliage. We recommend the following varieties as representing the highest forms of this useful plant, now so greatly in vogue.

The trusses are excellent for cutting, and being slightly curved lend themselves to any decorative arrangement. Height, 1 to 1½ feet.

	Per packet—s. d.
No. 188. Carters Gold Crest (new). —Flowers soft rose-pink, tinged salmon, with golden orange lip. We predict a great future for this remarkably brilliant variety as a bedding plant ...	1 0
„ 51. Carters Scarlet Flame (new). —A self brilliant fiery scarlet, hence the name we have given to it. In the sunshine the spikes look flame-like in their brilliancy ...	1 0
„ 174. Carters Terra Cotta and Creamy Shades. —A charming strain of soft, delicate shades which are quite new in this section ...	1 0
„ 1457. Carters Fiery Belt. —A most striking colour, fiery brilliant orange-scarlet, with white throat. A small group of this flower enlivens the whole garden ...	6d. & 1 0
„ 176. Carters Pink. —Quite a charming variety. Delicate pink with white throat ...	6d. & 1 0
„ 187. Black Prince. —Crimson, dark foliage ...	6d. & 1 0
„ 47. CARTERS BUTTERFLY. —Large flowers of crimson purple, with pure white throat ...	6d. & 1 0
„ 175. CARTERS GLORIOSA. —Flowers richest purple-carmine, relieved by pure white ..	6d. & 1 0

The most noble flowered Aster in cultivation. With flowing feathery petals; grand for cutting.
Height, about 18 inches.

We have measured blooms 6 inches across.

For other varieties, see following pages.

Carters Seedsman by Appointment to His Majesty the King—High Holborn, London.

ASTER.

Since the introduction of this beautiful garden Flower into England by the late Mr. James Carter, about the year 1830, continuous skilful cultivation has produced the present developments in form and colour.

The whole group may be described as *HALF-HARDY ANNUALS*, the seeds being best sown under glass in early spring, and the seedlings pricked out into boxes or in frames for planting out or potting as the occasion requires, when they are ready about June.

The Aster in its various tall and dwarf forms makes a grand Bedding Plant, as its fullest beauty appears when the ordinary summer flowers are beginning to look rusty. The blooms are freely produced and last long, and are effective until spoiled by the frosts of autumn. The magnificent *Ray* varieties, see page 149; *White Plume*, see page 152; *Victoria*, see page 150, and the fashionable Single *Comet* types on page 151, together with the *Comet* and Chrysanthemum-flowered types described below, should be largely grown in every garden.

Carters Sinensis Single.—A free growing single Aster, suitable for vases and house decoration. Height, 18 inches.

CARTERS CHOICE SINGLE BEGONIA.
TUBEROUS ROOTED.

A VERY POPULAR PLANT FOR POTS AND BEDDING OUT.

Begonias are much superior to Geraniums for bedding, being quite unaffected by heavy rains, a moist atmosphere suiting them. **BEGONIA, CARTERS "CROWN JEWELS" MIXED SINGLE, including Fringed vars. as above.**

It is impossible to praise too much this superb strain of this highly-favoured flower; it is simply perfection, and needs but finished culture to attain pleasing results, alike for size and quality of the flowers, combined with brilliance in colours. Grand for bedding out.

No. 292	Per packet—s. d.
BEGONIA HYBRIDA CRISTATA.	—Grand flowers, crested by the elongation and fimbriations of the petals; 70 per cent. true from seed.	18. 6d., 28. 6d., 38. 6d., & 5 0

" 1482.	BEGONIA, CARTERS FIERY SCARLET.	—Enormous blossoms producing a gorgeous display	2 6

BEDDING BEGONIAS—PERPETUAL FLOWERING, SMALL BLOOMS IN CLUSTERS.
FIBROUS ROOTED.

No. 294	18. & 2 6
"FAIRY QUEEN" TOM THUMB.	—Colour delicate glistening rose, marked with white centre.	18. & 2 6

No. 295	18. & 2 6
LUMINOSA.	—Flowers, fiery deep scarlet with satiny brownish red foliage.	18. & 2 6

No. 1544. 18. & 2 6

The seed should be sown in heat at end of winter to produce strong flowering plants in the summer, in pans of very fine soil. Prick off the seedlings into pans and pot off later. Care should be used when sowing, as the seed is very fine. We can also supply tubers ready to start into growth in early spring. See page 250.

These Begonias are invaluable for growing in beds and groups; also for pot culture. They come into bloom very early, and last all the season.

For Double varieties see page 157. For dry roots, see page 260.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

ORNAMENTAL GRASSES FOR DECORATIONS.

Cultivation.—The annual varieties should be sown out of doors during April where they are intended to flower, or for earlier work sow under glass and plant out. The perennial varieties are best sown during summer, and planted out in borders in spring. The flower heads should be cut in a young stage and hung upside down to dry, as they are then more lasting for decorative purposes.

Hints on Culture.—Balsams may be sown from the beginning to the middle of April in pans or on a slight hot bed, in a light rich loam compost, covering the seed about half an inch, keeping the soil moist, but not wet. When the plants have formed the second pair of leaves they may be transplanted, four round the edge of a 6-inch pot, and gradually hardened off for transplanting out of doors; or they may be planted in a cold pit, 4 inches apart, as near the glass as possible, giving more air as the season advances until June, when they may be turned into the open borders, the warmest situations being the most suitable. If for pot culture, they must be divided and transplanted into single pots, once or twice into larger pots, picking off the flowers in the earlier stages of growth to give greater vigour.

CALCEOLARIAS AT MESSRS. CARTERS EXPERIMENTAL NURSERIES.

It is impossible by photography to give any adequate idea of the beauty of these magnificent flowers; the variations and markings are endless, the flowers are of large size and perfect in form, and the habit is unexceptionable. Our exhibit at the TEMPLE SHOW OF THE ROYAL HORTICULTURAL SOCIETY every May is always the theme of general admiration, and we have been awarded the highest honours for our displays.

CARTERS MINIATURE CALCEOLARIA.

A curious small-flowered type, quite unique in growth and character; makes a fine dwarf plant for stage fronts in Conservatory among other growths of similar habit.

No. 318. Calceolaria, The Pigmy. A dainty plant, with beautifully variegated blossoms. Height, 5 inches.

Per packet, 1s. and 2s. 6d.

No. 319. Calceolaria, Tom Thumb. Brilliant as the *Victoria Prize* varieties, but of dwarf habit.

Per packet, 1s. and 2s. 6d.

No. 320. Calceolaria, The Gem. Similar to *The Pigmy*, but the flowers are more of one colour.

Per packet, 1s. and 2s. 6d.

Awarded First Prize York Gala Jubilee Show, 1908, for group of Calceolarias, 12 ft. x 5 ft. They were much superior to anything in the Show, having enormous pouches.

UNSOLICITED TESTIMONIALS.

"The Calceolarias have given a truly beautiful display of plants, surpassing anything our neighbours say they have ever seen." J. H. HEWITT, Esq., Stow-on-the-Wold.

"Your *Victoria Calceolai* is this year have been magnificent."—Rev. C. J. P. BLUNDELL, Elvedon Rectory.

VICTORIA PRIZE CALCEOLARIAS.

"Those grown from your last year's seeds have been an unqualified success, several of the blooms measuring three inches across, and the colours and markings are magnificent. They are generally admitted by all the local gardeners who have seen them to be the finest they have ever known, and several of them have expressed their intentions of having their seed from you in future."—E. BARKER, Esq., Heamoor.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

CALLIOPSIS
(**Coreopsis**).

Hardy annuals and perennials. All are universal favourites and useful for cut flowers. The annual varieties should be sown outdoors in April in the place they are intended to flower, or, for earliest work, may be sown under glass, and then pricked out.

ANNUAL VARIETIES.

Carters Tall.— $2\frac{1}{2}$ to 3 feet. Large flowered, branching habit; very useful for back of borders and cut flowers.

- No. 321. Crimson, 3d. & o 6
 ,, 322. Crimson and gold 3d. & o 6

Carters Dwarf.—15 to 18 inches, compact habit; useful for cut flowers.

- Per packet *s. d.*
 No. 323. Crimson, 3d. & o 6
 ,, 324. Crimson and gold 3d. & o 6

Carters Miniature.

—9 to 15 inches. The shortest growing type; fine for edges.

- No. 325. Crimson marbled. The flowers show a groundwork of chocolate, flaked and marbled with gold, giving a most fantastic combination. Unfortunately some tall plants invariably appear amongst the dwarfs 3d. & o 6
 No. 326. Crimson and gold. Of all the dwarf varieties this is the most miniature 3d. & o 6

No. 327. **Carters Choice Mixed Tall Annual** varieties, all sorts, 3d., 6d., & 1 o

No. 328. **Carters Choice Mixed Dwarf Annual** varieties, all sorts, 3d., 6d., & 1 o

Monthly Operations in the Garden, with Hints on the Cultivation of the Principal Flowers and Vegetables. Post Free, 6d.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

CARNATION AND PICOTEE.

A popular and lovely flower, always in fashion. In colour and form unique, with a pleasing fragrance in many types. Whether grown in pots for conservatory decoration or in the garden beds for summer display, its charms are equally attractive. Our seed is saved with the greatest care, and should produce a large percentage of the very best flowers, but unfortunately, as with other florists' flowers, it cannot be guaranteed that every one will come double.

**Carters Choice
Double Carnation.**

No. 388. A splendid mixture of Sells, Flakes, Bizarres, Fancies, and Yellow Grounds.

All varieties mixed,
1s. 6d., 2s. 6d., and 3s. 6d.
per packet.

Sow in spring in cool frame, prick out, and plant out in good soil when strong enough.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS ANNUAL CARNATIONS.

Bloom in six months
from seed.

Carnations are favourites with all lovers of flowers. This new strain will bring them within the reach and the cultivation of everybody, as it is one of the most valuable introductions of modern times.

Sow under glass in January and February, and transplant as soon as ready. They commence to flower in July, producing a wealth of large blooms of great variety in colour until cut off by the frost, thus producing a supply after the perennial varieties are over. Being equally valuable for indoor cultivation, some can be potted and placed in a cool greenhouse, when they will provide a succession of bloom during the winter months. They produce a very large percentage of double flowers, and include a most varied assortment of Fancy, Yellow Ground. Bizarre, as well as Selfs, rich with delightful fragrance and diversity of colour.

No. 389.

Carters Annual Carnation.

Per packet,
1s. 6d., 2s. 6d., & 3s. 6d.

CENTAUREA, OR SWEET SULTAN.

Centaurea, or Giant Sweet Sultan.—The flowers of this greatly improved annual are at least twice the size of the older varieties. It is most deliciously scented, with long flower stalks to facilitate cutting, and when cut will last in water for a fortnight. In this respect alone it exceeds any other annual we can call to mind. We give this flower the highest possible recommendation. For ordinary Sweet Sultans, see page 253. Height $1\frac{1}{2}$ feet.

May be sown in pots and pricked out for early flowering, or in open borders in spring for general work.

CHRYSANTHEMUM ANNUAL.

Of all Annuals these pretty flowers hold a leading position, and many of them have been raised on our Seed Farms. All are beautiful in beds and borders and good for window boxes or cutting. Sow seed in spring in boxes for early flowering, and in the open for general work. Some varieties make useful pot plants; for this purpose they should be sown under glass. 1½ feet.

ANNUAL CHRYSANTHEMUMS.

CARTERS DECORATIVE CINERARIAS.

CINERARIA CARTERS CACTUS FLOWERED.

A grand mixture, including all shades of colour.

CARTERS CACTUS.—An entirely new break in Cinerarias; the edges of the florets recurve like a single Cactus Dahlia. The colours include white, blue, blush, violet, mauve, and some have a white zone surrounding the dark disc, the florets being tipped with violet, blue, &c. The flowers when cut last a long time, and by their lightness and elegance make charming table decorations.

Per packet—s. d.

No. 429. Carters Choicest Mixed 1s. 6d., 2s. 6d., 3s. 6d., & 5 0

CARTERS STELLATA.—This free-pani led variety has now obtained general approval, especially for decorative arrangements, for which purpose it has proved marvellously effective, being a valuable adjunct to the much admired Carters *Brilliant Prize*. It should be raised and treated in the same manner as the other greenhouse varieties.

No. 446. Carters Choicest Mixed 1s. 6d., 2s. 6d., 3s. 6d., & 5 0

James Carter & Co.

Awarded **SILVER GILT MEDAL**, Royal Horticultural Society, May, 1908.
Carters Brilliant Prize Cineraria.—The only strain awarded four Gold Medals by the Royal Botanic Society.

Our house has long been famed for its Cinerarias, and extra care has been taken in the selection of the plants this season. The colours are simply lovely, consisting of vivid self and brilliant bordered varieties, in an unequalled diversity of shades.

Sow seed in pans filled with a good light sandy compost in spring up to the beginning of June, and place in a cool frame. Transfer to small pots as soon as the seedlings have developed their leaves, and pot on as the plants require it. They should be grown in a cold frame until frost necessitates their removal to a greenhouse. Even in winter they should not receive much artificial heat. Will come into bloom from Christmas to May.

Per packet—s. d.

- .. 448. **Cineraria Maritima.**—A well-known hardy SILVER-FOLIAGED PERENNIAL, for bedding or mixed borders; 1½ feet. Seeds should be sown in pans in early spring under glass, and the seedlings pricked off into boxes, hardening before planting out ... 6d. & 1 0

"Our show of Cinerarias from your seed of last season is simply grand, the finest I think I ever grew. They are greatly admired by all who have seen them." Mr. D. FRYER, The Gardens, Ashfield, Notts.

"The Cinerarias from the seed I got from you last June are magnificent, both in size and colour, and it is the opinion of all who have seen them that they have never seen finer."—E. BARKER, Esq., Heanor.

Carters Address for all Correspondence, **RAYNES PARK, LONDON, S.W.**—1911.

CLARKIA.

Well-known **HARDY ANNUAL**, of great decorative value and easy culture. Seed should be sown in spring in the open border. The *Elegans* types are excellent for vases, as the long spikes continue to bloom for many days. Sown during autumn and grown on in a cool-house, Clarkias make magnificent plants 4 to 5 ft. high for greenhouse decoration or winter gardens.

Sow at any time (spring and autumn to be preferred) in pots or pans, in peaty loam and sand, covering the soil scarcely a quarter of an inch, place on warm shelf near the glass in greenhouse keeping the soil moist but well drained. The seed takes from four to eight weeks to germinate. When the bulbs are the size of a pea transplant singly into small pots, transferring to larger pots as the plants develop. An average of 60° is the temperature best suited for producing well-developed flowers, and good ventilation without draught is a safeguard from disease. We also supply dry bulbs at the end of the summer (*see page 271*).

Carters Address for all
Correspondence, **RAYNES PARK, LONDON, S.W.—1911.**

NOVELTY.—A BEDDING CACTUS DAHLIA.

Novelty. — Carters Raynes Park Gem. — Novelty.

Height 1 ft., very floriferous, Colour a glowing dark scarlet.

This is the first introduction of its kind, and will stimulate the growing popularity of the Cactus Dahlia.

Each plant forms a compact bush, and its large handsome blossoms are thrown well above the foliage. If planted out in June a brilliant display will be produced from the middle of August onwards.

Plants in small 60 pots will be ready for delivery by middle of May. Orders may now be booked.

Price 2s. each, or 18s. per dozen.

Dahlia.—CARTERS CROSS-FERTILISED STRAINS. Our strain has been specially hybridised and fertilised with various species, and should produce some novel kinds. Sow the seed in early spring, in heat, and pot off. Plant out as soon as large enough in June. **Plants raised very early will bloom the same season.** We can supply plants in May, see page 271. Per packet—s. d.

DELPHINIUMS.

Carters Annual Delphinium Blue Butterfly

(see *Illustration*).—The greatest acquisition in blue annual flowers for many years. The Royal Horticultural Society, when granting it the Award of Merit, stated in their report that it is “a dainty annual of bushy branching habit, and very floriferous.” The seed should be sown early, in heat, and grown on in pots until ready for bedding out. Late sowings do not make effective plants until too late in the season.

Height 15 inches.

No. 539. Per packet, price 6d., 1s., and 1s. 6d.

The **Perennial Delphiniums** are best sown in summer, as they then make strong plants to flower following season. They can also be sown early in spring, and are very effective in borders during the early summer the following year.

 6d. & 1 0

Erythrina (CORAL TREE).—Greenhouse shrubs. Sow in heat in early spring, and pot off.

No. 563. Mixed. Carters Choice varieties 1 0

Extract from the *Gardeners' Magazine*, May 4th.—Report of Royal Horticultural Society's Meeting, on April 30th ;—

“Messrs. J. Carter & Co., High Holborn, arranged a beautiful group of Cinerarias, including both the stellate and florists' forms. In the latter plants there could be seen indications of a departure from the extremely compact habit that has prevailed during recent years, and there is no doubt that the freer growth improved their decorative effect. In both sections the flowers were bright of good form, and the range of coloration was exceptionally wide.”

Carter's Address for all Correspondence, RAYNES PARK, LONDON, S. W.—1911.

No. 564. **Carters Large-flowered Dwarf Single Dianthus.** 6 to 8 inches, 6d., 1s., & 1. 6

Dianthus Chinensis (INDIAN PINK). Biennial. We consider the *Hollwegi* section of the Dianthus introduced by our house from the East, and the parent of many of the best types, to be one of the finest additions to our annual flora for the last fifty years, and the varieties detailed on the next page are the improved results from the original importation. Sow in spring in boxes or pots, and transplant to where intended to bloom. Seeds of all the improved types may be also sown at the end of summer and grown on in pots through the winter under fairly cool treatment. They will make robust plants at end of spring, and become useful in the decoration of the conservatory. (See opposite page.)

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

DIANTHUS.—Continued.

DIANTHUS, CARTERS SALMON QUEEN.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

NEW ESCHSCHOLTZIA.

Carters New Hybrids.

Following on our previous successes in introducing new colours in *Eschscholtzias*, we have much pleasure in bringing to the notice of our customers these new hybrids. They are the outcome of the following artificial crossings:—

CARMINE KING (×) MANDARIN. | DAINTY QUEEN (×) CALIFORNICA.
 CARMINE KING (×) CALIFORNICA. | MANDARIN (×) WHITE.

The plants of the first generation of these crosses were allowed to fertilise themselves and the new hybrids we now offer for the first time are the result. They contain many shades and tints of colour not yet seen in *Eschscholtzias*, intervening between the pale rosea and the intense *Mikado*, and between the lemon *Californica* and the brilliant *Carmine King*, giving a play of colour at once interesting and brilliant.

No. 1576. Price per packet, 1s.

No 635. **The Mikado.** Award of Merit, R.H.S., 1908.

The Mikado has brought a new colour into the *Eschscholtzias*, the result of a cross between *Mandarin*, which we introduced in 1879, and *Carmine King*, our great novelty of 1906. The blend of these two colours has produced a brilliant orange crimson suffused with the lustre of the *Carmine King*. To a small percentage the colour favours almost entirely the carmine parent

Price per packet, 1s

No 1491. **Carters Double Orange.**

An improvement on the original form which we introduced for the first time in 1879, when it was awarded a *First Class Certificate* by the Royal Horticultural Society Per packet—s. d.
 6d. & 1 0

No. 581. **Carters Carmine King.**

This was introduced by us in 1906 after having received an *Award of Merit* from the Royal Horticultural Society. Plants in flower have excited admiration wherever seen, the lustrous carmine colour being quite novel in *Eschscholtzias* 6d. & 1 0

No. 584. **Carters Diana.**

This is a most dainty flower. The colour is a rosy white, while the petals are fluted in a most novel manner, giving the flower quite a fantastic and attractive appearance ... 6d. & 1 0

No. 1490. **Dainty Queen.**

A beautiful shade in *Eschscholtzias* Colour a tender blush or pale coral pink, slightly deeper towards the edges, with a groundwork of delicate cream; same colour inside as outside the flower. The blossoms stand well above the bright green foliage, giving it a singularly attractive appearance 6d. & 1 0

No. 582. **Carters Mandarin.** Exterior of blossom orange-crimson 6d. & 1 0

„ 583. **Carters Rose Cardinal.** Delicate bright rose 6d. & 1 0

„ 585. **The Golden West.** The largest flowering of all the *Eschscholtzias*. A charming orange colour 6d. & 1 0

„ 586. **Maritima.** Bright gold ... 3d. & 0 6 | Per packet—s. d.
 „ 587. **Aurantiaca** 3d. & 0 6 | No. 589. **Crocea** Orange 3d. & 0 6

„ 588. **Californica.** Yellow ... 3d. & 0 6 | „ 590. „ **alba** White ... 3d. & 0 6

„ 588. **Californica.** Yellow ... 3d. & 0 6 | „ 591. „ **rosea** 3d. & 0 6

ESCHSCHOLTZIA (CALIFORNIAN POPPY).—Hardy annual (or biennial) of immense utility for mixed borders. Hardy, bright, and free-blooming, and of the easiest culture. Sow in open in spring, and thin out. Height 1 foot.

Carters Address for all
 Correspondence, RAYNES PARK, LONDON, S.W.—1911.

FORGET-ME-NOT (Myosotis).

Per packet—s. d.

CARTERS ROYAL BLUE.

CARTERS PYRAMID.

No. 608. **Carters Royal Blue** (see Photograph).—Deep blue of a remarkably free flowering habit. These lovely plants are in great repute for spring bedding. Height 1 foot 6d. & 1 0

No. 612. **Rupicola.** Deep blue; a gem for pot work. 4 inches 6d. & 1 0

No 613. **Star of Love.** Beautiful blue. Distinct spray-like spikes of bloom. 6 inches ... 6d. & 1 0

No. 616. **Victoria.** A favourite for market; most profuse bloomer. 9 inches... .. 6d. & 1 0

No. 617. **Garden.** Ordinary kind, select stock. 1 foot. 3d., 6d., & 1 0

CARTERS PYRAMID FORGET-ME-NOTS (see Photograph) — We offer these charming pyramidal types of Forget-me-nots with confidence that they will be greatly appreciated by our customers for spring bedding purposes. The plants assume an upright habit of growth, and when in bloom, resemble miniature pyramids of floral beauty. These new Forget-me-nots are especially valuable for planting in combination with Tulips, as their upright habit does not check the growth of the flower spikes from the bulbs or make a bed appear so crowded as when plants of more exuberant growth are used as a ground work. The seeds should be sown out of doors on a partially shaded border towards the end of summer. Height, 1 foot.

Per packet—s. d.

A HOUSE OF CARTERS INVINCIBLE PRIZE GLOXINIA GROWING FOR SEED AT OUR NURSERIES.

CARTERS INVINCIBLE PRIZE GLOXINIA.
AWARDED THREE SILVER CUPS, Royal Horticultural Society.
TWO SILVER-GILT MEDALS, 1904-1905.

It may be asserted without fear of contradiction that no flower for exhibition produces a greater effect than a first-class group of Gloxinias. The superb mixture we offer under the name *Invincible* is magnificent. It contains all the best self-colours, crimson, sapphire, purple, rose, blush, violet, white, &c., also the finest edged, tipped, ringed, and shaded varieties, together with the most beautiful spotted or marbled kinds, and is the finest we have seen.

				Per packet—s. d

„ 685.	GLOXINIA.—Erect varieties. No. 686. Drooping varieties	each 1s. 6d. & 2 6

“I had a 5s. packet of your Gloxinias this summer, and have got over 400 plants in “6.5” pots, and several showing for bloom. I should almost think this is as many as anyone could get from such a small quantity of seed.”—Mr. W. CAMM, East Ham, August 14th, 1907.

Culture.—Sow in well drained pans from January to March (or in the autumn), fill the pans with soil consisting of a mixture of half peat and half leaf mould, with a small quantity of pulverised charcoal and silver sand sifted very fine, to within half an inch of the rim; water with fine rose, then sow the seed thinly, taking care not to cover it with soil; place in a temperature of 75 deg., and cover the pans with a piece of shaded glass, gradually removing the same as the seedlings progress. When large enough to handle, prick off into pans at about one inch apart, then pot off into single pots. Many will soon att in the requisite strength to go into 5-inch or 48 pots, and will bloom in August and September of the same year. The potting-off soil should consist of one-half good loam, one-half fibrous peat, with a good sprinkling of sand and broken charcoal.

For price of Gloxinia Bulbs, see page 271.

CARTERS DOUBLE PINK.

Per packet—s. d.

No. 698. Hardy Annual, quite distinct, producing long spikes with 18 to 20 beautiful double pink blooms. They make an excellent cut flower, a spike of half-opened buds continuing to develop for a long time if fresh supplies of water be given daily. It also makes an effective pot plant for the conservatory stage when sown at end of summer and kept growing through the winter in a cool house. Height 2 feet, 6d. & 1 0

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

GODETIA.

One of the showiest of all annual flowers.

We have grown them in large areas for many years and were awarded the First Class Certificate of the Royal Horticultural Society for that beautiful variety, Lady Satin Rose, perhaps the finest annual flower ever raised. The Godetia makes an excellent cut flower.

PART OF CARTERS "GRAND PRIX" EXHIBIT, COURT OF ARTS, FRANCO-BRITISH EXHIBITION.

CARTERS SELECTED KOCHIA (*Trichophylla*).—HARDY ANNUAL.

Visitors to the White City will doubtless remember the fine display made by our Kochias, as pictured above. We had numerous inquiries, and they were perhaps the most admired of all plants in our extensive exhibit. Carters Selected Kochia makes a most effective decorative plant, with a habit much resembling one of the compact evergreen shrubs; it has a light grass-green feathery foliage, which changes as the summer advances to a rich crimson. It is a perfectly hardy annual and can be sown in the open ground; it is a rapid grower and flourishes on all soils. The best method is to sow the seed under glass, pot the seedlings off singly, and ultimately bed out or plunge the pots in which they are growing. It will be seen by the above picture that these round shrub-like plants (often called the Mock Cypress) are most effective when planted amongst flowers, such as Begonias, Geraniums, Petunias, &c., in fact they are most useful for the centre of any bed or when planted out in some decorative scheme. The plants should be pinched back and trimmed to shape when necessary. Height about 2 feet.

No. 750.

Carters Selected Kochia (*Trichophylla*). Price, per packet, 6d., 1s., and 1s. 6d.

Carters Seedsman by Appointment to His Majesty the King—High Holborn, London.

Per packet--s. d.

Humulus (HOP).—Hardy climbers. No.

734 is a very pretty quick-growing annual climber. Sow in pots early in February, in heat, and plant out in May.

- No. 733. Japonicus. Green foliage 6d., 1s., & 2 6
- „ 734. „ variegatus. Green foliage, marked silvery white. (See Illustration) 6d., 1s., & 2 6
- „ 735. Lupulus. Perennial (Garden Hop) 6d. & 1 0

Honesty (LUNARIA).—Hardy Perennial.

Singular seed vessels, useful when dried, for house decoration in winter. Sow in spring.

 Correspondence, RAYNES PARK, LONDON, S.W.—1911.

LOBELIA.

Very popular garden plants. The compact-growing varieties are sown in winter under glass, and transplanted into boxes for growing on to be ready by the bedding-out season. The spreading varieties are suitable for hanging baskets and window box edgings, whilst the true perennial species are grown as pot plants or single specimens in beds for summer decoration.

The following paragraph under the above heading is taken from recent correspondence addressed to the Editor of *The Daily Mail*:—

NIGHT-SCENTED STOCK (*Mathiola Bicornis*).

“This latter plant, although but little known, should be in the garden of every lover of sweet things. During the day it is scentless and insignificant looking, but towards dusk it emits a delicious perfume that continues all night.—A LOVER OF SCENTED GARDENS.”

Mathiola.—See opposite page.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

MALLOES. CARTERS PINK DOMINO AND WHITE LADY.

Mallow, Hardy annual.—This fine tall-growing plant is covered with bloom during the entire summer. Extremely useful for cutting. Height, 3 feet.

No.	Name	Description	Per packet	s.	d.
No. 823.	Carters Pink Domino.	An elegant table ornament; bright rose 6d.	&	1 0
.. 824.	Carters White Lady.	Pure in colour 6d.	&	1 0
.. 825.	Malope grandiflora.	Crimson. Height, 2 to 3 feet 3d.	&	0 6
.. 826.	White 3d.	&	0 6
.. 827.	Rose 3d.	&	0 6

Mathiola (Night Scented Stock).—Hardy annual, of easy culture. Sow in spring.

No. 833.	Bicornis.	1 foot. This should be in every garden as it possesses a most delicious odour, especially toward evening, when it sends forth a delightful perfume, permeating the whole of the atmosphere surrounding it with its beautiful fragrance 3d., 6d., &	1 0

SILVER KING.

LEGION OF HONOUR.

FRENCH MARIGOLD.

This showy annual can be sown in spring and thinned out where expected to bloom; they may also be sown in March in boxes or pots under glass, then transplanted into other boxes, three inches apart, to make sturdy stuff for planting out in June or earlier. Marigolds are profuse bloomers, particularly so if all dead flowers are cut off.

DWARF SINGLE-FLOWERED VARIETIES.

Per packet—s. d.

The following kinds are extremely beautiful in the mixed border, whether singly or in clumps; habit dwarf and bushy, and covered with continuous bloom. 1 foot. First-class annuals.

No. 843.	Silver King.	Colour lemon and chocolate	6d., 1s., &	1 6
„ 844.	Legion of Honour.	Dark gold and maroon	6d., 1s., &	1 6

DWARF DOUBLE-FLOWERED VARIETIES.

No. 845.	Carters Compact Striped.	Beautiful large double blossom, dwarf variety, about 1 foot; continues blooming until the end of summer... ..	6d., 1s., &	1 6
„ 846.	Butterfly.	A taller growing double variety brilliantly marked and striped. 1½ foot... ..	6d., 1s., &	2 6
„ 847.	Dwarf Golden.	Fine dwarf bedding variety. 1 foot	6d. &	1 0
„ 848.	Dwarf Orange.	Selected colour; excellent. 1 foot	6d. &	1 0
„ 849.	Dwarf Striped.	Useful for bedding or edging. 1 foot	6d. &	1 0
„ 850.	Mixed, Carters Dwarf Varieties.	All colours; for beds. 1 foot... ..	6d. &	1 0

TALL DOUBLE-FLOWERED VARIETIES.

No. 851.	Tall Orange.	Nice variety for cutting. 1½ foot	6d. &	1 0
„ 852.	Tall New Large-flowering.	Double Striped. 1½ foot	6d. &	1 0
„ 853.	Mixed, Carters Tall Varieties.	An effective and welcome ornament to the mixed border, shrubberies, &c. 1½ foot	3d., 6d., &	1 0

LARGE-FLOWERED AFRICAN MARIGOLD.

From their bold appearance and enormous globular flowers these showy annuals are specially effective in large mixed borders. Sow at the end of winter under glass, and transplant in April and May.

No. 854.	Carters Giant Show Lemon.	Superior strains for exhibition. Enormous blossom. 1 foot	6d., 1s., &	1 6
„ 855.	Carters Giant Show Orange.	Superior strains for exhibition. Fine habit; grand flower. 1 foot	6d., 1s., &	1 6
„ 856.	Lemon.	The tall garden variety; select stock. 2 feet	6d. &	1 0
„ 857.	Orange.	Showiest of flowers; brilliant effect. 2 feet	6d. &	1 0
„ 858.	Mixed, Carters Varieties.	Carefully selected. 2 feet	6d. &	1 0

CARTERS PERFECTION MIGNONETTE.

A giant red-flowered variety with a delicious scent.

IMPORTANT

Carters Perfection Mignonette received the Highest Award at the Irish International Exhibition, 1907.

This fine strain is a very great improvement, and owing to its robust habit the seedlings require plenty of room, when they will make bushy plants resembling Intermediate Stocks. The spikes of bloom are larger than any other variety, and the habit much less straggling. If the seed-pods are kept pinched off, the beauty of the plant will extend over a long period, and with care in this respect will continue until cut down by frost.

No. 859. Per packet, **6d., 1s., 1s. 6d., and 2s. 6d.**

(For other varieties, see opposite page.)

MIMULUS.

Copyright *James Carter & Co.*
 CARTERS QUEEN'S PRIZE MIMULUS.

Half-hardy annual. To those who know only the original kind, the present magnificent specimens will come as a delightful surprise, the blossoms being of grand size and richly coloured. Besides being of service in beds and borders, they make nice pot plants.

Sow in early spring, in pans under glass, and prick off into boxes, and plant out when hardened. For pot work, the seedlings should be pricked out, and potted off in good light compost, and kept in warm frame.

- Per packet—s. d.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

DWARF NASTURTIUM.—*Continued.*

Nasturtiums, both climbing and dwarf, are of the easiest culture, and anyone desirous of having a display of the most brilliant flowers, without any trouble beyond sowing the seed, should select this delightful family, as they will give off their best efforts through the brightest of the summer, merely needing the seed-balls picked off. If these are permitted to mature, the beauty of the plant is soon lost.

Although the colours of the dwarf varieties contain many more shades and tints than the climbing section, both may be grown near the ground if the situation requires it, but the Climbing Nasturtium shows off its best features when climbing over a fence or clambering up rustic woodwork.

Those who recollect the ordinary garden Nasturtium of "sixty years since" can best appreciate the immense advance we have made in the colour, habit, and beauty of these most invaluable adjuncts to every garden; and we are gratified to think that the greater number of new varieties now in cultivation are the result of our own persistent care and attention at our **Seed Farms in Essex**, where in 1858 we raised and exhibited the **Scarlet Tom Thumb** variety, and received a certificate for it from the Floral Committee of the Royal Horticultural Society. They make the most elegant of edging plants to floral walks.

"Your Nasturtium seed was a pretty mixture and was much admired."—SOPHIA OLNEY, TOTTERIDGE.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CLIMBING NASTURTIUMS AND TROPÆOLUMS.

The Climbing Nasturtium has long been a popular annual flowering plant, as when once the seed is sown it requires no further attention. It is invaluable for covering unsightly spots, as when the position does not admit of its climbing, it is equally at home as a creeper. The seeds must not be sown until all chances of frost are over.

CARTERS GIANT CLIMBING NASTURTIUMS.

No.	Description	Per oz.—s. d.	Per pkt.—s. d.

NEMESIA, CARTERS LARGE FLOWERED.

Nemesia.—Half-hardy annual. Nearly related to the *Linaria*; free-blooming dwarf bushes, for pot culture and open borders. Sow in spring under glass, and transplant; or sow out of doors in May, in patches, where they are intended to flower.

- No. 1497. **Carters Large-flowered Mixed.** Is the finest strain of this most popular flower yet introduced, both for size and massive build of the individual flowers, also for the richness and variety of colours. Height, 1 foot 1s. & 1 6
- „ 1496. **Nemesia Strumosa Grandiflora.** Spotted 1 0
- „ 1461. **Nemesia Nana Compacta Grandiflora "Orange Prince."** Height, 6 to 8 inches. 6d. & 1 0

Gained an Award of Merit of the Royal Horticultural Society, July, 1906.

- No. 916. **Strumosa.** In a variety of colours. 1 foot 6d. & 1 0

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

Per packet—s. & d.
Nertera.—Sow in spring, in light sandy soil.

- No. 923. **Depressa.** Covered with small scarlet berries; for pots. 2 inches ... 1 0

Nierembergia. Half-hardy perennial. For hanging baskets. Sow in spring, and pot off.

- No. 933. **Gracilis.** Delicate silver lavender, like miniature *Petunias* 1 0

Nigella.—Hardy annual. Sow in spring where they are to remain.

- No. 804. **Blue.** 1 foot 3d. & 0 6
- No. 1463. **Miss Jekyll.** A large-flowering variety, deep blue, fantastic foliage. (See *Illustration*, page 185) 6d. & 1 0

Nycteria.—Half-hardy annual.

- No. 1539. **Selaginoides Alba.** Beautiful white flowers, sweet-scented. Height, 3 inches 3d. & 0 6

Oenothera.—See *Evening Primrose*, page 193.

Oxalis.—Hardy bulbous perennial. Seeds should be sown in spring, in pans, and transplanted when large enough.

- No. 934. **Rosea.** Delightful pot plant; bright rose, 4 inches 0 6
- No. 935. **Tropaeoloides.** Bronze-leaved Shamrock; for rockeries, &c. ... 0 6

Pæonia (PÆONY). Hardy tuberous perennials. Sow in autumn, in pots or pans of sandy soil in cold frame, and plant out in spring.

- No. 936. **Carters Choice mixed.** Saved from the best varieties Cd., 1s., & 2 6

Papaver.—See *Poppy*, pages 230, 231, and 232.

Copyright James Carter & Co.
PENTSTEMON, CARTERS ANNUAL.

PENTSTEMON (see Photograph). Hardy herbaceous plants. Brilliant flowers, somewhat like Foxglove, mostly with white throats; continual bloomers; makes a fine border flower. Average height, 2 to 3 feet. Sow seeds in a pan of light soil in early spring, and transplant.

- No. 1514. **Carters Annual Flowering, mixed.** Saved from a prize collection, which includes all the best colours. Some of the blooms may be expected to measure quite 2 inches across 2 6
- „ 941. **Gloxinioides.**—All shades mixed 1s. & 1 6
- „ 943. **Hartwegi.** Fine Gentian-like blossoms; perennial 6d. & 1 0
- „ 944. **Murrayanus.** Unique species; amber-scarlet tubes; perennial 6d. & 1 0
- „ 942. **Perennial, mixed** 6d. & 1 0

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

Nemophila.—Hardest of annuals, and of the easiest culture. Makes a very effective front row to a bed or border, and should be sown out of doors in spring, in patches, where they are to flower.

- No. 917. **Holborn Blue-bell.** Ultramarine, white throat. 6 inches 6d., 1s., & 1 6
- „ 918. **Atrocærulea.** Bright blue, with minute spots. 6 inches... .. 3d. & 0 6
- „ 919. **Discoidalis.** Black, with white border 3d. & 0 6
- „ 920. **Insignis.** Blue; a popular hardy annual for pots or borders 3d. & 0 6
- „ 921. **Insignis alba.** White variety ... 3d. & 0 6
- „ 922. **Maculata.** White, purple blotch ... 3d. & 0 6

NICOTIANA (TOBACCO).—Stately half-hardy perennial. Grown as foliage plants for sub-tropical garden. Sow in pans, in heat, prick off into boxes, harden off, and plant out when frosts are gone.

- No. 924. **Affinis.** The beautiful white species, deliciously scented in the evening. 2 feet, 1s., 1s. 6d., & 2 6
- „ 1462. **Affinis hybrida.** It is one of the most valuable introductions and can be recommended to all. Finest mixture of all colours, as white, rose, pink, red, crimson, violet, light blue, dark violet, &c. 1s. & 1 6
- „ 925. **Sylvestris.** White blossoms, drooping in bunches like *Fuchsia fulgens*. 3 feet 6d. & 1 0
- „ 926. **Colossæ.** Magnificent deep green foliage. 6 feet 6d. & 1 0
- „ 927. **Atropurpurea.** Dark midrib to leaves. 6 feet, 6d. & 1 0
- „ 928. **Havana.** Delicate foliage. 3 feet ... 6d. & 1 0
- „ 929. **Macrophylla.** Grand foliage; makes a bold specimen. 6 feet 6d. & 1 0
- „ 930. **Virginian.** Popular variety; for general use. 6 feet 6d. & 1 0
- „ 931. **Sanderae.** Dark pink flowers. 3 feet... 6d. & 1 0
- „ 932. **Mixed Carters Varieties.** (Tobacco) ... 6d. & 1 0

Passiflora (PASSION FLOWER). Sow in pots in heat, and pot off.

- No. 937. **Cærulea.** Hardy climber; favourite for arbours, porches, and greenhouses ... 6d. & 1 0
- „ 938. **Edulis.** Edible fruit; greenhouse; flower white and purple-tinged 6d. & 1 0
- „ 939. **Taesonía ignea.** Bright scarlet; greenhouse 6d. & 1 0
- „ 940. „ **van Volkemi.** Crimson; greenhouse 6d. & 1 0

PELARGONIUM.—See Geranium, page 196.

PERILLA.—Ornamental foliaged hardy annual. Raise seedlings in heat, prick off into boxes, harden off, and plant out in June.

- No. 945. **Compact Curled.** Rich colour; dark purple foliage. 1 foot 6d. & 1 0
- „ 946. **Narkinensis.** Metallic purple-bronze leaves. 1½ foot per oz., 1s. 6d.; 3d. & 0 6

Carters
PANSIES.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

PANSY.

(See Photograph opposite.)

		Per packet—s. d.
No. 947.	Carters International Prize. —A superb mixture of the largest and best types in every class. Will produce enormous blooms in all the richest colourings and markings. As the name suggests, it is the best of all English and Continental strains, grown under our personal supervision, and acclimatised in this country 1s., 1s. 6d., 2s. 6d., &	5 0
„ 948.	Carters Giant Curled. —Large flowers of striking form and immense fullness, giving them the appearance of being somewhat double. They are variously coloured in all the richest shades, markings, and lacings, and prettily fimbriated. Quite a new class of the greatest beauty 1s., 1s. 6d., 2s. 6d., &	5 0
„ 949.	Carters Prize Show.—The largest blotched and richly belted types. Very fine for exhibition or cultivation in pots 1s., 1s. 6d., 2s. 6d., &	5 0
„ 950.	Carters Fancy Striped. —Elegantly striped, splashed, and mottled, a very curious combination of colours that cannot fail to elicit astonishment. The flowers are large and freely produced, and the habit of the plant dwarf and compact 1s., 1s. 6d., &	2 6
„ 951.	Carters Peacock. —The only variety possessing the true Peacock blue colours. Introduced by our House 6d., 1s., &	1 6
„ 952.	Lord Beaconsfield. —A lovely Pansy, the lower petals being a rich dark velvet blue and the upper ones a silvery blue 6d., 1s., &	1 6
„ 953.	President Carnot. —One of the prettiest grown. All blue flower with a wide belt of white round the outer edges. Very effective in beds and borders 6d., 1s., &	1 6
„ 954.	Fairy Queen. —Rich lavender blue, edged with white; very effective and profuse bloomer, but not so large in size as <i>Carters International Prize</i> 6d. &	1 0
„ 955.	Silver Edged. —Deep maroon, with pure white margin; very effective and profuse bloomer, but not so large in size as <i>Carters International Prize</i> 6d. &	1 0

The following selection includes all the largest of the self-coloured varieties :—

		Per packet—s. d.
No. 956.	Carters Blue. —True blue; distinct shade; very large 6d. &	1 0
„ 957.	„ Jet Black. —The first and best; rich velvet texture; extra fine strain 6d. &	1 0
„ 958.	„ Pure White. —A lovely flower, without eye; very pure 6d. &	1 0
„ 959.	„ Rich Yellow. —Bright, rich, and pure; a very effective shade 6d. &	1 0
„ 960.	„ Rich Maroon Red. —A beautiful and showy thing; quite distinct 6d. &	1 0
„ 961.	„ Rich Purple. —Large and showy; bold massive flowers; very fine 6d. &	1 0
„ 962.	Royal Standard. —Golden yellow 6d. &	1 0
„ 963.	Emperor William. —Blue, with dark eye 6d. &	1 0
„ 967.	Mixed Pansy. —Ordinary 3d., 6d., &	1 0

It is now more than half a century since the late Mr. James Carter took this plant in hand with a view to its improvement in size and range of colourings, and one of our earliest successes was *Jet Black Pansy* (see No. 957). We also introduced the *Peacock Pansy* (see No. 951). Both are still amongst the best in cultivation.

Cultivation.—The Pansy will succeed in any soil that is not too hot and dry, and if a special compost is made for them it should consist of one-third rich loam, one-third leaf mould, and one-third well-decayed dung. In early spring the seed should be sown in frames or in boxes for summer and autumn blooming, and later on sowings may be made about July out of doors in a partially shaded place, transplanting in October or November into where they are intended to flower the following season. The final position should be an open one, and the plants not less than 6 inches apart. There should be no check in their progress either by cold winds, very hard frosts, or long droughts. Nor should they be watered during the hottest months with very cold water. We have classed each type so that Pansy lovers have an opportunity of securing a large and varied choice, all representing the very best strains in cultivation.

“I had a magnificent show of your Pansies early in the season.”—The Rev. G. H. HEDDLESTONE, West Marsh Vicarage, Ash.

“This year my blooms from your seed of *International Prize* are better than ever.”—Mrs. MACMAHON, Bournemouth.

“I should like you to hear of the success of a 2s. 6d. packet of Pansy Seeds I bought in your place in Holborn at the end of May last. It produced 550 good plants, many of which flowered in the autumn. Some of the plants are now full of bloom, and, altogether, the result of the expenditure of 2s. 6d. is highly gratifying.”—Mr. S. W. L. FERNANDES, Doncaster.

CARTERS EMPRESS PETUNIA.

Carters Empress Petunia for Conservatory or Bedding.—We have been many years perfecting this magnificent type, which now embraces many delicate shades of colour, the majority taking the lovely form as shown in the photograph above, which represents a natural bloom. The elegant pencilling in the throat is quite a feature of this modern introduction. It also possesses such a robust but compact habit that it is valuable as a bedding plant, where the fine flowers have a rich effect.

No. 968.—Price per packet, 1s., 1s. 6d., 2s. 6d., and 5s. each.

(For other Petunias see opposite page.)

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS GRAND STRAINS OF PETUNIA.

As frequently exhibited at the Royal Horticultural Society Shows, and awarded, in conjunction with other Improved Flowers,

MANY SILVER CUPS AND HIGHEST PRIZE MEDALS.

CARTERS EMPRESS STRAIN.—*See opposite page.*

Carters Emperor Strain of Single Petunia, for Conservatory or Bedding.—A great improvement upon the old-fashioned Petunia; flowers twice as large, some self-coloured, others parti-coloured. A bed of these is an object of great beauty during summer, and they are equally effective as pot plants for the winter decoration of the conservatory.

No. 977.—**All colours, mixed**, price 1s., 1s. 6d., 2s. 6d., and 5s. per packet.

PETUNIAS.

“Last year I took First Prize for your Single Petunias in open competition.”—Mr. J. W. JONES, Pembroke Dock.

“It may interest you to know that a bed of Petunia grown from your seed was much admired this summer, and has continued to be a mass of flowers until to-day, October 18th, when 12 degrees of frost brought their gay display to a conclusion.”—L. T. PAWLE, Esq., Rowsham.

PHLOX DRUMMONDI.

CARTERS ANNUAL LARGE FLOWERED.

The great advance recently made in both the size and colourings of this popular annual should ensure its again becoming a favourite for growth in beds and borders. It makes a most effective edging if the growths of the taller types are kept pegged down. Another point of importance in the culture of this pretty flower is the fact that it does not like being watered with cold pipe water, especially overhead; it spoils the foliage and ruins the truss. This section may be expected to reach the height of 1 foot.

A BED OF CARTERS CLUSTER POLYANTHUS PRIMROSES.

The strain grown in the Royal London Parks.

Polyanthus Cluster Primrose.—The superb strain we here offer of these lovely-spring flowers improves in extent of colours each year, and there is no other flower which produces such a chaste, brilliant, and enduring effect during the early spring months, either singly or in masses in beds, about the same time as the Hyacinths and Tulips. Sow in spring or summer, in prepared seed bed, and transplant when large enough.

CARTERS GARDEN PRIMROSE.

The Primrose is one of those plants that resents too much coddling, and sometimes when great care is taken over the seeds they refuse to grow. The simplest plan is to sow them in the open ground, in a partially shaded place, from May to July. Just scratch the seed in with a rake and firm the surface, when under the influence of genial showers they will soon come up. The Blue Primrose may be sown in borders at the same season.

Carters "Shirley" Poppy (SILK OR GHOST POPPY).—This lovely garden annual Poppy has probably received its various names from its delicate texture and almost shadowy forms. The shades of colour are endless and we again offer a strain of unusual beauty, which has been **rigidly selected** from the stock of the original nominator, the Rev. W. WILKS, Secretary to the Royal Horticultural Society. It makes a delightful border plant, and is fine for sowing at the sides of grassy walks or along paths where nature's growths give a wilderness-like effect to the surroundings.

No. 1031. Price per packet, 6d., 1s., and 1s. 6d.

POPPY (PAPAYER), DOUBLE ANNUAL VARIETIES.

These showy hardy flowers continue to absorb the attention of the greatest number of amateur gardeners, and deserve the position from their varied and intrinsic beauty. Sow thinly in patches, rows, or beds in spring where the plants are intended to bloom during early summer. The show may be extended if the seed pods are kept cut off. When used as cut flowers, they should be picked early in the morning before opening out.

- No. 1073. **CARTERS PRIZE SINGLE MIXED PRIMULA**
(see *Photograph opposite*).—This splendid mixture contains all the finest varieties and most beautiful forms of this popular greenhouse annual for which our house has long been famous. Several new seedling forms and art shades are introduced this year, in addition to the choicest standard varieties. All varieties not of the highest merit are rigorously excluded, with the result that this mixture will be found unsurpassable for the compactness and vigour of the plants and the beauty and variety of the individual blossoms. When pricking out the seedlings, care should be taken not to discard the smaller plantlets, as these frequently produce some of the newest and most delicate shades 2s. 6d., 3s. 6d., & 5 0
1504. **CARTERS HOLBORN CRESTED.**—A very distinct and beautiful Primula of the Giant section, the result of a cross between *King Edward* and *Holborn Ruby*. The large pink flowers, beautifully fringed, carried on a fine truss thrown up well from the vigorous green crested foliage, make it a unique variety from all other Primulas 2s. 6d., 3s. 6d., & 5 0
1464. **CARTERS HOLBORN CORAL.**—This Giant Primula is the result of a cross between *Princess May* and *Holborn Salmon*. The trusses of rich coral red flowers of immense substance and size, with a beautiful light green eye, together with a strong habit and dark green foliage, make it a very valuable addition to our Giant type of Primulas 2s. 6d., 3s. 6d., & 5 0
1068. **CARTERS KING EDWARD.**—The finest White Primula we have yet seen. The flowers possess immense substance, and are well thrown up 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1064. **Carters Vermilion.**—High class, rich colour 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1067. **Carters Salmon.**—Immense size and lovely colour 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1069. **Carters Ruby.**—Brilliant crimson rose, fern leaved 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1070. **Carters Crimson.**—Excellent habit and brilliant colour... .. 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1071. **Carters Blue.**—The First Class Certificate of the Royal Horticultural Society was granted to our House for this grand break in colour 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1072. **Carters White Elaine.**—Grand truss, dark palm foliage; robust, 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1505. **Orange King.**—A beautiful orange salmon; but not the size and substance of our Giant type 2s. 6d., 3s. 6d., & 5 0
1465. **The Duchess.**—White with zone of rosy-carmine 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1074. **Carters Bouquet Primula.**—This curious and beautiful type produces its flowers directly from the base or stool of the plant in the manner of the common Primrose, these flowers being surrounded with a leafy calyx, in which they remain fixed for a long time. In addition to this peculiarity, the plant, as growth advances, throws up a centre stem in which several of these tightly fixed flowers appear, being surrounded with a crested leafy growth 1s. 6d., 2s. 6d., 3s. 6d., & 5 0

SINGLE PRIMULAS OF EARLIER INTRODUCTION.

1075. **CARTERS CARMINE.**—A lovely rich colour 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1076. **CARTERS WHITE QUEEN.**—Pale green foliage 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1077. **CARTERS ROSE.**—A really pure rose colour of exceptional size 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1078. **CARTERS STRIPED.**—Very prettily marked 1s. 6d., 2s. 6d., 3s. 6d., & 5 0
1080. **Single mixed colours** 1 6

Culture.—Sow in pans of finely sifted soil in spring, and pot off singly into thumb pots when large enough to handle. They require to be raised in heat and kept growing in cool house or frame through the summer. A cool bottom for pots to stand on is essential. Use a compost of leaf mould and rich fibrous loam when shifting into larger pots.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

Carters Primula Stellata (STAR PRIMULA). *See Photograph above.* This is both delightful and graceful when in flower, and it makes a useful decorative plant on the conservatory stage in spring. Free flowering. Treatment for *Primula sinensis* will suit this species well.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

CARTERS SCABIOUS.

This bright-flowering plant is usually treated as an annual in our gardens. During recent years it has been greatly improved both in habit and range of colours, and is fast becoming one of the most popular of border flowers. When given plenty of room and the seed-vessels are kept regularly picked off, it will last through the whole of the summer. Owing to its sweetness the bees are very fond of it and its floral favours also attract all the most beautiful types of butterflies to the neighbourhood.

Sow the seed in heat in February and March in a pan or small box, and transplant the seedlings three inches apart in larger boxes; harden off as spring advances, and set out in the border towards end of May. They may also be sown where intended to grow.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

CARTERS LARGE-FLOWERED SCHIZANTHUS.

Culture of Schizanthus in Baskets.—Seed should be sown in July, August, or September in well-drained boxes or pans in a compost of three parts sandy loam, one part leaf soil, one-sixth part silver sand, all run through a $\frac{1}{2}$ -inch sieve. The boxes should then be filled with the mixture to within $\frac{1}{2}$ -inch of the top and given a good watering in preparation for the seed, which should be sown evenly and covered with sufficient soil to bury the seed. Then place the boxes in a cold frame or greenhouse, covering them with paper to keep the light from them until the seedlings appear, when the shading may be removed. Bright sunlight must be avoided at this stage. When the seedlings are ready to pot, they should be placed singly in thumb pots, well drained, and returned to the frame or greenhouse close to the glass; water should not be given for a day or two if the soil is in a moist condition, but a light syringing is beneficial on bright days. When the plants are two inches high, take out the points to encourage lateral growth, and as this advances place neat little stakes to the plants. When the pots are full of roots they should be transferred into 48's or 50's and returned to the greenhouse for the winter. Plenty of air must be given at all times, and the temperature should be 50° by day and 45° at night. About the end of February the plants will be ready for baskets. The number of plants depend on the size of the basket; 12-in., 15-in., 18-in. are the most suitable sizes of baskets. A 12-in. will take six plants, five round and one in the centre, and the other sizes in proportion; the baskets should be well lined with moss and filled with a compost of three parts fibrous loam, one part well-rotted manure and silver sand, with a little dusting of bone meal. They should now be suspended below a greenhouse roof and allowed to grow freely, fastening the growth to the baskets until they are covered; the tips can be pinched for a little time to make them uniform; at this stage a little artificial manure will be beneficial until the plants show flower, when it can be discontinued and only clear water applied.

Carters Large-flowered.—An improved strain, as exhibited by us at the Temple Show. A lovely annual greenhouse plant. Per packet—s. d.

EARLY LARGE-FLOWERED WINTER VARIETIES.

We very highly recommend this class of Stocks to all who have not grown them. They were first brought into prominence by the advent of that charming pink variety *Beauty of Nice*.

The following varieties all resemble this variety in habit and profusion of bloom. We know of few Stocks which produce such a high percentage of double flowers. Although usually treated as winter varieties, they are admirably suited for summer hedding if treated as ten-week varieties.

Sow in July and August for winter flowering, and in February and March for summer display.

	Per packet—s. d.
No. 1223. Beauty of Nice. —Plant of robust growth, 2 to 2½ feet. Very free flowering. Flowers very large, fine double, fragrant, and delicate fleshy-pink colour. Extremely valuable for decorative work	6d. & 1 0

CARTERS LARGE FLOWERED SWEET PEAS.

Barter's
SELECTED

LARGE FLOWERED
SWEET PEAS

CARTERS SELECTED LARGE-FLOWERED SWEET PEAS.

(See photograph opposite.)

With a view to assisting those of our customers who are not quite conversant with Sweet Peas in their now extremely numerous varieties, we offer our selection of large-flowered varieties as under.

Although all good for exhibition, we chiefly have in mind their suitability for garden decoration and cutting purposes. With this end in view, the varieties we have selected will be found to be of giant-flowered types borne in threes and fours on very long stems. All are bright colours and pleasing shades, which do not scorch in the sun. The plants are of robust habit, and if the bloom is judiciously cut, will produce large quantities of beautiful flowers until late Autumn.

SWEET WILLIAM, CARTERS HOLBORN GLORY.

Per packet—s. d.

Sweet William (*DIANTHUS BARBATUS*).—Perennial. Beyond a good soil this gorgeous plant requires but little attention. Sow in summer, and transplant when large enough in autumn for blooming the next spring and summer.

- No. 1344. **Carters Holborn Glory**.—A beautiful strain of light shades. (*See Photograph*.)
Our *Holborn Glory* strain is magnificent, the blooms being larger than a penny piece.
2 feet 6d. & 1 0
- „ 1345. **Carters Auricula-eyed**.—Very finely marked. 2 feet 6d. & 1 0
- „ 1346. **Carters Dark Crimson**.—Intense colour, dark foliage. 18 to 20 inches 6d. & 1 0
- „ 1347. **Carters Pink**.—A distinct variety, with large heads of a lovely salmon-pink shade.
This should be in every garden. 15 to 18 inches... .. 6d. & 1 0
- „ 1349. **Carters Pure White**. 18 inches 6d. & 1 0
- „ 1350. **Carters Superb Mixed. All colours**... .. 3d., 6d., & 1 0
- Sweet Briar** (*EGLEANTINE*).—Hardy shrub.

No. 1351. Scented. Delicious odour; for hedges, &c. 3 feet 6d. & 1 0

Sweet Pea.—(*See pages 249 to 252.*)

Sweet Sultan (*CENTAURIA*).—(*See page 173.*) Annual. The best and sweetest of annual flowers for cutting, and of easy culture in open ground. Sow in spring, in open, and thin out.

(For **Carters Giant Sweet Sultans**, see page 169.)

- No. 1352. Purple.—For pots or borders. 1½ feet 6d. & 1 0
- „ 1353. White (alba).—Delicate odour 6d. & 1 0
- „ 1354. Yellow.—Brilliant. A lovely colour and delicious scent 6d. & 1 0
- „ 1355. **Carters Mixed. All varieties** 3d., 6d., & 1 0

“My Plants of your Sweet William, *Holborn Glory*, are now a mass of bloom, and magnificent.”—
R. HARVEY, Esq., Wallingford.

Carters Address for all
Correspondence, RAYNES PARK, LONDON, S.W.—1911.

CARTERS MAMMOTH DOUBLE ZINNIA.

The Zinnia is one of the many popular garden flowers introduced into general cultivation in this country by the late Mr. James Carter, and as far back as 1860 our House was awarded a First Class Certificate by the Royal Horticultural Society for our strain of the double-flowered type. When well grown, the Zinnia is one of the showiest of the half-hardy Annuals, its treatment being similar to that of the Aster.

AMARYLLIS.

The Amaryllis are a showy tribe of bulbous plants, and exceedingly effective for conservatory decoration. Pot up the dry hulbs when received in good loamy soil, and expect them to bloom the following summer, or earlier if pushed on in heat. When potting, use a compost of turfy loam and leaf-mould, coarse sand, and well-rotted cow-dung.

CARTERS LILIUM LANCIFOLIUM RUBRUM.

Rich crimson spots, 7s. 6d. per doz. ; 9d. each.

Next to the *Lilium Auratum* we must place the *Lancifolium* or *Speciosum*, so exquisite in form and so easily cultivated. Specimens may frequently be seen flowering abundantly from pots in the squares and on balconies in the very centre of London and other large cities late in summer ; and coming at a time of year when flowers are somewhat scarce makes it doubly welcome. It thrives well out in the border, and, with its pure chaste white, crimson-spotted, rose-spotted flowers, is very attractive.

Specimen spike of Carters Improved Butterfly
Gladiolus, showing type of flower.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

Carters Improved Butterfly Gladiolus now contains beautiful shades of Carmine, Rose, Scarlet, Blue, and many others of the more delicate colours.

By carefully selecting those varieties planted specially for hybridization, we claim to now offer absolutely the largest flowered and the grandest mixture of Gladiolus that has ever been produced.

We strongly recommend this choice mixture to our customers, as we feel sure when once grown they will discard all other mixtures and give this the place of honour in their garden.

Strong flowering bulbs.
Price 15s. per 100; 2s. per doz.

Gladiolus "America."

Autumn Flowering.

A beautiful soft flesh pink, very light and much like *Enchantress* Carnation, except slightly tinged with lavender, which gives it the delicate colouring of the most beautiful *Laelias*. Words fail to do justice in describing this grand and glorious colour; it must be seen to be appreciated.

Price 7s. 6d. per doz.; 9d. each.

Carters New Gladiolus "Blue King."

We offered for the first time last season this superb Gladiolus. Colour deep blue or indigo; flowers as large as the *Gandavensis* section; flowering at latter part of July. Height 3 to 4 ft., and often producing 24 flowers on each spike.

Price 7s. 6d. per doz.; 9d. each.

Gladiolus "Hollandia."

The Pink Brenchleyensis.

Strongly recommended.

This is a sport from the popular scarlet variety. Colour a most delicate pink, inclined to pale primrose. Summer flowering.

Price 20s. per 100; 3s. per doz.

Gladiolus Scarlet Brenchleyensis.

Large handsome spikes of brilliant scarlet.

Extra Large Bulbs.

85s. per 1,000; 9s. per 100; 1s. 3d. per doz.

Good Flowering Bulbs.

60s. per 1,000; 6s. 6d. per 100; 1s. per doz.

NEW.

Gladiolus Princeps.

This superb variety is without doubt one of the finest of the Gladiolus, both in point of size and colouring; the blooms are of rich crimson with white stripes on lower petals, and are of immense size.

Price 7s. 6d. doz.; 9d. each.

Colours striking and diversified, filling up the gap between the summer and autumn sections.

Price, per 1,000, 60s. ; per 100, 6s. 6d. ; per doz., 1s.

Hyacinthus Candicans, per 100, 7s. 6d. ; per doz., 1s. 3d.

LILY OF THE VALLEY.

By availing ourselves of the modern method of cold storage we are enabled to supply forcing roots of this pretty decorative plant through the winter months. One advantage these retarded roots have over those handled in the ordinary way is the quick time in which the flowers are produced. We have seen dormant crowns put into strong heat and brought into beautiful bloom within three weeks, but we recommend six weeks as the average time for a perfect flower spike.

Carters Selected Crowns, for forcing.—In bundles of 25, per 1,000, 70s. ; per 100, 7s. 6d. ; per 25, 2s.

Imported Clumps.—Very fine, per doz., 12s. 6d. ; each, 1s. 3d.

RETARDED LILY OF THE VALLEY.

We have made arrangements by which a continuous supply during winter may be assured.

Giant Flowering Retarded Crowns FOR ALL SEASONS.—Per 100, 8s. 6d. ; per bundle of 25, 2s. 6d.

For perfume of Lily of the Valley, see page 277.

MONTBRETIAS.

We anticipate a great future for these charming autumn-flowering tuberous plants, and when more generally known, they will meet with universal cultivation. Easily grown in the open border. Plant from January to March.

A CURIOUS PLANT FROM CENTRAL ASIA.

MONARCH OF THE EAST. (As originally named and offered by us.)

This remarkable plant exhibits one of those extraordinary traits in nature that few are able to understand, for the magnificent flowers actually come out of the dry bulb without being placed in soil and water.

The flower sheath sometimes reaches a length of nearly two feet, is of a red-brown colour, tipped with red and yellow, whilst the inner parts of the flower are equally as brilliant. The bulb of this extraordinary plant needs only to be placed in some fancy receptacle, *without water*, in a warm room, or on the mantelshelf, when, without showing either leaves or roots, the flower makes its appearance, early in the year, thriving entirely upon the nourishment contained within the bulb. Large bulbs, 9d. each, 7/6 per doz.

Decorated China Bowls for placing these bulbs in, price 6d., 9d., and 1s. each.

Carters Address for all Correspondence, RAYNES PARK, LONDON, S.W.—1911.

Flowering Spike of Double Sweet-Scented Tuberose.

DOUBLE SWEET- SCENTED TUBEROSES.

**BEAUTIFUL PURE WHITE
FLOWERS.**

The Sweet-scented Double White Tuberose (*POLIANTHES TUBEROSA*) has become exceedingly popular. It possesses both a character and a perfume distinct from any other flower, and can be induced to bloom at various seasons. At one time they were only obtainable from the South of Europe; now they are specially cultivated in different parts of the world, and can easily be forced into bloom for the Easter festivals. Those who do not cultivate these flowers for winter decoration can procure the bulbs in the spring, when they will come into flower during the summer. The double-flowered Tuberose may be had in succession by potting the tubers and standing them in a cold frame, covering them 4 in. deep with cocoanut fibre refuse; but they will start much more quickly and with greater certainty in a gentle bottom heat. Loam and well-decayed manure, in about equal parts with a little coarse sand, is the most suitable compost in which to grow them. The pots may be taken out of the frame as soon as the flower stems appear above the leaves; they are then staked and removed to the greenhouse, and placed near the glass.

**Carters Extra Large
Bulbs, 17s. 6d. per 100;
2s. 9d. per doz.**

TIGRIDIA. (Tiger or Shell Flower.)

Some beautiful hybrids of this showy flower have appeared during recent years. The bulbs, which are supplied in a dry state, are usually planted in pots in April, or in groups in the garden in a rich sunny border. For outdoor culture they are generally potted in good mixed soil in autumn, and not over-watered during growth. They maintain a succession of bloom throughout the summer and early autumn.

	Per doz.—s. d.

ANEMONES.

CARTERS "EMPRESS" POPPY ANEMONES.

An easily grown type that should be found in every garden, consists of every shade of colour that is to be found in the Anemone family. They are in full bloom during June; in some seasons earlier.

SUITABLE FOR VASE DECORATION, LASTING FOR A LONG PERIOD WHEN CUT.

Price of Dry Roots, 75s. per 1,000; 8s. 6d. per 100; 1s. 3d. per dozen.

CARTERS "ST. BRIGID" ANEMONE.

THE TRUE IRISH STRAIN.

This beautiful strain, raised originally in Ireland and first brought into prominence by our House, deserves more than passing notice. The flowers are semi-double, most varied and beautifully coloured, and if cut before fully out, are most useful for decorative purposes.

Strong Bulbs, price 8s. 6d. per 100; 1s. 3d. per dozen.

CARTERS ANEMONE, "KING OF THE SCARLETS."

The true English variety.

Intense brilliant scarlet, very double. A fitting companion to our well-known Single *Empress* Anemone. The flowers are of great size, intensely double, and remarkably brilliant in colour.

Price 12s. 6d. per 100; 1s. 9d. per dozen.

CARTERS ANEMONE FULGENS.

We offer the true early single form, fine English-grown roots, of the well-known Scarlet Pau Anemone. A very brilliant scarlet crimson flower, rising from 6 to 9 inches above the rich green palmate foliage; splendid for clumps, in the border, in a bed by itself, vase decoration, and also for naturalization in sunny hedgerows or among the grass.

Price, 9s. per 100; 1s. 3d. per dozen.

RANUNCULUS.

CARTERS COCKADE RANUNCULUS.

Carters Cockade, in a splendid variety of colours and shades, immense double flowers, is fitting in all respects to be cultivated by the side of the *Empress Anemone*, and equally superior with that variety to any other class of Ranunculus.

The flowers are double of immense size, and combine every possible shade of colour peculiar to this interesting and easily-cultivated flower. It is impossible to over-estimate their value to all lovers of hardy border flowers.

This beautiful early summer border plant belongs to the buttercup family. The types now popular in the class under consideration would, from their gay appearance both in form and colour, be hardly recognised as a relation to this modest denizen of the field. The cultural directions are practically the same as advised for Anemones. The Cockade type has a splendid variety of colours and shades.

CYCLAMEN PERSICUM GRANDIFLORUM, in variety.

Flowering plants in 5-inch pots, 18s. and 24s. per doz.

CARTERS "INVINCIBLE PRIZE" GLOXINIA BULBS.

Our Invincible Prize strain stands unequalled, and has on several occasions gained the Highest Awards at Exhibitions.

Strong Bulbs, choice named varieties 2s. 6d. and 3s. 6d. each; 24s. and 36s. per doz.
 Unnamed Seedlings, very good, many equal to named varieties 9s., 12s., and 18s. per doz.

For full particulars of Seeds of our "Invincible" Strain, see page 198 and 199.

STRAWBERRY PLANTS.

We grow a large quantity of this popular fruit, and our season's plants are very fine this year. If fruit is desired next summer, it is best to plant out as early as possible, so that they may become established before winter.

From open ground, 1s. per doz.; 5s. 6d. per 100. In pots 3s. per doz.; 18s. per 100.

- BEDFORD CHAMPION, second early, distinct and vigorous. [ous.]
- BICTON PINE, large white fruit.
- BRITISH QUEEN, fine large variety
- DR. HOGG, large fruit, one of the best.
- GIVONS' LATE PROLIFIC, vigorous and free cropping, fruits very large.
- KEEN'S SEEDLING, early, good for forcing.
- KING OF THE EARLIES, very early, medium size.
- LATEST OF ALL, very late, good flavour
- LEADER, large, mid season, good cropper.
- MONARCH, second early, good flavour.

- NOBLE, early, large fruit, and very free.
- PERFECTION, medium-size fruit, very prolific.
- PRESIDENT, second early, grand cropper, and useful for forcing.
- ROYAL SOVEREIGN, early, good cropper.
- SCARLET QUEEN, large fruit and good cropper.
- SIR C. NAPIER, late, large fruit, good for pot-culture.
- SIR J. PAXTON, early strong grower, and prolific.
- THE BEDFORD, mid-season fruit of exceptional merit.
- VICONTESSE H. DE THURY, early, good for forcing
- WATERLOO, late, large fruit.

Other varieties not offered above can be supplied at usual prices.

CARTERS SELECT LIST OF GRAPE VINES.

FRUITING CANES, 10s. 6d and 12s. 6d. each, in pots.

- A few extra strong Fruiting Canes of some of the
- ALNWICK SEEDLING, black, large oval.
- BARBAROSSA, black, large round and sweet, late.
- *BLACK HAMBURG, roundish oval, large, very sweet.
- BLACK ALICANTE, round, very large, late keeping.
- *BUCKLAND SWEETWATER, pale amber, large round.
- *DUKE OF BUCCLEUGH, amber, very large.
- *FOSTER'S SEEDLING, pale amber, roundish oval.
- GOLDEN QUEEN, white, large and sweet
- GROS COLMAN, dark purple, large and sweet, very late.
- GROS MAROC, black, good flavour.

PLANTING CANES, 5s. and 7s. 6d. each, in pots of the varieties, so long as unsold, 15s. each.

- LADY DOWNES' SEEDLING, large black oval, very sweet.
- *MADRESFIELD COURT, black Muscat, very large.
- MRS. PEARSON, golden roundish oval.
- MUSCAT CANON HALL, roundish oval, very large.
- MUSCAT HAMBURG, black, good flavour.
- MUSCAT OF ALEXANDRIA, pale amber, large oval.
- *ROYAL MUSCADINE, pale amber, round, large and sweet.
- TREBBIANO, greenish white, sweet and good, late.

And other good varieties can be supplied.
 The rest require a heated greenhouse or vinery.

* Can be managed in cool greenhouse.
 The Muscats should be grown in a house by themselves.

Carters Bird Seeds

A mixture of nearly 20 varieties of seeds in suitable proportions, as recommended by the most eminent fanciers. All the seeds are of the finest quality, extra machine screened; bright, sweet, perfectly clean, free from deleterious substances, and of the highest nutritive properties.

Sold in sealed packets only, 1d., 2d., 4d., and 6d.

Also packed in sealed bags, 7 lbs. 2s. 3d., 14 lbs. 4s. 6d., and 28 lbs. 9s.

And in ornamental tins, holding about 7 lbs., 2s. 6d.

CARTERS GRIT SAND.

A genuine hygienic Grit, in combination with the natural phosphates, Silicious and Saline elements, without which no cage bird can be preserved in health. This preparation includes Shell and Grit actually taken from the seashore.

Sold in bags, 1d., 3d., 6d., and 1s.

CARTERS PARROT FOOD.

A mixture of Seeds especially selected for Parrots, Cockatoos, &c., and of the same high standard of excellence for which the Bird Seeds have so long been famed.

Sold in sealed packets only, 3d. and 6d.

Also packed in sealed bags, 7 lbs. 2s. 6d., 14 lbs. 4s. 6d., 28 lbs. 9s.

And in ornamental tins, 2s. 6d.

The facilities which the firm possess for cleaning Seeds are unequalled by any house in the kingdom, and the finest equipment of Seed Cleaning Machinery is employed to take out all injurious Weed Seeds as well as all dust and dirt, thus ensuring the highest standard of excellence.

SOLD BY ALL CORN MERCHANTS, GROCERS, AND STORES.

Carriage Extra, unless enclosed with other goods.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

THE SWEET FRAGRANCE OF OLD-FASHIONED ENGLISH FLOWERS.

Photograph GREATLY REDUCED. James Carter & Co.

10/10 Bottle, in cut glass, contains about 5 ounces perfume.
 5/9 Bottle, in cut glass, contains about 2½ ounces perfume.
 The 15/6 size, in cut glass, contains about 8 ounces perfume.
 2/10 Bottle contains about 1 ounce perfume.
 1/10 Bottle contains about ½ ounce perfume.

Newlands Manor, Lymington, Hants.

“Messrs. CARTER.—Please send me a bottle of your ‘Night Scented Stock.’ It is exactly like the flower, and I can imagine myself in my summer moonlight garden on the coldest winter day if I have some of the scent on my handkerchief. Yours faithfully, MARY CORNWALLIS WEST.

“P.S.—Please send also a bottle to my daughter, the Duchess of Westminster, Eaton, Chester.”

A Lady writes:—“The Night Scented Stock is the most delicious and lasting I have ever used, and I have been devotedly fond of fine delicate odours during a long life.”

Our Natural Flower Scents are the concentrated essences of living flowers extracted with such skill and care that the perfumes contain unimpaired the delicate and odoriferous constituents of the petals. They do not become stale or stain the fabric.

We have recently added the delicious perfume of the Night Scented Stock, and we are quite sure that the unique and fragrant sweetness of the flower and the novelty and truth to nature and durability of the essence will speedily ensure for it the position of a first favourite.

The little flower (*Mathiola bicornis*) which yields this exquisite perfume is cultivated almost exclusively for its lovely aroma. During the day the flower is an almost inconspicuous object, but as night approaches it unfolds its petals and fills the evening air with a subtle fragrance.

GARDEN ORNAMENTS

A 36-page profusely illustrated list of
**ARTISTIC VASES AND PEDESTALS,
 SUNDIALS AND SUNDIAL PEDESTALS,
 TUBS FOR SHRUBS, AND JAPANESE LANTERNS,**
 A POSTCARD WILL BRING YOU ONE BY RETURN OF POST.

CARTERS SOIL CAPACITY VASES.

Show Rooms 237 and 238, HIGH HOLBORN, W.C.

Everyone is agreed that the majority of Garden Pottery is artistic, but owing to the lack of internal space for soil, its utility ceases with its being ornamental.

As Horticulturists and Landscape Gardeners we have been impressed with the need of Pottery which the greater love of Flowers and Gardening demands for the further extension of the cultivation of Flowers in Vases.

Qualified by our knowledge of the requirements of plants, we are placing designs before our patrons that well merit their title of

CARTERS SOIL CAPACITY VASES

which by their form and construction contain a greater bulk of soil, which will enable plants to flourish in scorching sun and drying winds without being continually under the ægis of the water pot.

The drainage being most efficient the water cannot become stagnant ; as the waste passes down the centre of the pedestals they never become stained.

MATERIALS.

Carters Garden Pottery is made of hard-fired earthenware, which assumes a natural stone like weather-worn appearance with age, yet without the lamination and hard and soft patches so frequent in stone. Carters Pottery is frost-proof in the same degree as stone, marble, and cast iron, under similar conditions.

COLOURS.

The stock shades are buff and grey, sample blocks of which will be posted to clients on request. Red, salmon, and white are made to order only.

SURFACE.

The finish varies according to the style. Any finish may be had to order.

PACKING AND CARRIAGE.

All packing is done by experienced packers and the carriage is paid by the purchaser.

Carters Address for all
 Correspondence, RAYNES PARK, LONDON, S.W.—1911.

CARTERS UNIVERSAL VASES.

CARTERS UNIVERSAL VASE, showing the 24-inch Vase on the 36-inch and 24-inch Pedestals, and on the 12-inch and 9-inch Bases.

CARTERS "UNIVERSAL" SOIL CAPACITY VASE.

The **Universal** Vases are as unique for their chaste design and simplicity of construction as for their adaptability for any position in which a Vase may be placed.

The **Universal** Vase is made in three sizes, the internal dimensions of which are: 14 in. in diameter by 8 in. deep, 18 in. in diameter by 10 in. deep, and 24 in. in diameter by 12 in. deep, with interchangeable bases or pedestals varying in height from 6 in. to 3 ft. as described below.

The material is hard-fired earthenware in grey and buff shades, very similar to Portland stone in texture, yet without the lamination and hard and soft patches so frequent in stone. It assumes a weather-worn stone-like appearance with age.

Sizes, prices, and heights of Carters **Universal** Vases with Pedestals complete.

	Size.	Height of Pedestal or Base.	Price. £ s. d.	Total Height.

Carriage and Packing extra.

Carters Seedsmen by Appointment to His Majesty the King—High Holborn, London.

TERMS OF BUSINESS.

FREE CARRIAGE OF GOODS.

(Except in cases where the cost of Carriage on the parcel, through being unusually bulky in proportion to value, absorbs the profit on the transaction, when we reserve to ourselves the right to send unpaid.)

We deliver SEEDS, POTATOES, PLANTS, and BULBS, CARRIAGE PAID to any RAILWAY STATION IN ENGLAND and WALES, IRELAND, and SCOTLAND, where practicable, also FREE by PARCEL POST to Purchaser's door where possible.

We occasionally hear of charges being made by the Railway Companies, notwithstanding that our address label bears the imprint in RED letters "Carriage Paid." In cases where a Charge for the Railway Carriage is made, notwithstanding that the Package is labelled "Carriage Paid," Purchasers should on no account pay the demand, but refer the Carriers to us. Charges for delivery from Stations (if any) must be borne by the Consignee.

Glass and other Goods liable to breakage are sent out securely packed, but beyond that we cannot be responsible for damage in transit. Notice of damage should be at once made to, and compensation claimed from, the Carriers.

CONDITIONS OF GUARANTEE OF QUALITY.

We guarantee our Seeds according to the quality purchased to be of the highest average standard of vitality of the season, and it is open to the purchaser to confirm this by submitting the samples to professional analysis at his own expense. We cannot, however, be in any way responsible for the produce of Seeds sold under this guarantee, or for errors of description; and it must therefore be clearly understood that our responsibility ceases upon the final acceptance of the Goods.

ORDERS.

ALL ORDERS SHOULD BE WRITTEN SEPARATELY FROM GENERAL LETTERS OR LETTERS OF INQUIRY.

Please write your name and address in full, also nearest Railway Station or Shipping Port to which the Goods are to be forwarded.

All letters are opened under the direction of one of our principals, and the orders are given out for execution under personal supervision. Plant orders are sometimes delayed by severe or hot weather, and they at all times take longer to execute than Bulb or Seed orders, in consequence of the time required in lifting and packing, especially in the autumn after the long accumulation of orders.

NEW CUSTOMERS.

We beg respectfully to state that on opening an account it is necessary for us to receive Cash with the order, or a reference to a Banker or some one known to our House.

CASH DISCOUNT.

We allow 5 per cent. discount off the total amount of invoice on all goods paid for with order, or within fourteen days from the date of invoice (but at no later period), UNLESS OTHER TERMS ARE SPECIFIED OR ARRANGED.

TERM OF CREDIT.

OUR FULLEST TERM OF CREDIT IS THREE MONTHS FROM DATE OF INVOICE, AND WITHOUT DISCOUNT, and our books are made up quarterly—*i.e.*, March 1st, June 1st, September 1st, and December 1st. Five per cent interest will be charged upon overdue accounts.

REMITTANCES.

Postal Orders, Post Office Orders, or Cheques on any Bank are acceptable, and should be drawn in favour of JAMES CARTER & Co., and crossed "London and South Western Bank, Limited."

EMPTY PACKAGES, HAMPERs, BOXES, SACKS, BAGS, &c.

Are charged at cost price, and full price will be allowed on them when returned immediately, carriage paid and in good condition. These should be in every case marked—"Empties from —"; a letter by post informing us of their despatch is also necessary. Booking charges must be prepaid, and a receipt should be taken, so that the value may be recovered if they are lost or mis-sent. Coin, other valuables, or important communications should on no account be enclosed with returned empties. On receipt of a post-card we will send labels

ATTENTION TO CUSTOMERS.

It is our earnest desire that all the requirements and directions of Customers be scrupulously attended to by our assistants, AND WE PRACTISE THE UTMOST PERSONAL SUPERVISION TO SEE THAT THEY ARE CARRIED OUT. We would, therefore, respectfully request that we be informed if at any time there is cause for dissatisfaction, that we may have it rectified at the earliest possible moment.

CHANGE OF ADDRESS.

Please notify to us any change of Permanent Address, in order that we may be able to forward our Catalogues with regularity. The favour of your kind recommendation of our House to those of your friends requiring Seeds for the Garden or Farm, or Plants and Flower Roots for the Garden or Conservatory, is respectfully solicited. We shall be pleased, at all times, to forward our Catalogues to any address we may be favoured with.

 Address for all
